NEW QUESTION # 79
During the production order process, what steps can be executed via background processing?
Note: There are 3 correct answers to this question.

- A. Order release
- B. WIP determination
- C. Order settlement
- D. Order confirmation
- E. Order creation

Answer: A,C,E

Explanation:
In the SAP S/4HANA production order process, background processing is used to automate repetitive or high-volume tasks to increase efficiency. The following steps are supported:
Order creation: Production orders can be automatically created from planned orders via background jobs (e.g., using program PP_ORDER_CREATE).
Order release: Releasing orders in batches ensures they are ready for execution without manual intervention for every single order (e.g., using program PPOREL).
Order settlement: This is a period-end closing activity typically performed in the background to allocate actual costs incurred to the appropriate cost objects.
