NEW QUESTION # 38

An organisation has ISO 14001 EMS certification from a third-party certification body. Which one of the following represents an advantage of having accredited certification?

- A. Clarity of the audit report.
- B. An increase in the number of clients.
- C. Recognition of the credibility of the certification process.
- D. An increase in the marketing price of the organisation's products.

Answer: C

Explanation:

Accredited certification under ISO 14001 refers to certification that has been issued by a certification body that is itself accredited by a national accreditation body. This provides formal recognition that the certification body is competent to perform audits and issue certifications in accordance with ISO/IEC 17021 standards.

According to guidance in ISO 14001 Lead Auditor training materials and ISO/IEC 17021, one of the key benefits of accredited certification is:

"Recognition of the credibility, impartiality, and technical competence of the certification process and the certification body issuing the certificate." This recognition:

Increases stakeholder confidence (e.g., regulators, clients, the public), Supports market access and tender qualifications, Confirms that audits are performed in accordance with international best practices.

Option D correctly reflects the most strategic and system-level benefit of accredited certification.

The other options (A, B, and C) may result indirectly or are not directly linked to the purpose of accreditation.

- A. A diverging opinion concerning the audit evidence.
- B. An opportunity for improvement.
- **C. A conformity.**
- D. A non-conformity.

Answer: C

Explanation:

According to ISO 19011:2018 Clause 3.11 (Audit findings) and Clause 6.4.10:

Audit findings can be conformity, nonconformity, or opportunity for improvement.

A conformity simply confirms that the requirements have been met no further action is required from the auditee.

Nonconformities require corrective actions.

Opportunities for improvement may trigger voluntary action but not mandatory response.

Diverging opinions are handled during the audit but don't require post-audit response unless linked to nonconformity.
