

UiPath-ADPv1 Exam Bible, UiPath-ADPv1 New Real Test

P.S. Free 2026 UiPath UiPath-ADPv1 dumps are available on Google Drive shared by DumpsValid: <https://drive.google.com/open?id=1ZpcA-cm9EnGjWpmB8ZxvdDt7QjIKL-R>

Making right decision of choosing useful UiPath-ADPv1 practice materials is of vital importance. Here we would like to introduce our UiPath-ADPv1 practice materials for you with our heartfelt sincerity. With passing rate more than 98 percent from exam candidates who chose our UiPath-ADPv1 Study Guide, we have full confidence that your UiPath-ADPv1 actual test will be a piece of cake by them. Don't hesitate, you will pass with our UiPath-ADPv1 exam questions successfully and quickly.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.
Topic 2	<ul style="list-style-type: none">• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.
Topic 3	<ul style="list-style-type: none">• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Topic 4	<ul style="list-style-type: none">• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.

Top Three Types of DumpsValid UiPath UiPath-ADPv1 Exam Dumps

The UiPath-ADPv1 exam questions are the ideal and recommended study material for quick and easiest UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) exam dumps preparation. The UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) practice questions are designed and verified by qualified and renowned UiPath Certification Exams trainers. They work closely and check all UiPath UiPath-ADPv1 ExamDumps step by step. They also ensure the best possible answer for all UiPath-ADPv1 exam questions and strive hard to maintain the top standard of UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) exam dumps all the time.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q103-Q108):

NEW QUESTION # 103

The provided exhibit displays the representation of the "Deadline" field using the yyyy-mm-dd format.

□ In what order should the Queue Items be processed by a single robot executing a Performer workflow?

Answer:

Explanation:

□ Explanation:

NEW QUESTION # 104

An error occurs during the Initialization state within the 'FrameworkMnitAllSettings.xaml' file for a process using REFramework which is executed on Orchestrator. The project contains default values for the settings specified in 'Config.xlsx'.

What is the current state of the job in Orchestrator?

- A. Suspended
- **B. Faulted**
- C. Successful
- D. Stopped

Answer: B

Explanation:

The current state of the job in Orchestrator is Faulted, because an error occurred during the Initialization state of the process using REFramework. The REFramework is a template for creating robust and scalable automation projects that uses the State Machine workflow type¹. The Initialization state is the first state in the REFramework, which is responsible for initializing the application, reading the configuration file, and setting the log level². If an error occurs during the Initialization state, the process will go to the End Process state, which will perform the final actions and close the application². The End Process state will also mark the job as Faulted in Orchestrator, if the value of the ShouldMarkJobAsFaulted argument is True². The default value of this argument in the REFramework is True, unless it is changed in the Config.xlsx file or in the Orchestrator assets³.

Option A is incorrect, because the job is not Successful, as an error occurred during the Initialization state.

Option C is incorrect, because the job is not Suspended, as the process did not pause or wait for any user input.

Option D is incorrect, because the job is not Stopped, as the process did not encounter any user intervention or manual termination.

References: 1: State Machine 2: The UiPath ReFramework 3: ShouldMarkJobAsFaulted Argument

NEW QUESTION # 105

How do you subtract a specific TimeSpan from "Today" in VB.NET?

- **A. Today.Subtract(TimeSpan)**
- B. DateTime.SubtractSpanFrom(Today, TimeSpan)
- C. Today.SubtractUsingDate(-TimeSpan)
- D. DateTime.Now - TimeSpan

Answer: A

Explanation:

The Today property of the DateTime structure returns the current date with the time component set to zero¹. The Subtract method of the DateTime structure returns a new DateTime object that is the result of subtracting a specified time interval from this instance². The TimeSpan structure represents a time interval that can be expressed in days, hours, minutes, seconds, and milliseconds³.

Option D is the correct way to subtract a specific TimeSpan from Today in VB.NET. For example, the following code snippet subtracts one day and two hours from the current date and displays the result:

```
Dim ts As New TimeSpan(1, 2, 0, 0) ' One day and two hours
Dim result As DateTime = Today.Subtract(ts) ' Subtract from Today
Console.WriteLine(result.ToString("d")) ' Display the result
```

Option A is not valid, because there is no SubtractSpanFrom method in the DateTime structure. Option B is not correct, because it subtracts the TimeSpan from the current date and time, not just the date. Option C is not valid, because there is no SubtractUsingDate method in the DateTime structure.

NEW QUESTION # 106

What is the use of job priorities in unattended automations within UiPath Orchestrator?

- A. To create job dependencies that must be completed before new job execution.
- B. To determine machine resource allocation among processes.
- C. To determine which processes should be executed first when dealing with multiple jobs.
- D. To sort and organize tasks within a folder.

Answer: C

Explanation:

The use of job priorities in unattended automations within UiPath Orchestrator is to determine which processes should be executed first when dealing with multiple jobs. Job priorities are values that can be assigned to jobs or triggers when they are created or edited. The possible values are High, Normal, and Low. Job priorities affect the order in which the jobs are executed by the robots, with higher priority jobs being executed before lower priority jobs. Job priorities can help you to optimize the execution of your unattended automations, especially when you have limited resources or time-sensitive processes. You can also use job priorities to create job dependencies that must be completed before new job execution, by using the Start Job activity with the Wait for completion option and setting the priority of the child job to High. NEW QUESTION # 107

A developer aims to employ the REFramework for automating a business process that involves a TransactionData collection (DataTable) comprising vendor names and addresses.

Instructions: Choose the appropriate variable type for the TransactionItem from the provided drop-down list in the following exhibit.

□

Answer:

Explanation:

□

Explanation:

The REFramework (Robotic Enterprise Framework) in UiPath is designed to work with transactional data. For a process that involves iterating over a DataTable where each row represents a transaction item, the appropriate variable type for the TransactionItem would be a DataRow.

In the context of REFramework, a DataRow is typically used to represent a single transaction item when the transaction data is contained within a DataTable. This allows the framework to process each row (or transaction) one by one.

Therefore, the correct variable type for the TransactionItem from the drop-down list should be DataRow.

NEW QUESTION # 108

.....

Sharp tools make good work. Our UiPath-ADPv1 study quiz is the best weapon to help you pass the exam. After a survey of the users as many as 99% of the customers who purchased our UiPath-ADPv1 preparation questions have successfully passed the exam. And it is hard to find in the market. The pass rate is the test of a material. Such a high pass rate is sufficient to prove that UiPath-ADPv1 Guide materials has a high quality.
