However, since not all takers have the same learning styles, we devise a customizable module to suite your needs. More importantly, our commitment to help you become AZ-140 Certified does not stop in buying our products. We offer customer support services that offer help whenever you'll be need one.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q246-Q251):

NEW QUESTION # 246

You have a Windows Virtual Desktop host pool named Pool1. Pool1 contains session hosts that use FSLogix profile containers hosted in Azure NetApp Files volumes.

You need to back up profile files by using snapshots.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create an Azure NetApp account.	
Register the NetApp Resource Provider.	
Register the Azure NetApp snapshot policy feature.	
Create a snapshot policy.	
Apply a snapshot policy to a volume.	

Answer:

Explanation:

Actions	Answer Area
Create an Azure NetApp account.	Register the Azure NetApp snapshot policy feature.
Register the NetApp Resource Provider.	Create a snapshot policy.
Register the Azure NetApp snapshot policy feature.	Apply a snapshot policy to a volume.
Create a snapshot policy.	
Apply a snapshot policy to a volume.	

Explanation

Register the Azure NetApp snapshot policy feature.
Create a snapshot policy.
Apply a snapshot policy to a volume.

NEW QUESTION # 247

You have an Azure Virtual Desktop deployment that contains a host pool. The host pool contains 10 session hosts. The session hosts are configured by using a custom image and ephemeral disks.

You need to deploy Microsoft OneDrive for Business.

Which two actions should you perform for each session host? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Deploy an MSIX app attach package.
- B. Install FSLogix.
- C. Implement Application Masking.
- D. Install the OneDrive sync app by using the per-machine installation option.
- E. Install the OneDrive sync app by using the per-user installation option.

Answer: B,D

Explanation:

Using the OneDrive sync app with non-persistent environments requires that you install the sync app per machine.

NEW QUESTION # 248

You have an Azure subscription that contains an Azure Virtual Desktop deployment. The deployment contains 25 session hosts.

You create two storage accounts as shown in the following table.

Name	Location	Azure file share
storage1	East US	share1
storage2	East US 2	share2

The storage accounts store Azure Virtual Desktop user profile data.

You plan to deploy FSLogix user Profile Containers that will use Cloud Cache.

You need to configure the FSLogix registry settings for each session host.

How should you complete the registry settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Registry Path: HKLM\SOFTWARE\Policies\FSLogix\Profiles

Registry Value 1:

Type: DWORD

Value: 1

Registry Value 2:

Type: MULTI_SZ

Value: type=smb,connectionString=<\\storage1.file.core.windows.net\share1>;
type=smb,connectionString=<\\storage2.file.core.windows.net\share2>

Answer:

Explanation:

Answer Area

Registry Path: HKLM\SOFTWARE\Policies\FSLogix\Profiles

Registry Value 1:

Type: DWORD

Value: 1

Registry Value 2:

Type: MULTI_SZ

Value: type=smb,connectionString=<\\storage1.file.core.windows.net\share1>;
type=smb,connectionString=<\\storage2.file.core.windows.net\share2>

Explanation:

Answer Area

Registry Path: `HKLM\SOFTWARE\Policies\ESLogin\Profiles`

Registry Value 1: `DeleteLocalProfileWhenVHDShouldApply`

Type: `DWORD`

Value: `1`

Registry Value 2: `VHDLocations`

Type: `MULTI_SZ`

Value: `type=smb,connectionString=<\\storage1.file.core.windows.net\share1>;
type=smb,connectionString=<\\storage2.file.core.windows.net\share2>`

NEW QUESTION # 249

You have an Azure subscription that contains an Azure Virtual Desktop deployment. The deployment contains a host pool named Pool1. Users access the deployment by using the Windows App.

You need to ensure that the users must reauthenticate every eight hours. The solution must minimize administrative effort. What should you do?

- A. From the Microsoft Entra admin center, create a Conditional Access policy
- B. Define Pool1 as a validation environment.
- C. From the Microsoft Entra admin center, configure the User settings.
- D. For each session host, configure just-in-time (JIT) VM access.

Answer: A

NEW QUESTION # 250

You have an Azure subscription that contains a hybrid Azure Active Directory (Azure AD) tenant and two domain-joined Azure virtual machines. The virtual machines run Windows Server 2019 and contain managed disks.

You plan to deploy an Azure Virtual Desktop host pool that will use a Storage Spaces Direct Scale-Out File Server to host user profiles.

You need to ensure that the virtual machines can host the Storage Spaces Direct deployment. The solution must meet the following requirements:

- * Ensure that the user profiles are available if a single server fails.
- * Minimize administrative effort.

What should you do? To answer, select the appropriate options In the answer area. NOTE: Each correct selection is worth one point.

Answer Area

On each virtual machine, install:

- The Failover Clustering feature
- The File Server Resource Manager role service
- The Remote Desktop Services role

Create:

- An additional Azure virtual machine that runs Windows Server 2019
- An Azure NetApp Files share
- An Azure storage account
- Two shared disks

Answer:

Explanation:

Answer Area

On each virtual machine, install:

- The Failover Clustering feature
- The File Server Resource Manager role service
- The Remote Desktop Services role

Create:

- An additional Azure virtual machine that runs Windows Server 2019
- An Azure NetApp Files share
- An Azure storage account
- Two shared disks

Explanation

Graphical user interface, text, application Description automatically generated

On each virtual machine, install:
