ACD201 Test Dates, Exam ACD201 Preparation

After you have used our ACD201 learning prep, you will make a more informed judgment. We strongly believe that our ACD201 practice quiz will conquer you. After that, you can choose the version you like. We also provide you with three trial versions of our ACD201 Exam Questions. You can choose one or more versions according to your situation, and everything depends on your own preferences. And you will definitely love our ACD201 training materials.

Appian Senior Developer Sample Questions (Q87-Q92):

NEW QUESTION # 87

You're reviewing the process model built by your team member.

Which two design decisions might cause performance issues? (Choose two.)

- A. Asynchronous subprocess
- B. Data types passed by reference
- C. Too many nodes
- D. No target process for the Send Message event

Answer: C,D

Explanation:

Having no target process for the Send Message event can cause unnecessary processing and delays.

Too many nodes in a process model increase complexity and processing overhead, leading to potential performance issues.

NEW QUESTION # 88

You're developing a functionality to manage transactions for an insurance company. Each transaction can have multiple items where respective item type and item amount can be entered. The amount entered can be either negative or positive, and is a decimal data type with a precision of 8 and a scale of 2.

A maximum of 10 items can be entered for a transaction. Once all the items are entered, you need to calculate and show the sum of all items' total amounts at the transaction level.

What is the best way to calculate and display the sum of all item amounts?

- A. `round(sum(r!items.amount),2)`
- B. `text(sum(r!items.amount),"00.00")`
- C. `fixed(sum(r!items.amount),2,false())`

Answer: C

Explanation:

`fixed(sum(r!items.amount),2,false())` is the best option because it returns the sum as a text value formatted to exactly two decimal places, which is ideal for currency or financial amounts. This ensures the total displays correctly as a string, maintaining precision and formatting for both positive and negative values.

NEW QUESTION # 89

You're developing a case management application. Currently, users can view a list of all cases designed using a `forEach()` loop from a record query. Users can navigate to the case summary page which shows the case details in a two (2) column layout. Users are also able to update the case details.

During the last round of UAT testing, users reported that the tool was not intuitive to use.

Match each feedback comment to the suggested UI/UX improvements.

Note: Each UI/UX improvement will be used once, or not at all. To change your responses, you may deselect your response by clicking the blank space at the top of the selection list.

Answer:

Explanation:

□

NEW QUESTION # 90

Which two options are correct regarding record relationships when using synced records in your application? (Choose two.)

- A. Record type relationships enforce referential integrity.
- B. Many-to-one relationships can be established using record relationships.
- C. Up to 20 relationships can be added on a record type with data sync enabled.
- D. Relationships can be established between any record types that have sync enabled, regardless of the source.

Answer: B,C

Explanation:

Many-to-one relationships can be established between record types using record relationships.

Up to 20 relationships can be added to a record type with data sync enabled, according to Appian platform limits.

NEW QUESTION # 91

You're designing a process used to notify multiple users of marketing campaigns. These campaigns occur infrequently, but are sent out to the hundreds of customers that are stored in your app.

How should you best design your process model to send the emails whilst using a common email process model (CMN_SendEmail), to be most performant?

The outputs of this node are not required for the main process.

- A. Set "CMN-SendEmail" as a synchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- B. Set "CMN_SendEmail" as an asynchronous "Subprocess" node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.
- C. Set "CMN_SendEmail" as a "Start Process" process node and select "Automatically run multiple instances of this node" for all the users that are on the mailing list.

Answer: C

Explanation:

Using "Start Process" as the node type and enabling "Automatically run multiple instances of this node" for all users on the mailing list launches each email as a separate, lightweight process, maximizing performance and scalability, especially since the main process does not require the outputs.

NEW QUESTION # 92

.....

Are you often regretful that you have purchased an inappropriate product? Unlike other platforms for selling test materials, in order to make you more aware of your needs, ACD201 test preps provide sample questions for you to download for free. You can use the sample questions to learn some of the topics about ACD201 learn torrent and familiarize yourself with the ACD201 Quiz torrent in advance. If you feel that the ACD201 quiz torrent is satisfying to you, you can choose to purchase our complete question bank. After the payment, you will receive the email sent by the system within 5-10 minutes. Click on the login to start learning immediately with ACD201 test preps. No need to wait.
