

2026 Microsoft Efficient PL-400 Cert Guide

2026 Latest itPass4sure PL-400 PDF Dumps and PL-400 Exam Engine Free Share: https://drive.google.com/open?id=1k9jcxrwfOKnSi_VLWTU_JEQ1DMm7dhyS

Nowadays, computers develop rapidly, and it makes our daily life and work more convenient. IT workers positions are popular in 21st century. Microsoft PL-400 exam questions are also known by many IT certification candidates. If candidates can get a golden certification, senior positions with high salary and good benefits are waiting for you. Our latest and Valid PL-400 Exam Questions may be the best helper for candidates working for Microsoft certifications.

The PL-400 Exam covers a range of topics related to the Power Platform, including creating model-driven and canvas apps, working with Common Data Service, integrating Power Platform with external data sources, designing and implementing Power Automate workflows, creating and managing Power BI reports and dashboards, and building chatbots using Power Virtual Agents. Additionally, the exam assesses candidates' ability to design and implement custom connectors, manage security and compliance, and work collaboratively with stakeholders.

Topics of the Microsoft PL-400 Exam:

The exam is related to the following topics:

- Create highly reliable, predictable, and cost-effective solutions that integrate with on-premise applications and infrastructure. Organization structure, including external dependencies. Industry acceptance for business process changes.
- Design and develop highly scalable applications using Windows Azure, Windows Server, and Windows Client. Dynamics, features, and capabilities of the Windows Azure platform. Automation of business processes through the use of Windows PowerShell.
- Implement effective solutions for monitoring and managing web servers in a cloud environment. Loads, vulnerabilities, and performance. Model and implement rules and security features. Content security, IP blocking, and SQL security.
- Design and implement cloud-based solutions to store, access, manipulate, and secure large amounts of data. Select, create, restore, and manipulate database structures for Windows Azure-based applications. Tournaments test to ensure any data stored in the database is secure.
- Create highly scalable solutions that integrate on-premise applications with Windows Azure-based services. Connector capabilities include creating, connecting, disconnecting, and managing connectors. Managed Code, IntelliSense, and Code Tools.

Preparation Opportunities to Use

The Microsoft learning platform offers a lot of resources that the students can use to succeed in their exam. For Microsoft PL-400, there are two preparation options that they can go for right from the certification webpage. These two options include free online training and paid training courses. Let's take a closer look at them:

1. Free online courses

There is a whole list of learning paths that you can go for to learn the needed skills for becoming a certified specialist. These paths include the following courses:

- Integrate with Power Platform and Data Verse;
- Automate a Business Process Using Power Automate;
- Create a Model-Driven Application in Power Apps;
- Develop and Integrate Analytics Reports with Power BI;
- Administer Power Apps Portals;
- Work with Dynamics 365 Apps and Power Platform Tenants;

Each of these options has different modules (ranging from 2 to 6). With these resources, you will develop the expertise that you need to clear your certification exam at your first attempt.

PL-400 certification can help you prove your strength and increase social competitiveness. Although it is not an easy thing for somebody to pass the exam, but our PL-400 exam torrent can help aggressive people to achieve their goals. This is the reason why we need to recognize the importance of getting the test PL-400 Certification. More qualified certification for our future employment has the effect to be reckoned with, only to have enough qualification certifications to prove their ability, can we win over rivals in the social competition.

Microsoft Power Platform Developer Sample Questions (Q34-Q39):

NEW QUESTION # 34

You are examining code written by another developer that is not functioning correctly. There are no other JavaScript or business rules in use on the form.

This code is properly registered to the OnChange event of the telephone1 field on an account entity form. The main operation is to update the primary contact's phone number when the account phone number changes. The primary contact field is a lookup. (Line numbers are included for reference only.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Yes

getFormType gets the form type for the record.

Form type 2 is Update.

Note: Syntax: formContext.ui.getFormType();

Return Value

Type: Number

Description: Form type. Returns one of the following values

RETURN VALUE

Value Form type

0 Undefined

1 Create

2 Update

3 Read Only

4 Disabled

6 Bulk Edit

Box 2: Yes

Xrm.WebApi.updateRecord Return Value: On success, returns a promise object containing the values specified earlier in the description of the successCallback parameter.

Note:

Syntax: Xrm.WebApi.updateRecord(entityLogicalName, id, data).then(successCallback, errorCallback); Where errorCallback: A function to call when the operation fails. An object with the following properties will be passed:

errorCode: Number. The error code.

message: String. An error message describing the issue.

Box 3: No

It will displayed even if the update fails.

NEW QUESTION # 35

You are developing a Power Platform solution. You plan to add three buttons to a form. The buttons have the following requirements:

□ You need to complete each button's action.

Which commands should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-if>

NEW QUESTION # 36

You need to select visualization components.

What should you use? To answer, select the appropriate options from the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□ Scenario: Customer satisfaction surveys are recorded with Microsoft Forms Pro.

Box 1: Flip switch

The flip switch is like an on/off switch, providing a choice between two values.

Box 2: Linear gauge

The linear gauge lets your users input numerical values by dragging a slider instead of typing in the exact quantity. The slider provides whole number input and display only. Use this control for any numerical and money columns.

Box 3: Option set

The choice control presents a set of options for your users to choose from when entering data.

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION # 37

A company has a Common Data Service (CDS) environment.

All accounts in the system with a relationship type of Customer set must have an account number. A plug-in has been developed.

When a Customer is updated with a relationship type, the plug-in sets the account number if not provided by the user.

You need to register the plug-in.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

□ Explanation

Timeline Description automatically generated with medium confidence

Step 1: In the Plug-in Registration tool, select Register New Assembly.
 You use the Plug-in Registration tool (PRT) to register your plug-in assemblies and steps.
 Registering an assembly is the process of uploading the assembly to the Dataverse database.
 Step 2: In the Plug-in Registration tool, Select Register New Step,...PreOperation PreOperation occurs before the main system operation and within the database transaction.
 If you want to change any values for an entity included in the message, you should do it here.
 Step 3: In the Plug-in Registration tool, Select Register New Image, change the Image type to be a PreImage, and..
 If your plug-in step is registered in the PreValidation or PreOperation stages of the execution pipeline, you could use the Organization service to retrieve the current value of the property, but this is not a good practice for performance. A better practice is to define a pre-entity image with your plug-in step registration.
 Reference:
<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/register-plug-in>

NEW QUESTION # 38

A company imports data from files.

The following code is created to import the files. (Line numbers are included for reference only.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:
