Do not underestimate the value of our Salesforce PDII exam dumps because it is the make-or-break point of your career.

Salesforce Platform Developer II Sample Questions (Q155-Q160):

NEW QUESTION # 155

A company has code to update a Request and Request Lines and make a callout to their external ERP system's REST endpoint with the updated records.

The callousUtil.makeRestCallout fails with a "You have uncommitted work pending. Please commit or rollback before calling cut" error.

What should be done to address the problem?

- A. Change the CallousUtil .makeRestCallout to an @future method.
- B. Change the callousUtil makeRestCallout to an @InvocablesMethod method.
- C. Remove the Database, setSavepoint and Database, rollback.

Answer: A

Explanation:

The error occurs because DML operations were performed before a callout. To fix this, the callout should be made from an asynchronous method such as one annotated with `@future(callout=true)`, which allows DML operations to be committed separately from the callout.

nces: Apex Developer Guide - Making Asynchronous Callouts

NEW QUESTION # 156

The "action" attribute on `<apex:page>` is ONLY evaluated on which type of request?

- A. Postback request
- B. Get request
