

一生懸命にC_BCBTP_2502ブロンズ教材 &合格スムーズC_BCBTP_2502関連問題資料 |信頼的なC_BCBTP_2502真実試験

Exam Code: C_BCBTP_2502
Total No. of Questions: 30
Passing Percentage: 70
Exam Duration: 60 Min

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 1

Which of the following can you do with SAP Datasphere? Note: There are 2 correct answers to this question.

- A. Create and consume in-memory caches
- B. Manage user accounts and authorizations
- C. Integrate data from different sources
- D. Provide a unified data and analytics platform

Answer C D

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 2

What are the main types of APIs commonly used in SAP BTP? Note: There are 2 correct answers to this question.

- A. SOAP APIs
- B. REST APIs
- C. FTP APIs
- D. RPC APIs

Answer A B

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 3

What are some of the SAP BTP commercial models? Note: There are 2 correct answers to this question.

- A. Modular Pricing
- B. Pay-As-You-Go
- C. Subscription
- D. Named User License

Answer B C

成功することが大変難しいと思っていますか。IT認定試験に合格するのは難しいと思いますか。今SAPのC_BCBTP_2502認定試験のためにため息をつくのでしょうか。実際にはそれは全く不要です。IT認定試験はあなたの思い通りに神秘的なものではありません。我々は適当なツールを使用して成功することができます。適切なツールを選択する限り、成功することは正に朝飯前のことです。どんなツールが最高なのかを知りたいですか。いま教えてあげます。GoShikenのC_BCBTP_2502問題集が最高のツールです。この問題集には試験の優秀な過去問が集められ、しかも最新のシラバスに従って出題される可能性がある新しい問題も追加しました。これはあなたが一回で試験に合格することを保証できる問題集です。

SAP C_BCBTP_2502 認定試験の出題範囲:

トピック	出題範囲

トピック 1	<ul style="list-style-type: none"> • SAP Business Technology Platform の理解: このセクションでは、SAP ソリューションアーキテクトのスキルを評価し、SAP Business Suite 戦略全体における SAP Business Technology Platform の位置付けに焦点を当てます。変革の実現、企業戦略との整合性、デジタルイノベーションの支援におけるプラットフォームの役割を理解することが含まれます。受験者は、現代のビジネスプロセスにおける SAP BTP の関連性と、他の SAP 製品との統合方法を理解することが求められます。
トピック 2	<ul style="list-style-type: none"> • SAP Business Suite による CIO 変革の実現: このセクションでは、IT トランスフォーメーション・マネージャーのスキルを評価し、CIO 主導のデジタルトランスフォーメーションにおける価値提供における SAP Business Suite の役割について解説します。エンタープライズ IT における SAP ポートフォリオの重要性を強調し、SAP BTP の機能を紹介するとともに、エンドツーエンドのプロセスや業界固有のユースケースとの連携方法を示します。受験者は、SAP BTP に含まれる主要製品を特定し、ポートフォリオを横断するコンポーネントがどのように統合されて測定可能な価値を実現するかを説明する必要があります。

C_BCBTP_2502 関連問題資料、C_BCBTP_2502 真実試験

他の人はあちこちで SAP C_BCBTP_2502 試験資料を探しているとき、あなたはすでに勉強中で、準備段階でライバルに先立ちます。また、我々 GoShiken は量豊かな SAP C_BCBTP_2502 試験資料を提供しますし、ソフト版であなたに SAP C_BCBTP_2502 試験の最も現実的な環境をシミュレートさせます。勉強中で、何の質問があると、メールで我々はあなたのためにすぐ解決します。心配はありませんし、一心不乱に試験復習に取り組んでいます。

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite 認定 C_BCBTP_2502 試験問題 (Q33-Q38):

質問 # 33

What is the primary function of SAP Business Process Intelligence?

- A. To analyze and optimize business processes using AI-driven insights.
- B. To manage API security and integrations.
- C. To replace existing workflow automation tools.
- D. To store customer transactional data.

正解: A

解説:

Before an organization can automate or improve its operations, it must first understand how its processes are actually running. The primary function of SAP Business Process Intelligence (largely centered around the SAP Signavio suite) is to analyze and optimize business processes using AI-driven insights. It provides

"Process Mining" capabilities that scan the data logs of the SAP Business Suite to reveal the "real" path a business process takes, often uncovering hidden bottlenecks, manual workarounds, and deviations from the standard procedure.

By positioning Business Process Intelligence as a starting point for digital transformation, SAP BTP allows organizations to make data-backed decisions about where to automate. For example, the tool might discover that a specific regional office takes twice as long to process purchase orders compared to the global average.

Using AI, it can identify the root cause—such as a lack of automation or incorrect master data—and recommend specific BTP services (like SAP Build) to fix the issue. This creates a cycle of continuous improvement, where processes are constantly monitored, analyzed, and optimized, ensuring that the SAP Business Suite operates at peak efficiency and remains aligned with the company's strategic goals.

質問 # 34

What is a key advantage of SAP BTP for enterprises?

- A. It eliminates on-premise deployments completely.

- B. It enables AI-driven process automation and decision-making.
- C. It does not support low-code/no-code development.
- D. It restricts integration to SAP-only applications.

正解: B

解説:

A key advantage of SAP BTP is its ability to transform a standard "system of record" into an "intelligent enterprise" by enabling AI-driven process automation and decision-making. In the legacy SAP Business Suite environment, processes were often manual and reactive. By positioning BTP as the innovative extension layer, enterprises can now embed artificial intelligence and machine learning directly into their business workflows. This allows for the automation of high-volume, repetitive tasks—such as matching bank statements or verifying supplier invoices—while also providing intelligent recommendations for complex scenarios like demand forecasting or talent management.

Furthermore, this advantage extends to decision-making. By leveraging the advanced analytics and data management capabilities of BTP, business leaders gain access to real-time insights that were previously hidden in data silos. This shift from gut-based to data-driven decision-making allows enterprises to respond more agilely to market fluctuations. SAP BTP serves as the unified platform where developers and business users alike can leverage pre-built AI services to enhance the core functions of SAP S/4HANA, SuccessFactors, and other LoB solutions, ensuring that the enterprise remains competitive in a rapidly evolving digital economy.

質問 # 35

Which SAP BTP capability enables businesses to deploy AI-driven chatbots?

- A. SAP Business Process Intelligence
- B. SAP Conversational AI
- C. SAP Fiori
- D. SAP Event Mesh

正解: B

解説:

To improve user experience and automate customer or employee interactions, SAP BTP offers SAP Conversational AI. This service provides an end-to-end platform for building, training, and monitoring intelligent chatbots (digital assistants). These chatbots utilize Natural Language Processing (NLP) to understand human language, identify user intent, and extract relevant entities from a conversation. Unlike simple rule-based scripts, these AI-driven bots can learn over time and provide a more intuitive, human-like interaction.

In the context of the SAP Business Suite, SAP Conversational AI is positioned as a powerful tool for scaling business operations without increasing headcount. For example, a chatbot can be integrated into SAP S/4HANA to help users check invoice statuses or into SAP SuccessFactors to answer common HR policy questions. This capability shifts the burden of routine inquiries away from human agents to automated systems that are available 24/7. While SAP Fiori provides the visual design language and SAP Event Mesh handles asynchronous messaging between systems, SAP Conversational AI is the specific component responsible for the "intelligence" and "interaction" layers of the platform, enabling a more conversational and efficient enterprise environment.

質問 # 36

Which SAP BTP component supports microservices-based application development?

- A. SAP Kyma Runtime
- B. SAP Business Network
- C. SAP SuccessFactors
- D. SAP Concur

正解: A

解説:

As enterprises move toward modern, scalable application architectures, the move from monolithic codebases to microservices becomes essential. SAP Kyma Runtime is the specific component of SAP BTP designed to support this transition. It is a fully managed Kubernetes-based environment that allows developers to extend SAP applications using serverless functions and microservices. Kyma provides a cloud-native way to build and run containerized applications, offering high scalability and flexibility. Positioning Kyma within the SAP Business Suite ecosystem is critical for "side-by-side" extensibility. It allows developers to build

specialized services-such as a custom loyalty engine or a unique logistics tracker-using their preferred programming languages and frameworks (like Node.js, Go, or Python) while maintaining a seamless connection to the SAP core. Kyma is particularly powerful for "event-driven" architectures; it can listen for events in SAP S/4HANA (like a "New Sales Order created" event) and instantly trigger a microservice to perform a specific action in a third-party system. This decouples the innovation layer from the stable core, allowing for rapid updates and deployments without risking the stability of the primary business processes.

質問 # 37

Which SAP BTP services support AI-driven automation? (Choose two).

- A. SAP Business Network
- B. SAP Business Process Intelligence
- C. SAP AI Core
- D. SAP Concur

正解: B、C

解説:

AI-driven automation on SAP BTP is achieved through a combination of foundational infrastructure and process analysis tools. SAP AI Core is a key service that provides a dedicated runtime for AI workloads. It allows developers to manage the entire lifecycle of machine learning models-from training to deployment- at scale. It is designed to handle large datasets and complex computations while ensuring that AI models are transparent and compliant with enterprise standards. By using SAP AI Core, businesses can embed predictive capabilities directly into their business logic.

Complementing this is SAP Business Process Intelligence (part of the SAP Signavio suite). This service uses AI to "mine" data from existing business processes to identify inefficiencies, bottlenecks, and manual tasks that are prime candidates for automation. It provides the "sight" to see where automation is needed, while SAP AI Core provides the "brain" to execute intelligent decisions. Together, these services allow an organization to move beyond simple task automation toward intelligent process transformation. SAP Concur and SAP Business Network, while benefiting from these technologies, are SaaS applications rather than the underlying services that facilitate the creation and management of AI-driven automation workflows within the BTP ecosystem.
