Test H19-341_V1.0 Assessment, Actual H19-341_V1.0 Tests

Huawei H19-341_V1.0 practice test also contains mock exams just like the desktop practice exam software with some extra features. As this is a web-based software, this is accessible through any browser like Opera, Safari, Chrome, Firefox and MS Edge with a good internet connection. Huawei H19-341_V1.0 Practice Test is also customizable so that you can easily set the timings and change the number of questions according to your ease.

Huawei HCSA-Field-Intelligent Collaboration V1.0 Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which multimedia communication protocols does the Huawei Bar 310 support? (Select all that apply)

- A. H.239
- B. H.323
- C. SIP
- D. BFCP

Answer: A,B,C,D

Explanation:

The Huawei CloudLink Bar 310 is an industry-standard terminal designed for maximum interoperability. It supports the two primary signaling protocols: H.323 (B) and SIP (D).

To facilitate content sharing (dual-stream) during a call, it supports the corresponding data protocols for each signaling type:

- * H.239 (A): The standard for dual-streaming within H.323 calls.
- * BFCP (C): The Binary Floor Control Protocol used for dual-streaming within SIP calls.

This ensures the Bar 310 can share presentations and video simultaneously regardless of the infrastructure it is connected to.

NEW QUESTION # 18

Which of the following CloudVC 21.0 solution NEs (Network Elements) can be installed on bare-metal servers? (Select all that apply)

- A. CloudRSE
- B. SC
- C. CloudMCU
- D. SMC

Answer: A,B,C,D

Explanation:

In the Huawei CloudVC 21.0 architecture, the core Network Elements (NEs) are designed for flexible deployment. To meet high-performance requirements and provide dedicated resource allocation, all four primary components can be installed on bare-metal servers (typically Huawei's Taishan or 2288X series servers):

- * SMC and SC: Can be deployed on bare metal for large-scale registration and management capacity.
- * CloudMCU: Bare-metal deployment is often preferred for high-density media processing to ensure maximum port capacity and low latency.
- * CloudRSE: Bare-metal installation allows the Recording & Streaming Engine to handle intensive 1080p60 video concurrent recording and playback tasks without the overhead of a hypervisor.

NEW QUESTION # 19

Which of the following specifications are supported by Huawei CloudLink Bar 310? (Select all that apply)

- A. Dual-band Wi-Fi (2.4 GHz and 5 GHz)
- B. H.265 HD codec
- C. Microphone array with 8 m sound pickup
- D. 12x PTZ optical zoom

Answer: A,B,C

Explanation:

The Huawei CloudLink Bar 310 is an integrated "all-in-one" video conferencing terminal designed for small to medium-sized rooms.

- * Codec (A): It supports high-efficiency H.265 (HEVC) coding, which allows for 1080p HD video at significantly lower bandwidths compared to H.264.
- * Network (B): It features built-in dual-band Wi-Fi, allowing it to connect to either 2.4 GHz or 5 GHz networks for flexible deployment without wired Ethernet.
- * Audio (D): It is equipped with a built-in MEMS microphone array that provides a 8-meter voice pickup radius.
- * Camera (C) is incorrect: The Bar 310 uses a fixed-lens wide-angle camera with digital zoom (typically 5x). High-ratio optical zoom like 12x PTZ is found on the Box series (like the Box 310/610) when paired with external cameras like the Camera 200.

NEW QUESTION # 20

For Huawei SMC conference management function, which methods can be used to create a video conference?

(Select all that apply)

- A. Third-party interfaces
- B. Outlook (integrated)
- C. SiteCall
- D. SMC

Answer: A,B,C,D

Explanation:

The Huawei Service Management Center (SMC) is highly flexible and offers multiple ways to initiate or schedule conferences:
* Third-party interfaces (A): Uses RESTful APIs to allow external applications (like an enterprise's own office portal) to create conferences.

* SiteCall (B): A unique Huawei feature where a user can initiate a multi-point conference directly from an endpoint (terminal) by selecting multiple contacts or a group, without needing to log into the SMC web interface.

* SMC (C): The native web-based management interface used by administrators and users to schedule and manage conferences.

* Outlook (D): Through a dedicated plug-in, users can schedule a video conference directly from their Outlook calendar, just like a regular meeting.

NEW QUESTION # 21

Which of the following operating systems does Huawei CloudLink soft clients support? (Select all that apply)

- A. iOS
- B. Android
- C. HarmonyOS
- D. Windows

Answer: A,B,C,D

Explanation:

Huawei CloudLink soft clients (such as CloudLink Desktop and CloudLink Mobile) are designed for "Anywhere Office" collaboration. They provide a consistent user experience across the following platforms:

* Windows (A): For desktop and laptop PCs.

* HarmonyOS (B): Fully optimized for Huawei's ecosystem of smartphones and tablets.

* iOS (C): For Apple iPhones and iPads.

* Android (D): For the wide variety of Android-based mobile devices.

Additionally, macOS is also supported, though not listed in the options provided. This cross-platform support ensures that users can join meetings regardless of their device hardware.

NEW QUESTION # 22

.....

With our users all over the world, you really should believe in the choices of so many people. Our advantage is very obvious. Of course, the right to choose is in your hands. What I want to say is that if you are eager to get an international H19-341_V1.0 Certification, you must immediately select our H19-341_V1.0 preparation materials. After you have studied for twenty to thirty hours on our H19-341_V1.0 exam questions, you can take the test. And your pass rate will reach 99%.
