Professional-Cloud-DevOps-Engineer free practice torrent & Professional-Cloud-DevOps-Engineer real pdf test

The client can try out and download our Professional-Cloud-DevOps-Engineer training materials freely before their purchase so as to have an understanding of our Professional-Cloud-DevOps-Engineer exam questions and then decide whether to buy them or not. The website pages of our product provide the details of our Professional-Cloud-DevOps-Engineer learning questions. You can see the demos of our Professional-Cloud-DevOps-Engineer Study Guide, which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our Professional-Cloud-DevOps-Engineer study materials.

Google Cloud Certified - Professional Cloud DevOps Engineer Exam Sample Questions (Q98-Q103):

NEW QUESTION # 98

Your company follows Site Reliability Engineering practices. You are the person in charge of Communications for a large, ongoing incident affecting your customer-facing applications. There is still no estimated time for a resolution of the outage. You are receiving emails from internal stakeholders who want updates on the outage, as well as emails from customers who want to know what is happening. You want to efficiently provide updates to everyone affected by the outage. What should you do?

- A. Provide all internal stakeholder emails to the Incident Commander, and allow them to manage internal communications. Focus on providing responses directly to customers.
- B. Provide periodic updates to all stakeholders in a timely manner. Commit to a "next update" time in all communications.

- C. Delegate the responding to internal stakeholder emails to another member of the Incident Response Team. Focus on providing responses directly to customers.
- D. Focus on responding to internal stakeholders at least every 30 minutes. Commit to "next update" times.

Answer: B

Explanation:

Explanation

When disaster strikes, the person who declares the incident typically steps into the IC role and directs the high-level state of the incident. The IC concentrates on the 3Cs and does the following: Commands and coordinates the incident response, delegating roles as needed. By default, the IC assumes all roles that have not been delegated yet. Communicates effectively. Stays in control of the incident response. Works with other responders to resolve the incident. <https://sre.google/workbook/incident-response/>

NEW QUESTION # 99

Your team is designing a new application for deployment both inside and outside Google Cloud Platform (GCP). You need to collect detailed metrics such as system resource utilization. You want to use centralized GCP services while minimizing the amount of work required to set up this collection system. What should you do?

- A. Import the Stackdriver Debugger package, and configure the application to emit debug messages with timing information.
- B. Instrument the code using a timing library, and publish the metrics via a health check endpoint that is scraped by Stackdriver.
- C. Import the Stackdriver Profiler package, and configure it to relay function timing data to Stackdriver for further analysis.
- D. Install an Application Performance Monitoring (APM) tool in both locations, and configure an export to a central data storage location for analysis.

Answer: D

NEW QUESTION # 100

Your application artifacts are being built and deployed via a CI/CD pipeline. You want the CI/CD pipeline to securely access application secrets. You also want to more easily rotate secrets in case of a security breach. What should you do?

- A. Prompt developers for secrets at build time. Instruct developers to not store secrets at rest.
- B. Store secrets in Cloud Storage encrypted with a key from Cloud KMS. Provide the CI/CD pipeline with access to Cloud KMS via IAM.
- C. Encrypt the secrets and store them in the source code repository. Store a decryption key in a separate repository and grant your pipeline access to it
- D. Store secrets in a separate configuration file on Git. Provide select developers with access to the configuration file.

Answer: B

NEW QUESTION # 101

You need to run a business-critical workload on a fixed set of Compute Engine instances for several months.

The workload is stable with the exact amount of resources allocated to it. You want to lower the costs for this workload without any performance implications. What should you do?

- A. Convert the instances to preemptible virtual machines.
- B. Create an Unmanaged Instance Group for the instances used to run the workload.
- C. Migrate the instances to a Managed Instance Group.
- D. Purchase Committed Use Discounts.

Answer: D

NEW QUESTION # 102

You are leading a DevOps project for your organization. The DevOps team is responsible for managing the service infrastructure and being on-call for incidents. The Software Development team is responsible for writing, submitting, and reviewing code. Neither team has any published SLOs. You want to design a new joint-ownership model for a service between the DevOps team and the

Software Development team. Which responsibilities should be assigned to each team in the new joint-ownership model?

- A. DevOps team responsibilitiesManage the service infrastructureBe on-call for incidentsSoftware Development team responsibilitiesAdopt and publish SLOs for the serviceSubmit code to be reviewedShared responsibilities for code reviews
- B. DevOps team responsibilitiesShared responsibilities for code reviewsSoftware Development team responsibilitiesManage the service infrastructureBe on-call for incidents on a rotation basisAdopt and publish SLOs for the serviceSubmit code to be reviewed
- C. DevOps team responsibilitiesManage the service infrastructurePerform code reviewsSoftware Development team responsibilitiesSubmit code to be reviewed by the DevOps teamBe on-call for incidentsPublish the SLOs that the DevOps team must meet
- D. DevOps team responsibilitiesManage the service infrastructureBe on-call for incidentsPerform code reviewsSoftware Development team responsibilitiesSubmit code to be reviewed by the DevOps teamPublish the SLOs that the DevOps team must meet

Answer: A

NEW QUESTION # 103

.....

We have always believed that every user has its own uniqueness. In order to let you have a suitable way of learning. The staff of Professional-Cloud-DevOps-Engineer study materials also produced three versions of the system: the PDF, Software and APP online. Although the content is the same in all the three versions of our Professional-Cloud-DevOps-Engineer Exam Questions, the displays are totally different. And you will find that in our Professional-Cloud-DevOps-Engineer practice engine, the content and versions as well as plans are the best for you.
