

Juniper JN0-460 Reliable Exam Registration, JN0-460 Latest Dumps Ppt

www.NWExam.com
Get complete detail on JN0-460 exam guide to crack Juniper Mist AI Wired, Specialist. You can collect all information on JN0-460 tutorial, practice test, books, study material, exam questions, and syllabus. Firm your knowledge on Juniper Mist AI Wired, Specialist and get ready to crack JN0-460 certification. Explore all information on JN0-460 exam with number of questions, passing percentage and time duration to complete test.

2026 Latest ValidBraindumps JN0-460 PDF Dumps and JN0-460 Exam Engine Free Share: https://drive.google.com/open?id=1e3afWSMQ2EiM21mKfP5phs4jNt_hjr0s

The Juniper JN0-460 certification exam always gives a tough time to their candidates. So you have to plan well and prepare yourself as per the recommended Juniper JN0-460 exam study material. For the quick and complete JN0-460 exam preparation the ValidBraindumps Juniper JN0-460 Practice Test questions are the ideal selection. With the ValidBraindumps Juniper JN0-460 PDF Questions and practice test software, you will get everything that you need to learn, prepare and pass the difficult JN0-460 exam with good scores.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.

Topic 2	<ul style="list-style-type: none"> • Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.
Topic 3	<ul style="list-style-type: none"> • Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.
Topic 4	<ul style="list-style-type: none"> • Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
Topic 5	<ul style="list-style-type: none"> • Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.

Pass Guaranteed Quiz JN0-460 - High Hit-Rate Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Reliable Exam Registration

Our JN0-460 learning guide allows you to study anytime, anywhere. If you are concerned that your study time cannot be guaranteed, then our JN0-460 learning guide is your best choice because it allows you to learn from time to time and make full use of all the time available for learning. Our JN0-460 learning guide is for the world and users are very extensive. In order to give users a better experience, we have been constantly improving. The high quality and efficiency of JN0-460 Test Guide has been recognized by users. The high passing rate of JN0-460 exam training is its biggest feature. As long as you use JN0-460 test guide, you can certainly harvest what you want thing.

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q84-Q89):

NEW QUESTION # 84

In the context of deploying wired assurance, which of the following are considered supported architectures?

- A. On-premises data centers
- B. Hybrid cloud environments
- C. Virtual private networks (VPNs)
- D. Cloud-managed networks
- E. Peer-to-peer networks

Answer: A,B,D

NEW QUESTION # 85

Which three switch testing tools are available when using Wired Assurance?(Choose three.)

- A. ping
- B. load factory-default
- C. bounce port
- D. iPerf
- E. cable test

Answer: A,C,E

Explanation:

According to Juniper Mist Wired Assurance documentation, three built-in diagnostic tools available for testing switch functionality are Bounce Port, Ping, and Cable Test.

Bounce Port allows you to disable and re-enable a port to reset connectivity.

Ping verifies Layer 3 reachability between the switch and target IPs.

Cable Test performs diagnostics to detect wiring faults, impedance mismatches, or cable lengths.

These tools are accessed directly from the Switch Testing Tools section in the Mist dashboard and are available for EX Series and QFX Series switches onboarded to the Mist cloud.

NEW QUESTION # 86

Which two events are displayed under the Client Events area found on the Insights page? (Choose two.)

- A. Reflection (Loop Detection)
- B. Reassociation
- C. DHCP Denied
- D. Restart by User

Answer: B,C

Explanation:

Within Mist Insights, Client Events show state transitions such as reassociation and IP-level issues like DHCP Denied. These help correlate connectivity issues across wired or wireless edge connections.

NEW QUESTION # 87

Which three administrator roles allow you to claim switches? (Choose three.)

- A. Network Admin
- B. Observer
- C. Super User
- D. Helpdesk
- E. Installer

Answer: A,C,E

Explanation:

In Juniper Mist Cloud, administrative roles define what actions a user can perform within an organization.

The ability to claim and onboard switches is granted to roles that have configuration or deployment privileges.

"Only users with Super User, Network Admin, or Installer roles can claim, onboard, or delete devices such as access points, switches, or gateways within a Mist organization." Option A (Network Admin): Correct - can claim and manage network devices.

Option B (Installer): Correct - role specifically intended for device onboarding and site setup.

Option C (Super User): Correct - full administrative privileges including device claiming.

Option D (Observer): Incorrect - view-only access.

Option E (Helpdesk): Incorrect - limited to troubleshooting functions, not device management.

NEW QUESTION # 88

What are two unique advantages about configuration automation in Wired Assurance? (Choose two.)

- A. 100% open APIs
- B. client SLEs
- C. switch insights
- D. programmable workflows

Answer: A,D

Explanation:

Wired Assurance in Mist Cloud provides automated configuration for Juniper EX Series switches. The automation is built on open APIs and supports programmable workflows, which allow seamless integration with external systems and reduce manual configuration errors.

"Wired Assurance leverages 100% open APIs, enabling integration with third-party automation and orchestration tools. Combined with programmable workflows, this provides a consistent and scalable automation framework for switch deployment and management." Option A (100% open APIs): Correct - APIs enable automation and external integration.

Option C (programmable workflows): Correct - workflows automate repetitive tasks and provisioning.

Option B (client SLEs): Incorrect - this is part of user experience monitoring, not automation.

Option D (switch insights): Incorrect - this relates to telemetry and visibility, not automation.

NEW QUESTION # 89

.....

Our company has been putting emphasis on the development and improvement of JN0-460 test prep over ten year without archaic content at all. So we are bravely breaking the stereotype of similar content materials of the exam, but add what the exam truly tests into our JN0-460 Exam Guide. So we have adamant attitude to offer help rather than perfunctory attitude. We esteem your variant choices so all these versions of JN0-460 study materials are made for your individual preference and inclination.
