

Authentic SPLK-3002 Exam Questions, Reliable SPLK-3002 Study Plan

BONUS!!! Download part of DumpsReview SPLK-3002 dumps for free: <https://drive.google.com/open?id=1opCjfAOW3D-ud25JRFG6b8zJ8n0hrct5>

This skill set brings multiple benefits to you. You get well-paid jobs and promotions because firms prefer Splunk IT Service Intelligence Certified Admin SPLK-3002 certification holders. Although all professionals desire to earn certifications, many never find enough time to go beyond their graduation degree. Any area of accreditation is in high demand, and if you have a Splunk IT Service Intelligence Certified Admin SPLK-3002 Certification, you will grow in the information technology industry with ease.

Splunk SPLK-3002 exam is an essential certification for IT professionals who want to demonstrate their expertise in Splunk IT Service Intelligence. Splunk IT Service Intelligence Certified Admin certification validates the candidate's knowledge and skills in configuring and administering ITSI, identifying and resolving issues related to IT service performance, and creating customized dashboards and reports. Passing SPLK-3002 Exam will help IT professionals to advance their career and increase their value to their organization.

Reliable SPLK-3002 Study Plan, Practice SPLK-3002 Exam Fee

If you want to pass the exam smoothly buying our SPLK-3002 study materials is your ideal choice. They can help you learn efficiently, save your time and energy and let you master the useful information. Our passing rate of SPLK-3002 study materials is very high and you needn't worry that you have spent money and energy on them but you gain nothing. We provide the great service after you purchase our SPLK-3002 Study Materials and you can contact our customer service at any time during one day.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q97-Q102):

NEW QUESTION # 97

In distributed search, which components need to be installed on instances other than the search head?

- A. SA-IndexCreation and SA-ITOA on indexers; SA-ITSI-Licensechecker and SA-UserAccess on the license master.
- **B. SA-IndexCreation and SA-ITSI-Licensechecker on indexers.**
- C. SA-ITSI-Licensechecker on indexers.
- D. SA-IndexCreation on indexers; SA-ITSI-Licensechecker and SA-UserAccess on the license master.

Answer: B

Explanation:

Explanation

SA-IndexCreation is required on all indexers. For non-clustered, distributed environments, copy SA-IndexCreation to \$SPLUNK_HOME/etc/apps/ on individual indexers.

NEW QUESTION # 98

Which ITSI functions generate notable events? (Choose all that apply.)

- A. KPI threshold breaches.
- B. Correlation search.
- C. Multi-KPI alert.
- D. KPI anomaly detection.

Answer: A,B,D

Explanation:

Explanation

After you configure KPI thresholds, you can set up alerts to notify you when aggregate KPI severities change.

ITSI generates notable events in Episode Review based on the alerting rules you configure.

Anomaly detection generates notable events when a KPI IT Service Intelligence (ITSI) deviates from an expected pattern.

Notable events are typically generated by a correlation search.

NEW QUESTION # 99

What should be considered when onboarding data into a Splunk index, assuming that ITSI will need to use this data?

- A. Use | stats functions in custom fields to prepare the data for KPI calculations.
- B. Plan to build as many data models as possible for ITSI to leverage
- C. Make sure that all fields conform to CIM, then use the corresponding module to import related services.
- D. Check if the data could leverage pre-built KPIs from modules, then use the correct TA to onboard the data.

Answer: D

Explanation:

Reference:

When onboarding data into a Splunk index, assuming that ITSI will need to use this data, you should consider the following:

B) Check if the data could leverage pre-built KPIs from modules, then use the correct TA to onboard the data. This is true because modules are pre-packaged sets of services, KPIs, and dashboards that are designed for specific types of data sources, such as operating systems, databases, web servers, and so on. Modules help you quickly set up and monitor your IT services using best practices and industry standards. To use modules, you need to install and configure the correct technical add-ons (TAs) that extract and normalize the data fields required by the modules.

The other options are not things you should consider because:

A) Use | stats functions in custom fields to prepare the data for KPI calculations. This is not true because using | stats functions in custom fields can cause performance issues and inaccurate results when calculating KPIs. You should use | stats functions only in base searches or ad hoc searches, not in custom fields.

C) Make sure that all fields conform to CIM, then use the corresponding module to import related services. This is not true because not all modules require CIM-compliant data sources. Some modules have their own data models and field extractions that are specific to their data sources. You should check the documentation of each module to see what data requirements and dependencies they have.

D) Plan to build as many data models as possible for ITSI to leverage. This is not true because building too many data models can cause performance issues and resource consumption in your Splunk environment. You should only build data models that are necessary and relevant for your ITSI use cases.

NEW QUESTION # 100

When installing ITSI to support a Distributed Search Architecture, which of the following items apply?

(Choose all that apply.)

- A. Extract ITSI app package into etc/apps directory of search head.
- B. Copy SA-IndexCreation to the etc/apps directory on the index cluster master node.
- C. Extract installer package into etc/apps directory of the cluster deployer node.
- D. Copy SA-IndexCreation to all indexers.

Answer: D

Explanation:

Explanation

Copy SA-IndexCreation to \$SPLUNK_HOME/etc/apps/ on all individual indexers in your environment.

NEW QUESTION # 101

Which of the following describes entities? (Choose all that apply.)

- A. Entities must be IT devices, such as routers and switches, and must be identified by either IP value, host name, or mac address.
- B. An abstract (pseudo/logical) entity can be used to split by for a KPI, although no entity rules or filtering can be used to limit data to a specific service.
- C. To automatically restrict the KPI to only the entities in a particular service, select "Filter to Entities in Service".
- D. Multiple entities can share the same alias value, but must have different role values.

Answer: B,C

Explanation:

Reference:

Entities are IT components that require management to deliver an IT service. Each entity has specific attributes and relationships to other IT processes that uniquely identify it. Entities contain alias fields and informational fields that ITSI associates with indexed events. Some statements that describe entities are:

B) An abstract (pseudo/logical) entity can be used to split by for a KPI, although no entity rules or filtering can be used to limit data to a specific service. An abstract entity is an entity that does not represent a physical host or device, but rather a logical grouping of data sources. For example, you can create an abstract entity for each business unit in your organization and use it to split by for a KPI that measures revenue or customer satisfaction. However, you cannot use entity rules or filtering to limit data to a specific service based on abstract entities, because they do not have alias fields that match indexed events.

D). To automatically restrict the KPI to only the entities in a particular service, select "Filter to Entities in Service". This option allows you to filter the data sources for a KPI by the entities that are assigned to the service. For example, if you have a service for web servers and you want to monitor the CPU load percent for each web server entity, you can select this option to ensure that only the events from those entities are used for the KPI calculation.

NEW QUESTION # 102

.....

Our Splunk IT Service Intelligence Certified Admin study questions have a high quality, that mainly reflected in the passing rate. More than 99% students who use our SPLK-3002 exam material passed the exam and successfully obtained the relating certificate. This undoubtedly means that if you purchased SPLK-3002 exam guide and followed the information we provided you, you will have a 99% chance of successfully passing the exam. With SPLK-3002 Exam Guide, there will not be a situation like other students that you need to re-purchase guidance materials once the syllabus has changed. SPLK-3002 exam material not only helps you to save a lot of money, but also let you know the new exam trends earlier than others.
