A full refund guarantee (terms and conditions apply) offered by LatestCram will save you from fear of money loss.

CrowdStrike Falcon Administrator Sample Questions (Q151-Q156):

NEW QUESTION # 151

How do you disable all detections for a host?

- A. You cannot disable all detections on individual hosts as it would put them at risk
- B. Create an exclusion rule and apply it to the machine or group of machines
- C. Contact support and provide them with the Agent ID (AID) for the machine and they will put it on the Disabled Hosts list in your Customer ID (CID)
- D. In Host Management, select the host and then choose the option to Disable Detections

Answer: D

Explanation:

The administrator can disable all detections for a host by selecting the host and then choosing the option to Disable Detections in the Host Management page. This will prevent the host from sending any detection events to the Falcon Cloud. The other options are either incorrect or not available.

NEW QUESTION # 152

Which is a filter within the Host setup and management > Host management page?

- A. User name
- B. BIOS Version
- C. Locality
- D. OU

Answer: D

Explanation:

OU (organizational unit) is a filter within the Host setup and management > Host management page. The Host management page allows you to view and manage all the hosts in your environment that have Falcon sensors installed. You can filter the hosts by hostname, group, OS version, sensor version, last seen date, health events, detections, and preventions. You can also filter by OU, which is a logical grouping of hosts based on their Active Directory domain structure.

NEW QUESTION # 153

Which of the following controls the speed in which your sensors will receive automatic sensor updates?

- A. Maintenance Tokens
- B. Channel File Update Throttling
- C. Sensor Update Policy
- D. Sensor Update Throttling

Answer: D

Explanation:

The option that controls the speed in which your sensors will receive automatic sensor updates is Sensor Update Throttling. Sensor Update Throttling allows you to limit the number of sensors that can download a new sensor version per hour. This way, you can avoid network congestion or bandwidth issues caused by simultaneous sensor updates. You can configure the Sensor Update Throttling setting in the Sensor Update Policy for each platform.

NEW QUESTION # 154

You need to be aware of which policies are the most used as new hosts are being added to your CID. Where could you easily find a review of the top ten sensor update, prevention, and device control policies?

- A. Sensor Subscription licenses
- B. Managed Assets dashboard
- C. Executive Summary
- **D. Sensor Policy Daily report**

Answer: D

NEW QUESTION # 155

The Customer ID (CID) is important in which of the following scenarios?

- A. When setting up API keys
- B. When adding a user to the Falcon console under the Users application
- C. When performing a Host Search
- **D. When performing the sensor installation process**

Answer: D

Explanation:

The Customer ID (CID) is important in which of the following scenarios: when performing the sensor installation process and when setting up API keys. The CID is a unique identifier for your organization that is required for authenticating your sensor installation and communication with the Falcon cloud. You need to provide your CID when installing the Falcon sensor on a host, either by using a command-line parameter or by using the falconctl tool. The CID is also required for setting up API keys, which are used for accessing the Falcon platform programmatically via the Falcon APIs. You need to provide your CID when creating an API client and key in the API Clients and Keys page in the Falcon console.

NEW QUESTION # 156

.....

Another great format of our CCFA-200b exam dumps is the real questions in a PDF file. This is a portable file that contains the most probable CCFA-200b test questions. The CrowdStrike CCFA-200b Pdf Dumps format is a convenient preparation method as these CCFA-200b questions document is printable and portable.
