## Clearer Professional-Cloud-DevOps-Engineer Explanation - Professional-Cloud-DevOps-Engineer Instant Download

Perhaps you plan to seek a high salary job. But you are not confident enough because of lack of ability. Now, our Professional-Cloud-DevOps-Engineer practice guide is able to give you help. You will quickly master all practical knowledge in the shortest time. Also, obtaining the Professional-Cloud-DevOps-Engineer certificate fully has no problem. With the high pass rate of our Professional-Cloud-DevOps-Engineer exam braindumps as 98% to 100%, we can claim that as long as you study with our Professional-Cloud-DevOps-Engineer study materials, you will pass the exam for sure.

Google Cloud Certified - Professional Cloud DevOps Engineer Exam is a challenging certification exam that requires extensive knowledge and expertise in cloud operations and DevOps engineering. By passing this certification exam, individuals can demonstrate their proficiency in deploying and managing cloud solutions using Google Cloud Platform technology and can enhance their career prospects in the highly competitive field of cloud computing.

Earning the Google Cloud Certified Professional Cloud DevOps Engineer certification can help professionals advance their careers and demonstrate their expertise in DevOps practices and GCP. Google Cloud Certified - Professional Cloud DevOps Engineer Exam certification is also valuable for organizations that are looking to hire DevOps engineers who can help them streamline their software delivery processes, improve application reliability, and increase operational efficiency using GCP services.

## Google Cloud Certified - Professional Cloud DevOps Engineer Exam Sample Questions (Q104-Q109):

#### NEW QUESTION # 104

You manage an application that is writing logs to Stackdriver Logging. You need to give some team members the ability to export logs. What should you do?

- A. Configure Access Context Manager to allow only these members to export logs.
- **B. Grant the team members the IAM role of logging.configWriter on Cloud IAM.**
- C. Create an Organizational Policy in Cloud IAM to allow only these members to create log exports.
- D. Create and grant a custom IAM role with the permissions logging.sinks.list and logging.sink.get.

**Answer: B**

Explanation:

Explanation/Reference: <https://cloud.google.com/logging/docs/access-control>

#### NEW QUESTION # 105

You are running an application in a virtual machine (VM) using a custom Debian image. The image has the Stackdriver Logging agent installed. The VM has the cloud-platform scope. The application is logging information via syslog. You want to use Stackdriver Logging in the Google Cloud Platform Console to visualize the logs. You notice that syslog is not showing up in the "All logs" dropdown list of the Logs Viewer. What is the first thing you should do?

- **A. SSH to the VM and execute the following commands on your VM: ps ax | grep fluentd**
- B. Install the most recent version of the Stackdriver agent.
- C. Look for the agent's test log entry in the Logs Viewer.
- D. Verify the VM service account access scope includes the monitoring.write scope.

**Answer: A**

#### NEW QUESTION # 106

You support an application running on GCP and want to configure SMS notifications to your team for the most critical alerts in Stackdriver Monitoring. You have already identified the alerting policies you want to configure this for. What should you do?

- A. Select the Webhook notifications option for each alerting policy, and configure it to use a third-party integration tool. Ensure that your team members add their SMS/phone numbers to the external tool.
- B. Configure a Slack notification for each alerting policy. Set up a Slack-to-SMS integration to send SMS messages when Slack messages are received. Ensure that your team members add their SMS/phone numbers to the external integration.
- C. Download and configure a third-party integration between Stackdriver Monitoring and an SMS gateway. Ensure that your team members add their SMS/phone numbers to the external tool.
- **D. Ensure that your team members set their SMS/phone numbers in their Stackdriver Profile. Select the SMS notification option for each alerting policy and then select the appropriate SMS/phone numbers from the list.**

**Answer: D**

#### NEW QUESTION # 107

Your application services run in Google Kubernetes Engine (GKE). You want to make sure that only images from your centrally-managed Google Container Registry (GCR) image registry in the altostrat-images project can be deployed to the cluster while minimizing development time. What should you do?

- A. Add logic to the deployment pipeline to check that all manifests contain only images from gcr.io/altostrat-images.
- **B. Add a tag to each image in gcr.io/altostrat-images and check that this tag is present when the image is deployed.**
- C. Create a custom builder for Cloud Build that will only push images to gcr.io/altostrat-images.
- D. Use a Binary Authorization policy that includes the whitelist name pattern gcr.io/altostrat-images/.

**Answer: B**

#### NEW QUESTION # 108

You are responsible for creating and modifying the Terraform templates that define your Infrastructure. Because two new engineers

will also be working on the same code, you need to define a process and adopt a tool that will prevent you from overwriting each other's code. You also want to ensure that you capture all updates in the latest version. What should you do?

- A. \* Store your code as text files in Google Drive in a defined folder structure that organizes the files.\* At the end of each day, confirm that all changes have been captured in the files within the folder structure and create a new .zip archive with a predefined naming convention.\* Upload the .zip archive to a versioned Cloud Storage bucket and accept it as the latest version.
- B. \* Store your code as text files in Google Drive in a defined folder structure that organizes the files.\* At the end of each day, confirm that all changes have been captured in the files within the folder structure.\* Rename the folder structure with a predefined naming convention that increments the version.
- C. \* Store your code in a Git-based version control system\* Establish a process that includes code reviews by peers and unit testing to ensure integrity and functionality before integration of code.\* Establish a process where the fully integrated code in the repository becomes the latest master version.
- D. \* Store your code in a Git-based version control system\* Establish a process that allows developers to merge their own changes at the end of each day.\* Package and upload code to a versioned Cloud Storage bucket as the latest master version.

**Answer: C**

## NEW QUESTION # 109

.....

With PassExamDumps's Google Professional-Cloud-DevOps-Engineer exam training materials, you can get the latest Google Professional-Cloud-DevOps-Engineer exam questions and answers. It can make you pass the Google Professional-Cloud-DevOps-Engineer exam. Google Professional-Cloud-DevOps-Engineer exam certification can help you to develop your career.
