The client can decide which version of our CIS-SPM exam questions to choose according their hobbies and their practical conditions.

### ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q83-Q88):

#### NEW QUESTION # 83

Which of the following can be used to calculate planned cost when creating a resource plan?  
Choose 2 answers

- A. Demand rate
- B. Default rate
- C. Rate card
- D. Project rate

**Answer: C,D**

Explanation:

According to the ServiceNow documentation<sup>1</sup>, a rate card is a table that defines the hourly cost of labor for different roles or resources. A project rate is a fixed rate that is applied to all resources assigned to a project, regardless of their roles or individual rates. Both of these can be used to calculate the planned cost of a resource plan by multiplying the hours allocated to each resource by the corresponding rate. The other options are incorrect because:

A . Demand rate: A demand rate is a rate that is applied to a demand, not a resource plan. It is used to estimate the cost of fulfilling a demand before it is converted into a project<sup>2</sup>.

C . Default rate: A default rate is a rate that is applied to a resource when no other rate is specified. It is not a valid option for calculating the planned cost of a resource plan, as it is only used as a fallback option<sup>3</sup>.

1: [https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/resource-management/concept/c\\_RateCards.html](https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/resource-management/concept/c_RateCards.html) 2: [https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/demand-management/concept/c\\_DemandRate.html](https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/demand-management/concept/c_DemandRate.html) 3: [https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/resource-management/concept/c\\_DefaultRate.html](https://docs.servicenow.com/bundle/vancouver-it-business-management/page/product/resource-management/concept/c_DefaultRate.html)

#### NEW QUESTION # 84

Which colors are used as indicators of project health in a project status report?  
Choose 3 answers

- A. Blue
- B. Green
- C. Red
- D. Orange
- E. Yellow

**Answer: B,C,E**

#### NEW QUESTION # 85

Which role can configure the parameters of the demand workbench that is provided with the base system?

- A. `it_pps_admin`.
- B. `it_project_manager`.
- C. `business_stakeholder`.

- D. All roles.

**Answer: A**

Explanation:

According to the Demand Workbench document, the role that can configure the parameters of the demand workbench that is provided with the base system is `it_pps_admin`. This role grants access to the Project Portfolio Suite application and allows the user to configure the demand workbench settings, such as the axes, the quadrants, the bubble size, and the color. The other options are not correct, as they are not roles that can configure the parameters of the demand workbench. The all roles option is too broad and does not specify a particular role. The `business_stakeholder` role grants access to the Business Stakeholder Portal and allows the user to view and submit demands. The `it_project_manager` role grants access to the Project Portfolio Management application and allows the user to create and update projects.

#### NEW QUESTION # 86

What is the formula for Committed Utilization?

- A.  $(\text{Allocated Hours} + \text{Confirmed Hours}) / \text{Capacity}$
- B.  $\text{Assigned Hours} / \text{Capacity}$
- C.  $\text{Allocated Hours} / \text{Capacity}$
- **D.  $\text{Confirmed Hours} / \text{Capacity}$**

**Answer: D**

#### NEW QUESTION # 87

The color band at the top of the project card in Project Workspace displays what project attribute?

- A. Issues
- B. Risk
- **C. Status**
- D. State

**Answer: C**

Explanation:

Explanation

According to the ServiceNow documentation<sup>1</sup>, the color band at the top of the project card in Project Workspace displays the project status. The project status is a calculated field that indicates the health of the project based on the schedule, cost, and scope variance. The color band can be green, yellow, or red, depending on the status value. The other options are incorrect because:  
 B: Risk: The risk is a potential problem that could affect the project or its outcome. The risk level is displayed as a circle icon on the project card, not as a color band<sup>2</sup>.

C: State: The state is the current phase of the project, such as Draft, Planning, Work in Progress, or Closed. The state is displayed as a text field on the project card, not as a color band<sup>3</sup>.

D: Issues: The issues are the actual problems that affect the project or its outcome. The number of issues is displayed as a badge icon on the project card, not as a color band<sup>4</sup>.
