

# 2026 CDCS Exam Online | Pass-Sure EXIN EPI Certified Data Centre Specialist 100% Free Free Pdf Guide

P.S. Free 2026 EXIN CDCS dumps are available on Google Drive shared by ActualVCE: <https://drive.google.com/open?id=1NWarY2aXjYjGPegR3s67BiFbPK8rXG9h>

We have professional technicians to check the website at times, therefore we can provide you with a clean and safe shopping environment if you buy CDCS training materials. In addition, we have free demo for you before purchasing, so that you can have a better understanding of what you are going to buying. Free update for 365 days is available, and you can get the latest information for the CDCS Exam Dumps without spending extra money. We have online and offline chat service stuff, and they possess the professional knowledge for the CDCS training materials, if you have any questions, just contact us.

Are you looking for the best way to get EXIN CDCS certified and advance your career? The CDCS Dumps PDF of the ActualVCE is the perfect choice for you. Cracking the CDCS test for the EXIN CDCS Certification can be a daunting process, but with the help of our CDCS preparation material, you'll be able to achieve the EXIN CDCS certification you're looking for.

## EXIN CDCS Exam Online | Amazing Pass Rate For Your CDCS: EXIN EPI Certified Data Centre Specialist | CDCS Free Pdf Guide

Taking the EXIN EPI Certified Data Centre Specialist CDCS test and beginning EXIN EPI Certified Data Centre Specialist CDCS exam preparation with the suggested CDCS exam preparation materials is the best and quickest course of action. You can rely on EXIN CDCS Exam Questio EXIN EPI Certified Data Centre Specialist CDCS for thorough CDCS exam preparation.

### EXIN EPI Certified Data Centre Specialist Sample Questions (Q57-Q62):

#### NEW QUESTION # 57

What is the first step in the design stage of the data center life cycle?

- A. Select vendors
- B. Do a design validation
- C. Freeze the design
- D. Define the scope of the project

**Answer: D**

Explanation:

The life cycle begins with planning and design. The very first step is to clearly define the project scope: business requirements, capacity, availability targets, compliance standards, and budget. Without scope definition, design validation or vendor selection would be premature.

- \* Vendor selection (A) happens much later during procurement.
- \* Validation (B) occurs after conceptual and detailed designs are prepared.
- \* Freezing design (D) is the final stage before implementation.

Therefore, defining the project scope is the correct initial step.

References: ANSI/TIA-942-B Annex F (Lifecycle), ISO/IEC 30182 (Smart City & DC Lifecycle), PMI PMBOK (Scope Definition).

#### NEW QUESTION # 58

FM-200 is phasing out as a halocarbon gas and management has decided to replace this with the more environmentally friendly Novec-1230 gas. Should you use exactly the same formula and parameters to calculate the gas content for the Novec-1230 gas?

- A. Yes, if you take the difference between the net and gross volume into account
- **B. Yes, if you change the S-factor of the formula to reflect the gas type used**
- C. Yes, as long as you use the same units of measure (kg/m<sup>3</sup> or lbs/ft<sup>3</sup>)
- D. Yes, as long as the temperature in the computer room has not changed

**Answer: B**

Explanation:

Halocarbon agents such as FM-200 (HFC-227ea) and Novec-1230 (FK-5-1-12) are both defined under NFPA 2001 and ISO 14520 as clean agents, but their required design concentrations and physical properties differ.

When calculating agent quantity, the minimum extinguishing concentration (MEC) and safety factor (S) must be taken into account. The S-factor is specific to each agent and reflects differences in molecular weight, density, and flame suppression chemistry.

For Novec-1230, the required design concentration is generally lower than for FM-200 (around 4.5-6% vs. 7-9%), but the calculation formula is the same except for substituting the correct S-factor. Therefore, you cannot reuse the exact formula parameters from FM-200; you must change the S-factor and apply Novec-1230's physical constants.

This ensures compliance with NFPA 2001 Annex C, which provides correction formulas for room volume, temperature, and specific agent type. Using the wrong S-factor could result in underfilling or overfilling, compromising fire safety or increasing cost unnecessarily.

References: NFPA 2001 §5.4 (Agent Quantity), ISO 14520-5 (FK-5-1-12 properties), EXIN DCS Study Guide: Fire Suppression.

### NEW QUESTION # 59

The building requires sprinklers and is equipped with a wet-pipe system. What action should you recommend for the computer room?

- A. Replace the wet-pipe system with a dry-pipe system
- B. Maintain the current wet-pipe system
- **C. Replace the wet-pipe system with a pre-action system**
- D. Replace the wet-pipe system with a deluge system

**Answer: C**

Explanation:

NFPA 75 (IT equipment rooms) recommends pre-action sprinklers for data processing spaces to minimize accidental water discharge risk; wet-pipe is generally discouraged directly over IT hardware.

References: NFPA 75 §5.4 (Water-based fire protection), NFPA 13 (sprinkler system types).

### NEW QUESTION # 60

An MCB needs to be installed in the PDU of an ICT rack. Which breaking curve should you select?

- A. A-Curve
- B. B-Curve
- **C. C-Curve**
- D. D-Curve

**Answer: C**

Explanation:

MCBs (Miniature Circuit Breakers) are characterized by their tripping curves:

\* B-Curve: Trips at 3-5 × rated current; suitable for resistive loads.

\* C-Curve: Trips at 5-10 × rated current; suitable for mixed loads including ICT equipment with moderate inrush current.

\* D-Curve: Trips at 10-20 × rated current; used for heavy inductive loads like motors.

\* A-Curve: Very sensitive, rarely used outside specialty electronics.

Since ICT equipment like servers and network devices have moderate inrush currents (from power supplies), the recommended breaker is C-Curve. It balances protection against nuisance tripping while still ensuring fault clearance.

References: IEC 60898-1 (Circuit Breakers for Overcurrent Protection), IEC 60947-2 (LV Breakers), EXIN DCS study material: Electrical Distribution.

### NEW QUESTION # 61

A new facility requires electrical distribution of 100A to be installed in the computer room, 1 m (3 ft) above sensitive IT equipment. What type of system minimizes EMF impact?

- A. Install single-phase power cabling
- B. Install three-phase power cabling based on three individual core wires
- C. Install bus bar trunking
- **D. Install three-phase power cabling based on a combined cable (e.g., XLPE)**

**Answer: D**

Explanation:

Electromagnetic fields are generated by current-carrying conductors. To minimize stray EMF, phase conductors should be physically close and balanced. A three-phase combined cable (all phase conductors and neutral in one sheath) ensures magnetic fields cancel each other due to phase opposition.

If phases are run separately (answer B), the separation increases loop area and magnetic field leakage. Single-phase cabling (A) is even worse because current does not balance across three phases. Bus bar trunking (C) provides physical support but often separates conductors, which may worsen EMF if not specifically shielded.

Therefore, the correct solution is three-phase combined cable (often XLPE-insulated). This design reduces EMF impact to within ANSI/TIA-942 and IEEE recommendations.

References: IEEE Std 141 (Red Book - Power Distribution), ANSI/TIA-942-B §6.6.4, IEC 60364 (Wiring Systems and EMF).

### NEW QUESTION # 62

.....

Owing to the industrious dedication of our experts and other working staff, our CDCS study materials grow to be more mature and are able to fight against any difficulties. Our CDCS preparation exam have achieved high pass rate in the industry, and we always maintain a 99% pass rate with our endless efforts. We have to admit that behind such a starling figure, there embrace mass investments from our company on our CDCS learning quiz. But it is all worth that as the high pass rate can make sure our customers pass the exam by the best percentage.
