Latest Brindumps 1Z0-1163-1 Ppt & New 1Z0-1163-1 Test Prep

It is important to mention here that the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 practice questions played important role in their Oracle 1Z0-1163-1 Exams preparation and their success. So we can say that with the Oracle 1Z0-

1163-1 exam questions you will get everything that you need to learn, prepare and pass the difficult Oracle 1Z0-1163-1 exam with good scores. The It-Tests 1Z0-1163-1 Exam Questions are designed and verified by experienced and qualified Oracle 1Z0-1163-1 exam trainers. They work together and share their expertise to maintain the top standard of Oracle 1Z0-1163-1 exam practice test. So you can get trust on Oracle 1Z0-1163-1 exam questions and start preparing today.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 2	<ul style="list-style-type: none"> Oracle Cloud Applications and Oracle Modern Best Practice (OMB): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Topic 3	<ul style="list-style-type: none"> OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Topic 4	<ul style="list-style-type: none"> OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Topic 5	<ul style="list-style-type: none"> OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Topic 6	<ul style="list-style-type: none"> OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Topic 7	<ul style="list-style-type: none"> OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q32-Q37):

NEW QUESTION # 32

What is the role of automation in creating POs from contract fulfillment in Oracle Fusion Cloud Procurement?

- A. It ensures that POs are created accurately based on contract terms, reducing manual errors, and improving efficiency.
- B. It facilitates the approval process by routing POs to the appropriate approvers, based on invoice rules and limits.
- C. It enhances supplier qualification by providing visibility into supplier responses.

Answer: A

Explanation:

In Oracle Fusion Cloud Procurement, automation plays a critical role in creating purchase orders (POs) from contract fulfillment by ensuring that POs are generated directly from agreed contract terms with high accuracy and minimal manual intervention. This process leverages predefined contract data-such as item details, pricing, quantities, and delivery schedules-to populate POs automatically, reducing errors like incorrect pricing or quantities that often occur in manual entry. For instance, if a contract specifies 100 units of a product at \$10 each, automation ensures the PO reflects this exactly, bypassing the need for manual rekeying. Option A is incorrect because routing POs for approval is a subsequent step, not the primary role of automation in PO creation. Option C is unrelated, as supplier qualification pertains to evaluating suppliers, not PO generation. This automation improves efficiency by speeding up the procurement cycle, ensures compliance with contract terms, and frees procurement staff to focus on strategic tasks rather than clerical work. It also integrates with supplier collaboration tools to confirm details, further enhancing accuracy.

NEW QUESTION # 33

Which function does the Global Order Promising component serve in Oracle Fusion Cloud SCM?

- **A. It provides real-time order promising based on supply and demand constraints.**
- B. It focuses only on local supplier availability.
- C. It guarantees order fulfillment within 24 hours.

Answer: A

Explanation:

Global Order Promising (GOP) in Oracle Fusion Cloud SCM provides real-time order promising by evaluating supply and demand constraints across the enterprise, ensuring accurate delivery commitments. Option A is incorrect as GOP considers global, not just local, availability. Option C is false-it doesn't guarantee a 24-hour fulfillment but provides feasible timelines. This enhances customer satisfaction and planning accuracy.

NEW QUESTION # 34

Which feature in Oracle Fusion Cloud SCM ensures product availability commitments based on inventory and supply constraints?

- **A. Available to Promise (ATP).**
- B. Cost Accounting.
- C. Manufacturing Execution.
- D. Supplier Portal.

Answer: A

Explanation:

Available to Promise (ATP) (C) in Oracle Fusion Cloud SCM ensures product availability commitments by calculating how much inventory is available for new orders based on current stock and supply constraints like production schedules and supplier lead times. For example, if 100 units are on hand with 40 committed, ATP shows 60 units available, ensuring accurate promises. Option A (Cost Accounting) tracks financials, not availability. Option B (Supplier Portal) supports collaboration, not direct commitment calculations. Option D (Manufacturing Execution) manages production, not order promising. ATP's real-time analysis prevents overpromising, aligning customer expectations with operational capacity.

NEW QUESTION # 35

Which feature in Oracle Fusion Cloud SCM ensures optimal inventory levels by predicting demand and adjusting supply plans?

- A. Supplier Qualification.
- B. Cost Accounting.
- **C. Replenishment Planning.**
- D. Manufacturing Execution.

Answer: C

Explanation:

Replenishment Planning (C) in Oracle Fusion Cloud SCM ensures optimal inventory levels by predicting demand and adjusting

supply plans proactively. Using forecasts-e.g., expecting 300 units next month-it triggers replenishments to maintain stock (e.g., ordering 250 units when levels hit 50), avoiding overstock or shortages. Option A (Cost Accounting) tracks costs, not inventory levels. Option B (Supplier Qualification) evaluates suppliers, not stock planning. Option D (Manufacturing Execution) manages production, not replenishment. This feature balances cost and availability, reducing waste (e.g., \$5,000 in excess stock) and ensuring service continuity.

NEW QUESTION # 36

Which process in Oracle Fusion Cloud SCM ensures that inventory levels are maintained efficiently?

- A. Supplier Qualification.
- B. Cost Accounting.
- C. Replenishment Planning.
- D. Manufacturing Execution.

Answer: C

Explanation:

Replenishment Planning (D) in Oracle Fusion Cloud SCM ensures inventory levels are maintained efficiently by predicting demand and adjusting supply plans to replenish stock proactively. It uses forecasts and safety stock rules-e.g., ordering 300 units when stock falls to 50 and demand is expected to rise-to prevent shortages or excess inventory. Option A (Supplier Qualification) focuses on supplier evaluation, not inventory maintenance. Option B (Cost Accounting) tracks financials, not stock levels. Option C (Manufacturing Execution) manages production, not replenishment. Replenishment Planning optimizes inventory turnover, reduces carrying costs, and ensures product availability, making it a proactive inventory management tool.

NEW QUESTION # 37

.....

In addition, a 24/7 customer assistance is also available at 1Z0-1163-1 to assist you in using the product during any technical hitch. In summary, getting ready for 60 certification test might be challenging, but with the appropriate strategy and our 1Z0-1163-1 Actual Exam questions, you can clear the test in a short time.
