Salesforce Certified Development Lifecycle and Deployment Architect certification exam is designed to test the knowledge and skills required to design and manage the development lifecycle and deployment architecture of Salesforce applications.

## **Salesforce Certified Development Lifecycle and Deployment Architect Sample Questions (Q88-Q93):**

### **NEW QUESTION # 88**

Universal Containers (UC) is embarking on a large program of work, with different projects and different vendors. UC created a center of excellence (COE) that is struggling with scope creep between the different projects.

What role should the architect suggest be added to the COE?

- **A. Scrum master**
- B. Product owner
- C. Release managers
- D. Change managers

**Answer: A**

### **NEW QUESTION # 89**

Universal Containers (UC) is a large enterprise with a complex system landscape. UC is currently rolling out new infrastructure and strategies around Salesforce DevOps. Some of the key feature's UC is looking to support is rollback of metadata after a deployment, and the backup and restore of data to help recover from deployment issues, system bugs, or outages in their downstream systems.

Regulations in the industry mean that UC must be able to provide strategies to recover and rollback from issues. The regulator has discovered UC is not currently providing these, and must do so as soon as possible to remain compliant.

What should an architect advise?

- A. Custom build a feature rollback and data restore tool for Salesforce
- B. Salesforce backs up all data and will restore it for customers on request.
- **C. Evaluate third-party and AppExchange products.**
- D. Advise stakeholders that rollback is not possible for Salesforce.

**Answer: C**

### **NEW QUESTION # 90**

Universal Containers has five development teams. The performance of the teams has been good, but the number of bugs has been increasing. After each sprint, they need more time to understand the code and make changes.

What are two ways to improve the performance?

Choose 2 answers

- **A. Define and follow code standards.**
- **B. Sprint review process.**
- C. Define a team that will analyze/approve all changes.
- D. Version control system to identify who is generating the bugs.

**Answer: A,B**

### **NEW QUESTION # 91**

Universal Containers (UC) is developing a new Customer Community. Requirements for the Community are not fully defined. UC is planning on using an Agile methodology for this work and has promised delivery of the complete system in three months. What are two risks associated with this approach? Choose 2 answers

- A. Agile is not an appropriate development methodology for Customer Community implementations
- B. The functionality that can be delivered in 3 months is unknown, and may not meet the needs of the business
- C. Agile does not allow for changes to requirements, so customers might not like the resulting solution
- D. Given the lack of requirements and the three-month timeline commitment, the project may not be feasible

**Answer: B,D**

Explanation:

Explanation

Developing a new Customer Community with an Agile methodology and a three-month timeline poses some risks, such as the functionality that can be delivered in 3 months is unknown, and may not meet the needs of the business, and given the lack of requirements and the three-month timeline commitment, the project may not be feasible. Agile is an appropriate development methodology for Customer Community implementations, as it allows for iterative and incremental delivery of value. Agile also allows for changes to requirements, so customers can provide feedback and prioritize the most important features.

## NEW QUESTION # 92

Northern Trail Outfitters (NTO) recently acquired Eastern Trail Outfitters (ETO). NTO's sales leadership team had hands-on experience with the ETO's Sales Optimization app and have given the feedback that the app would benefit NTO's sales team. Which option should the architect recommend for having ETO's Sales Optimization app in NTO's Salesforce org in the shortest possible time?

- A. Create a managed package of the app and deploy in NTO's org
- B. Create a core team and build the Sales Optimization app in NTO's org
- C. Create an unmanaged package of the app and deploy in NTO's org
- D. Create users in ETO's org and provide access to NTO's sales team

**Answer: D**

## NEW QUESTION # 93

.....
