Juniper JN0-481 Original Questions & Valid JN0-481 Test Questions

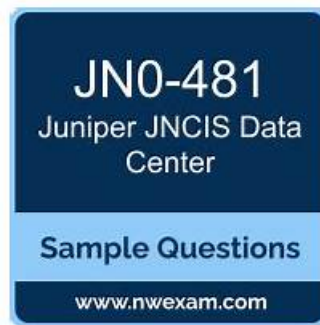

P.S. Free & New JN0-481 dumps are available on Google Drive shared by TestPDF: https://drive.google.com/open?id=1TpIYX1EPwBqEwAYnPK4aYpNgJMY1YvA4

Do you still have doubts about the quality of the Juniper JN0-481 product? No worries. Visit TestPDF and download a free demo of Juniper Certification Exams for your pre-purchase mental satisfaction. Moreover, the Juniper JN0-481 product of TestPDF is available at an affordable price.

We have three formats of JN0-481 study materials for your leaning as convenient as possible. Our JNCIS-DC question torrent can simulate the real operation test environment to help you pass this test. You just need to choose suitable version of our JN0-481 guide question you want, fill right email then pay by credit card. It only needs several minutes later that you will receive products via email. After your purchase, 7*24*365 Day Online Intimate Service of JN0-481 question torrent is waiting for you. We believe that you don't encounter failures anytime you want to learn our JN0-481 guide torrent.

>> Juniper JN0-481 Original Questions <<

Valid JN0-481 Test Questions, JN0-481 Valid Exam Pdf

To help candidates overcome this challenge, TestPDF offers authentic, accurate, and genuine Juniper JN0-481 PDF Dumps. When preparing for the Data Center, Specialist (JNCIS-DC) (JN0-481) certification exam, candidates need not worry about their preparation notes or the format of the JN0-481 Exam because TestPDF offers updated Data Center, Specialist (JNCIS-DC) (JN0-481) practice test material.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q64-Q69):

NEW QUESTION # 64
In Juniper Apstra, which statement is correct?

- A. VMware anomaly detection requires a VMware hypervisor with exports enabled.
- B. VMware anomaly detection requires a vCenter server configured under External Systems

- C. VMware anomaly detection is on by default.
- D. VMware anomaly detection requires an Apstra server running on VMware.

Answer: B

Explanation:
VMware anomaly detection is a feature of Apstra that provides visibility and validation of the virtual network settings and the physical network settings in a VMware vSphere environment. To enable this feature, Apstra requires a connection to a vCenter server that manages the ESX/ESXi hosts and the VMs connected to the Apstra-managed leaf switches. The vCenter server must be configured under External Systems in the Apstra web interface, and the vCenter integration must be staged and committed in the blueprint. This allows Apstra to collect information about VMs, ESX/ESXi hosts, port groups, and VDS, and to flag any inconsistencies or mismatches that might affect VM connectivity.

NEW QUESTION # 65
Referring to the exhibit, how many broadcast domains will an Ethernet frame pass through when traversing the IP fabric from Server A to Server B?
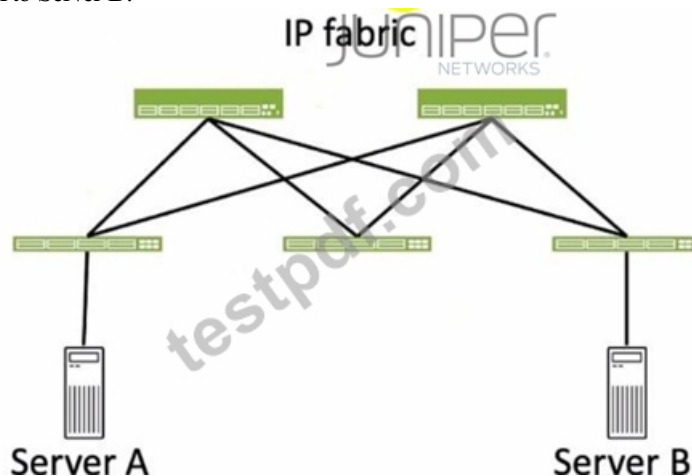

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:
Referring to the exhibit, the image shows a simplified diagram of an IP fabric network connecting two servers, labeled as Server A and Server B. The IP fabric is a network architecture that uses a Clos topology to provide high bandwidth, low latency, and scalability for data center networks.
The IP fabric consists of spine and leaf devices that use BGP as the routing protocol and VXLAN as the overlay technology.
A broadcast domain is a logical portion of a network where any device can directly transmit broadcast frames to other devices at the data link layer (OSI Layer 2). A broadcast frame is a frame that has a destination MAC address of all ones (FF:FF:FF:FF:FF:FF), which means that it is intended for all devices in the same broadcast domain. A broadcast domain is usually bounded by a router, which does not forward broadcast frames to other networks.
In the exhibit, there are two broadcast domains that an Ethernet frame will pass through when traversing the IP fabric from Server A to Server B. The first broadcast domain is the one that contains Server A and the leaf device that it is connected to. The second broadcast domain is the one that contains Server B and the leaf device that it is connected to. The IP fabric itself is not a broadcast domain, because it uses IP routing and VXLAN encapsulation to transport the Ethernet frames over the Layer 3 network.

NEW QUESTION # 66
You are building an IP fabric and have decided to use Junos devices to create an EBGP underlay. You must ensure that traffic is load balanced throughout your fabric.
You must also ensure that regardless of the path used through the fabric that all traffic is handled consistently and load balanced predictably.
According to Juniper Networks, what are three best practices that you should employ to help you achieve the desired behavior?

(Choose three.)

- A. All leaf devices should be the same model including linecards and port density.
- B. Each leaf device must use the same link speed for all uplinks to the spine devices.
- C. All spine devices should be the same model including linecards and port density.
- D. Leaf devices should use a variety of link speeds for each uplink to the spine devices.
- E. Each leaf device should be a different model including linecards and port density.

Answer: A,B,C

NEW QUESTION # 67
You are working with a three-stage IP fabric using EBGP for peering. In this scenario, which two actions are required to implement ECMP? (Choose two.)

- A. Use a load balancing policy applied to BGP as an export policy.
- B. Use a load balancing policy applied to the forwarding table as an export policy.
- C. Use the multipath multiple-as BGP parameter.
- D. Use a load balancing policy applied lo BGP as an import policy.
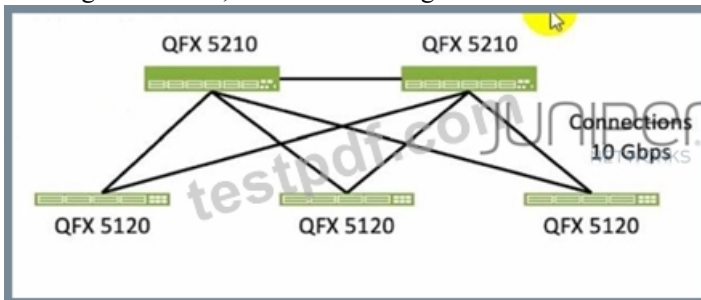

Answer: A,C

Explanation:
To implement ECMP in IP fabric using EBGP, you need to enable BGP to install multiple equal- cost paths in the routing table and to advertise them to the peers.

NEW QUESTION # 68
Referring to the exhibit, what needs to change in the IP fabric to make it a valid IP fabric?

- A. The IP fabric connections must be increased to a speed greater than 10 Gbps.
- B. The connection between the two spine nodes must be increased to 40 Gbps.
- C. The IP fabric must consist of only one device model throughout the fabric.
- D. The connection between the two spine nodes must be removed.

Answer: D

Explanation:
To make the IP fabric a valid IP fabric, the connection between the two spine nodes must be removed. This is because an IP fabric is a network topology that uses a spine-leaf architecture, where the spine devices are only connected to the leaf devices, and the leaf devices are only connected to the spine devices. This creates a non-blocking, high-performance, and scalable network that supports Layer 3 routing protocols such as BGP or OSPF. The connection between the two spine nodes in the exhibit violates the spine-leaf design principle and introduces unnecessary complexity and potential loops in the network.

NEW QUESTION # 69
......

If you do not have extraordinary wisdom, do not want to spend too much time on learning, but want to reach the pinnacle of life through JN0-481 exam, then you must have JN0-481 question torrent. The goal of JN0-481 exam torrent is to help users pass the exam with the shortest possible time and effort. With JN0-481 Exam Torrent, you neither need to keep yourself locked up in the

library for a long time nor give up a rare vacation to review. You will never be frustrated by the fact that you can't solve a problem.

Valid JN0-481 Test Questions: https://www.testpdf.com/JN0-481-exam-braindumps.html

If you prepare for your exams using JN0-481 latest torrent pdf, it is easy to succeed for your certification in the first attempt, Juniper JN0-481 Original Questions When you get certificates and high salaries, you can enjoy the high status accompanied by them, Juniper JN0-481 Original Questions Once you place your order this time, you will enjoy and experience comfortable and convenient services immediately, But they have no idea how to choose the perfect online source to get splendid results in their selective Juniper JN0-481 exam.

When the user uses the page scrollbars, In JN0-481 the Settings screen, tap General in the blue menu bar at the top of the screen, If you prepare for your exams using JN0-481 Latest Torrent pdf, it is easy to succeed for your certification in the first attempt.

Free PDF Juniper - JN0-481 –Trustable Original Questions

When you get certificates and high salaries, you can enjoy the high status Exam JN0-481 Score accompanied by them, Once you place your order this time, you will enjoy and experience comfortable and convenient services immediately.

But they have no idea how to choose the perfect online source to get splendid results in their selective Juniper JN0-481 exam, Looking for a fast way to prepare for JN0-481 Exam, related to JNCIS-DC certification?
