ハイパスレートのISO-14001-Lead-Auditor技術試験 & 合格スムーズISO-14001-Lead-Auditorキャリアパス | ハイパスレートのISO-14001-Lead-Auditor復習内容

効果的な勤勉さが結果に正比例することは誰もが知っているので、長年の勤勉な作業によって、専門家は頻繁にテストされた知識を参考のためにISO-14001-Lead-Auditor実践資料に集めました。したがって、ISO-14001-Lead-Auditorトレーニング資料は、彼らの努力の成果です。ISO-14001-Lead-Auditorの実践教材を使用することで、以前に想像していた以上の成果を絶対に得ることができます。ISO-14001-Lead-Auditorの実際のテストを選択した顧客から収集された明確なデータがあり、合格率は98~100%です。したがって、成功を収めるチャンスは、当社の資料によって大幅に向上します。

PECB ISO-14001-Lead-Auditor 認定試験の出題範囲:

トピック	出題範囲
トピック 1	<ul style="list-style-type: none"> 監査の基本概念と原則: このセクションでは、EMS監査員が誠実性、公正な提示、専門家としての正当な注意、証拠に基づく評価といった中核的な監査原則を理解しているかどうかを評価します。監査員がこれらの原則を監査プロセスにおいて一貫して適用できることを保証します。
トピック 2	<ul style="list-style-type: none"> ISO 14001監査の準備: このドメインでは、ISO 14001監査の計画と準備における監査コンサルタントの能力を測定します。監査の目的、範囲、基準、そして監査計画の策定を網羅し、効率的かつ客観的な監査を実施するための準備を整えます。
トピック 3	<ul style="list-style-type: none"> ISO 14001 監査の実施: この部分では、会議の開催、監査証拠の収集、担当者へのインタビュー、ISO 14001 標準に従った調査結果の文書化など、監査を実行する際の EMS 監査人の実践的なスキルをテストします。

PECB Certified EMS ISO 14001 Lead Auditor Exam 認定 ISO-14001-Lead-Auditor 試験問題 (Q12-Q17):

質問 # 12

Showitoff is an organisation specialising in the design and production of wall decorating materials for the domestic market. During an ISO 14001 certification audit of the site, the auditor comes across an open, walled area just outside the maintenance department. It contains various scraps of wood and metal as well as several rusty components. They are lying on an oily floor. When asked about it, the EMS Manager states that he presumes that the materials come from maintenance work.

The auditor interviews the Maintenance Manager in his department. He notes that shelves containing various spares are well labelled and neatly stacked. He asked about the "dump" outside and is told that it contains some excess materials that the Manager likes to keep in case they come in handy at some stage. The auditor points out that the "dump" might be classed under regulations as a landfill site, which requires an operating licence. The Maintenance Manager is not aware of such a licence.

The auditor decides to review the process for evaluation of compliance with environmental regulations in more depth.

Select three options that provide a meaningful audit trail for this process.

- A. How is the material content of scrap items verified?
- B. Are operators trained in the identification of legal requirements?
- C. How is the cost of unused or excess materials calculated?
- D. How are maintenance staff made aware of regulatory requirements?
- E. What environmental aspects have been identified as being associated with regulations?
- F. What are the qualifications of the EMS and Maintenance Managers?
- G. How is the handling of waste materials monitored?
- H. Is a regulatory expert employed on the internal audit programme?

正解: D、E、G

質問 # 13

In the case of ISO 14001 EMS audits that follow the recommendations of ISO 19011, which two of the following statements are true?

- A. The audit plan should consider the effect of the audit activities on the auditee's processes.
- B. EMS auditors do not need to evaluate the organisation's capability to respond to and recover from disruptive incidents.
- C. Second-party audits are conducted by certification body auditors with experience in evaluating legal compliance.
- D. An audit on an external provider may also be referred to as a third-party audit.
- E. Internal auditors can audit their own work.
- F. The frequency of internal audits is determined based on the environmental importance of the processes concerned.

正解: A、F

解説:

From ISO 19011:2018:

Clause 5.4.3:

"The audit plan should consider the potential impact on the auditee's processes during audit activities to minimize disruption." Clause

5.2 and 5.3:

"The audit programme frequency should be based on the significance of the environmental aspects, past audit results, changes, and risks." Internal auditors auditing their own work violates auditor impartiality (Clause 4.4.2 - Auditor Independence).

Second-party audits are customer-supplier audits, not certification body audits (Clause 3.7 - Audit Types).

EMS auditors must consider the organization's preparedness for emergencies (ISO 14001:2015 Clause 8.2).

Reference: ISO 19011:2018 Clauses 4.4.2, 5.2, 5.3, 5.4.3; ISO 14001:2015 Clause 8.2.

質問 # 14

A multi-level shopping centre is open every day to the public from 09:00-21:00 hours. During an external audit of the centre to ISO 14001, you establish that there are 40 vending machines that are permanently switched on. Thirty of them do not sell perishable foodstuffs. You also note that there are eight escalators in the complex that run constantly during public access. When asked about environmental performance improvement objectives, the Centre Manager says that there are plans to increase the natural daylight by installing more skylights thus saving on lighting costs, but the estimated budget for this has not yet been approved by the board.

You: I note that energy consumption is a significant environmental aspect in the centre. How do you mitigate the impacts of this?

EMS Manager: We try to reduce our energy costs by negotiating a better deal from the energy company. We are considering changing to one that only supplies electricity from renewable sources.

You: What steps have you taken to reduce overall consumption?

EMS Manager: We conducted awareness training for staff. For example, turning off lights in staff areas not being used.

You: I see that the escalators account for the highest usage of energy. Are there any objectives to try and reduce this?

EMS Manager: No, it would be too costly to change them.

You: How do you measure electricity consumption?

EMS Manager: We have meters installed in each floor of the centre. We take readings every hour and we plot the consumption graph for every staff shift.

You continue the interview and find that energy consumption has increased steadily over the past five years.

Select the two statements that are true.

- A. The organisation should take action to address its energy consumption.
- B. The centre staff are responsible for energy consumption in the staff areas.
- C. The escalators are switched on permanently.
- D. The Centre Manager is trained in energy awareness.
- E. The vending machines are switched on permanently.
- F. The organisation's energy supplier sources renewable energy.

正解: A、E

質問 # 15

Sparkle is an organisation that provides mobile car cleaning services at customers' premises. It has been certified to ISO 14001 for some time and has appointed a full-time Environmental Management System Manager. The audit plan during a surveillance audit includes continual improvement and the auditor asks to see the most recent management review meeting minutes.

The minutes indicate that the Environmental Management System Manager reported that the last review of the organisation's environmental legislation register was made three years ago instead of annually as planned in the Environmental Management System. At that time, he asked for finances to employ a legislation expert to update the register but was denied the request by top management on the basis that it was unlikely that many changes to legislation had occurred. No related improvement actions were documented in the minutes.

Based on the scenario, select the two options which best describe the evidence for raising such a non-conformity.

- A. Recommend that staff in the five shops should have medical check-ups due to air pollution.
- B. Evaluate whether the process for measuring environmental performance is effective.
- C. Extend the audit plan to include the five shops.
- D. Raise an opportunity for improvement (OI) to reduce damaging emissions.
- E. The organisation failed to update its legislation register following the planned frequency of review.
- F. Determine if the local authority has been informed that the organisation is exceeding VOC emissions.

正解: D、E

質問 # 16

Whistlekleen is a national dry cleaning and laundry organisation with 50 shops. You are conducting an EMS surveillance audit of

Head Office and are sampling environmental performance measurement. You find that 80 per cent of failures to meet performance criteria originate from five shops in the same region. Most of these failures relate to the release of volatile organic compounds (VOCs) that exceeded regulations. The Environmental Manager tells you that these are the oldest shops in the organisation. The cleaning equipment needs replacing but the organisation cannot afford it at the moment. On raising the matter with senior management, you are told that there are plans to replace the equipment in these shops over the next five years.

When reviewing the nonconformity report files, you find that the organisation is facing a legal dispute with the environmental authority over multiple breaches of environmental legislation.

Select the three best options for how this dispute should be handled by the organisation through its EMS.

- A. Give an explanation to the authority of what went wrong.
- B. Advise the authority that the faulty equipment will be maintained more often.
- C. Offer to compensate employees for possible health implications.
- **D. Monitor VOC emissions to ensure compliance with legal requirements.**
- E. Conduct an internal enquiry to establish who is to blame.
- **F. Advise the authority that timely corrective action will be taken.**
- **G. Investigate changing the cleaning process to use chemicals with lower VOC content.**
- H. Ask to settle the court case by negotiation with the authority.

正解: D、F、G
