All these three NCLEX-RN exam Dumps formats are ready for download. Just choose the best NCLEX NCLEX-RN Certification Exams format that suits your budget and assist you in NCLEX NCLEX-RN exam preparation and start NCLEX-RN exam preparation today.

Passing the NCLEX-RN Exam is a critical step towards becoming a licensed registered nurse. In addition to passing the exam, nurses must also meet other requirements for licensure, such as completing a nursing program and passing a criminal background check. Once licensed, nurses must also fulfill continuing education requirements to maintain their license and stay up-to-date on the latest developments in nursing practice.

With a high pass rate as 98% to 100%, our NCLEX-RN training questions can help you achieve your dream easily.

NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q96-Q101):

NEW QUESTION # 96

A six-month-old infant has been admitted to the emergency room with febrile seizures. In the teaching of the parents, the nurse states that:

- A. There is little risk of neurological deficit and mental retardation as sequelae to febrile seizures
- B. Febrile seizures are associated with diseases of the central nervous system
- C. Sustained temperature elevation over 103F is generally related to febrile seizures

- D. Febrile seizures do not usually recur

Answer: A

Explanation:

Explanation

(A) The temperature elevation related to febrile seizures generally exceeds 101F, and seizures occur during the temperature rise rather than after a prolonged elevation. (B) Febrile seizures may recur and are more likely to do so when the first seizure occurs in the 1st year of life. (C) There is little risk of neurological deficit, mental retardation, or altered behavior secondary to febrile seizures. (D) Febrile seizures are associated with disease of the central nervous system.

NEW QUESTION # 97

In teaching the client about proper umbilical cord care, the nurse recommends that:

- A. The area be cleansed at diaper changes with alcohol and inspected for redness or drainage
- B. Petrolatum be placed around the cord after the sponge bath
- C. The cord clamp be left on until the cord stump separates
- D. A belly binder be applied to prevent umbilical hernia

Answer: A

Explanation:

(A) Petrolatum does not allow the cord to dry and will encourage infection. (B) Belly binders do not facilitate drying of the cord and will encourage abdominal relaxation. (C) Frequent applications of alcohol will facilitate drying and discourage infection. (D) The cord clamp can be removed in 24 hours. Leaving it on is cumbersome and could pull on the cord unnecessarily.

NEW QUESTION # 98

A 3-month-old infant has had a unilateral cleft lip repair. He has resumed feedings of oral formula. The nurse should feed the infant with:

- A. Gavage tube
- B. Nipple and bottle
- C. A straw and cup
- D. Syringe

Answer: D

Explanation:

Explanation

(A) A gavage tube may damage suture line. It is the most invasive and should be the last measure. (B) A nipple and bottle require sucking, which may damage sutures. (C) A 3-month-old infant is not able to drink from a straw. (D) A syringe allows for the formula to be placed to the side and back of the mouth. This minimizes the amount of sucking needed.

NEW QUESTION # 99

A male client is undergoing cardiac tests. He has been instructed to wear a Holter monitor. The nurse knows she has included the appropriate information in her teaching when the client tells her:

- A. "Damage to his heart muscle will be recorded by the monitor."
- B. "He is to refrain from activities that cause chest pain."
- C. "He should remove the electrodes for bathing."
- D. "He is to keep a record of everything he does during the day."

Answer: D

Explanation:

Explanation/Reference:

Explanation:

(A) The client should leave the electrodes in place during the entire time the test is ordered. He should not even remove the

electrodes for bathing. (B) The Holter monitor will record cardiac electrical activity but will not record damage to his myocardium. (C) The client should keep a record of all of his activities so the physician can correlate the ECG findings with his activities. (D) The client should continue doing his regular activities. The purpose of the Holter monitor is to record heart activity during routine activities.

NEW QUESTION # 100

Due to his prolonged history of alcohol abuse, an alcoholic client will most likely have deficiencies of which of the following nutrients?

- A. Vitamin A and biotin
- B. Vitamin C and zinc
- C. Folic acid and niacin
- D. Thiamine and pyroxidine

Answer: D

Explanation:

Explanation

(A) Chronic alcoholism can lead to deficiencies of B complex vitamins including thiamine and pyroxidine. (B) Chronic alcoholism can lead to deficiencies of vitamins A, D, K, and B complex. (C) Chronic alcoholism can lead to deficiencies of vitamins A, D, K, and B complex. (D) Vitamins A, D, K, and B require bile salts to be absorbed from the gastrointestinal tract. A damaged liver does not form bile salts.

NEW QUESTION # 101

.....
