What action assigns actual costs to a project?

- **A. Material withdrawal from stock**
- B. Material availability check
- C. Releasing a project budget
- D. Saving a purchase order

Answer: A

Explanation:

In SAP Project Systems, actual costs are recorded when resources are consumed and physically leave the warehouse or when services are performed.

Material withdrawal from stock: This action (also known as a Goods Issue) triggers the posting of actual costs because it represents the actual consumption of inventory for the project's use.

Financial Impact: At the moment of withdrawal, the system generates a controlling document that updates the project's actual cost totals.

Why other options are incorrect

B. Saving a purchase order: This only creates a commitment (planned future cost). Actual costs are not assigned until a goods receipt or vendor invoice is posted against that order.

C. Material availability check: This is a planning and scheduling step to ensure materials are available. It does not involve any financial transactions or cost postings.

D. Releasing a project budget: This action makes funds available for use but does not represent an actual expenditure or resource consumption.
