are the perfect form of a complete set of teaching material, teaching outline will outline all the knowledge points covered, comprehensive and no dead angle for the Energy-and-Utilities-Cloud candidates presents the proposition scope and trend of each year.

Salesforce Energy and Utilities Cloud Accredited Professional Exam Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which are the two essential deployment steps for migrating Utilities Self Serve Portal from one org to another?
Choose 2 answers

- A. Create customer community user profiles for the Utilities self-serve portal.
- **B. Set up Utilities self-serve templates on your target org.**
- C. Select Self-Serve Portal components from the Energy and Utilities Cloud industry Process Library.
- **D. Create an Experience cloud site to set up a sample digital experience site on your target org.**

Answer: B,D

NEW QUESTION # 52

An energy company was onboarded on Energy and Utilities Cloud. They want to see how many Energy and Utilities Cloud licenses are assigned.

What's the most effective way to check for the number of their assigned Energy and Utilities Cloud licenses?

- A. Go to Setup -> installed Packages -> Velocity CMT to see the Energy and Utilities Cloud license information.
- **B. Go to Setup -> Company Information -> Permission Set Licenses.**
- C. Execute a SOQL query to retrieve the license count
- D. Call Salesforce Support to get the Energy and Utilities Cloud information.

Answer: B

Explanation:

The most effective way to check for the number of assigned Salesforce Energy and Utilities Cloud licenses is through the Salesforce Setup menu. By navigating to Setup, then to Company Information, and looking at the Permission Set Licenses section, administrators can quickly view the number of licenses assigned and available for various Salesforce products, including Energy and Utilities Cloud. This method provides a straightforward and accessible means of license management within the Salesforce environment. Reference = Salesforce's official documentation on managing licenses, including viewing assigned licenses through the Company Information section, provides comprehensive guidance: https://help.salesforce.com/articleView?id=users_license_types_available.htm

NEW QUESTION # 53

An energy company is an energy retailer with a global presence. They require a solution that can generate, redline, and manage contracts.

Which of the following Energy and Utilities Cloud solutions can be used?

- **A. Energy and Utilities Cloud - Contract Lifecycle Management**
- B. Energy and Utilities Cloud = Configure Price Quote (CPQ)
- C. Energy and Utilities Cloud - Sales and Service
- D. Energy and Utilities Cloud - Document Generation S

Answer: A

NEW QUESTION # 54

A company's energy and utilities org uses Permission Set Licenses What are the two methods to control users access to features and functionality?

- **A. Permission Sets**
- **B. Permission Set Groups**

- C. Managed Package Licenses
- D. Sharing Settings

Answer: A,B

Explanation:

In Salesforce Energy and Utilities Cloud, as well as across the Salesforce platform, controlling user access to features and functionality can be effectively managed using Permission Sets and Permission Set Groups.

Permission Sets are collections of settings and permissions that grant access to various tools and functions within Salesforce. They can be used to extend users' access rights without altering their primary profile.

Permission Set Groups are a way to organize Permission Sets, making it easier to assign and manage access for users. They allow administrators to bundle multiple Permission Sets into a single assignment, streamlining the process of granting necessary permissions to users. These tools are essential for tailoring access controls to meet the specific needs of an organization and ensuring that users have the appropriate level of access to perform their roles. Reference = Salesforce documentation provides detailed information on managing user access with Permission Sets and Permission Set Groups, emphasizing their importance in configuring secure and functional access controls within the Salesforce platform: https://help.salesforce.com/articleView?id=perm_sets_overview.htm&type=5

NEW QUESTION # 55

An energy company urgently needs to replace its current customer information system (CIS). The current system is at end-of-life and unsupported. Because the cost to replace the CIS is so high, executives contemplate putting all other projects on hold. This would delay the planned Energy and Utilities Cloud implementation. The executive committee asks a consultant for a recommended, cost-effective approach to maximize the return on investment.

Which two courses of action should the consultant recommend?

- **A. First, implement Energy and Utilities Cloud and integrate it with the current customer information system through a q middleware platform. Then, replace the customer information system with a more modern one and reconnect the integration points between middleware and the new CIS.**
- **B. Implement Energy and Utilities Cloud and simultaneously replace the customer information system with a cloud based billing system.**
- C. To avoid reworking to integrations, deploy a new customer information system first then implement Energy and Utilities Cloud.
- D. Cancel the Energy and Utilities Cloud implementation and replace the CIS. because modern CIS systems have all the necessary functionality to effectively track and manage customer engagements in any channel.

Answer: A,B

Explanation:

These recommended actions provide a strategic approach to maximize return on investment while addressing urgent system replacement needs. Implementing Energy and Utilities Cloud alongside a new cloud-based billing system offers a modernized, scalable solution that enhances operational efficiency. Alternatively, integrating Energy and Utilities Cloud with the existing CIS via middleware allows for immediate enhancements in utility operations with the flexibility to upgrade the CIS subsequently. This phased approach reduces disruption and spreads out capital expenditures over time, aligning with strategic financial planning and ensuring continuity of service.

References = Best practices for implementing Salesforce Energy and Utilities Cloud alongside other critical IT systems are covered in Salesforce's strategic implementation guides, providing a framework for decision-making that balances immediate needs with long-term strategic goals.
