Latest 312-38 Exam Materials - Certification 312-38 Exam Dumps

EC-COUNCIL 312-38 certification exam is one of the most valuable certification exams. IT industry is under rapid development in the new century, the demands for IT talents are increased year by year. Therefore, a lots of people want to become the darling of the workplace by IT certification. How to get you through the EC-COUNCIL 312-38 certification? The questions and the answers Pass4sures EC-COUNCIL provides are your best choice. It is difficult to pass the test and the proper shortcut is necessary. EC-COUNCIL Business Solutions Pass4sures 312-38 Dumps rewritten by high rated top IT experts to the ultimate level of technical accuracy. The version is the most latest and it has a high quality products.

Trustworthy Free 312-38 Exam Questions & Guaranteed EC-COUNCIL 312-38 Exam Success with Accurate Latest 312-38 Exam Materials

P.S. Free 2026 EC-COUNCIL 312-38 dumps are available on Google Drive shared by Lead1Pass:
<https://drive.google.com/open?id=1-EfhavDDSF9p7WU4hlUK-5JdG0g8N44>

Competition appear everywhere in modern society. There are many way to improve ourselves and learning methods of 312-38 exams come in different forms. Economy rejuvenation and social development carry out the blossom of technology; some 312-38 Learning Materials are announced which have a good quality. Certification qualification exam materials are a big industry and many companies are set up for furnish a variety of services for it.

Preparation Process

Understanding the exam topics is very critical to success in the test. Therefore, the potential candidates must download the exam blueprint to review the comprehensive details of these domains. After exploring the scope of the test, they can proceed to choose ample resources to prepare for EC-Council 312-38 with great deliberation.

The EC-Council Certified Network Defender (CND) certification exam is a valuable credential for individuals seeking to demonstrate their expertise in network security and defense. EC-Council Certified Network Defender CND certification is offered by the International Council of Electronic Commerce Consultants (EC-Council), a leading global organization that specializes in training and certifying professionals in the field of information security. The CND certification exam is designed to test candidates' knowledge and skills in areas such as network defense, incident response, and vulnerability assessment.

The EC-Council Certified Network Defender CND certification exam is intended for IT professionals who are involved in network defense and are responsible for securing the infrastructure of an organization against a range of cyber threats. EC-Council Certified Network Defender CND certification is globally recognized as a benchmark for network defense expertise and is considered by many organizations to be a prerequisite for roles such as Network Administrator, Security Officer, and Information Security Analyst.

Pass Guaranteed 2026 312-38: EC-Council Certified Network Defender CND Unparalleled Valid Braindumps Questions

For candidates who are going to buy the 312-38 training materials online, they have the concern of the safety of the website. Our 312-38 training materials will offer you a clean and safe online shopping environment, since we have professional technicians to examine the website and products at times. In addition, 312-38 Training Materials have 98.75% pass rate, and you can pass the exam. We also pass guarantee and money back guarantee if you fail to pass the exam.

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q621-Q626):

NEW QUESTION # 621

A network administrator is monitoring the network traffic with Wireshark. Which of the following filters will she use to view the packets moving without setting a flag to detect TCP Null Scan attempts?

- A. `Tcp.flags==0x003`
- B. `TCRflags==0x000`
- C. `Tcp.flags==0X029`
- D. `Tcp.dstport==7`

Answer: B

Explanation:

In Wireshark, to detect TCP Null Scan attempts, the filter used is `tcp.flags==0`. This filter will show packets where no TCP flags are set, which is indicative of a TCP Null Scan. A TCP Null Scan is a type of network reconnaissance technique where the attacker sends TCP packets with no flags set to the target system. If the target system responds with a RST packet, it indicates that the port is closed, while no response suggests that the port is open or filtered. This method is used because some systems do not log these null packets, allowing the scan to go unnoticed.

NEW QUESTION # 622

Paul is a network security technician working on a contract for a laptop manufacturing company in Chicago. He has focused primarily on securing network devices, firewalls, and traffic traversing in and out of the network. He just finished setting up a server a gateway between the internal private network and the outside public network. This server will act as a proxy, limited amount of services, and will filter packets. What is this type of server called?

- A. Bastion host
- B. SOCKS hshot
- C. Session layer firewall
- D. Edge transport server

Answer: A

Explanation:

The server described in the question is known as a Bastion host. A Bastion host is a special-purpose computer on a network specifically designed and configured to withstand attacks. It is typically placed in a network's demilitarized zone (DMZ) and acts as a proxy server, offering limited services and filtering packets to protect the internal private network from the public network. It is hardened due to its exposure to potential attacks and usually hosts a single application, like a proxy server, while all other services are removed or limited to reduce the threat surface.

References: The definition and role of a Bastion host align with the objectives and documents of the EC-Council's Certified Network Defender (CND) course, which emphasizes the importance of securing network devices and managing traffic between internal and external networks.

NEW QUESTION # 623

Which of the following filters can be applied to detect an ICMP ping sweep attempt using Wireshark?

- A. icmp.type==8
- B. icmp.type==15
- C. icmp.type==13
- D. icmp.type==17

Answer: A

Explanation:

In Wireshark, the filter icmp.type==8 is used to detect ICMP Echo requests, which are commonly used in ping sweep attempts. A ping sweep is a network scanning technique used to determine which of a range of IP addresses map to live hosts. It involves sending ICMP Echo requests (type 8) to multiple hosts and listening for Echo replies (type 0). If an Echo reply is received, it indicates that the host is active. Therefore, the filter icmp.type==8 can be applied to capture these ICMP Echo requests and detect a ping sweep attempt.

References: This information is consistent with network security practices and the use of Wireshark for detecting network attacks, such as ICMP ping sweeps¹. The filter icmp.type==8 specifically captures ICMP Echo requests, which are central to the technique of ping sweeping¹.

NEW QUESTION # 624

Jason works as a System Administrator for www.company.com Inc. The company has a Windows based network. Sam, an employee of the company, accidentally changes some of the applications and system settings. He complains to Jason that his system is not working properly. To troubleshoot the problem, Jason diagnoses the internals of his computer and observes that some changes have been made in Sam's computer registry. To rectify the issue, Jason has to restore the registry. Which of the following utilities can Jason use to accomplish the task? Each correct answer represents a complete solution. Choose all that apply.

- A. Reg.exe
- B. Regedit.exe
- C. Resplendent registrar
- D. EventCombMT

Answer: A,B

Explanation:

To restore the registry on a Windows-based network, a system administrator can utilize several utilities. The Reg.exe utility is a command-line tool that allows for manipulation of the Windows registry from the command prompt, including the ability to restore it¹. Regedit.exe is another utility that provides a graphical interface for users to view and modify the registry². Both these tools are capable of restoring the registry to a previous state if changes have been made that affect system performance or stability.

References: The use of Reg.exe and Regedit.exe for registry restoration is documented in Windows support articles and is consistent with the practices outlined in the Certified Network Defender (CND) course materials¹².

NEW QUESTION # 625

Which of the following is a presentation layer protocol?

- A. BGP
- B. TCP
- C. RPC
- D. LWAPP

Answer: D

NEW QUESTION # 626

.....

For some difficult points of the 312-38 exam questions which you may feel hard to understand or easy to confuse for too similar with

the others. In order to help you memorize the 312-38 guide materials better, we have detailed explanations of the difficult questions such as illustration, charts and referring website. Every year some knowledge of the 312-38 Practice Braindumps is reoccurring over and over. You must ensure that you master them completely.
