権威のあるPK0-005コンポーネント & 認定試験のリーダー & 信頼できるPK0-005テストトレーニング

PK0-005試験問題を選択した後は、プロセス全体を主導する傾向があるため、販売後のサービスプロバイダーとして常に知られています。したがって、PK0-005ラーニングガイドについて悩む必要はありません。PK0-005トレーニング資料は、パフォーマンスの向上とPK0-005試験の包括的なサービスに対する情熱を引き続き追求します。世界中のアフターセールススタッフがオンラインになり、お客様の疑問を安心させるだけでなく、すべての顧客に対する困難や不安を排除します。パズルを教えてください。一緒に考えてみましょう。

CompTIA PK0-005認定試験は、90分の90の質問で構成されています。この試験は英語と日本の言語で利用でき、テストセンターでオンラインまたは対面のいずれかを撮影できます。この試験では、プロジェクトスコープ管理、プロジェクトスケジュール管理、プロジェクトコスト管理、プロジェクト品質管理、プロジェクトリソース管理など、幅広いプロジェクト管理のトピックをカバーしています。試験に合格すると、個人を有能なプロジェクトマネージャーまたはプロジェクトチームメンバーとして証明するため、プロジェクト管理分野のトップ雇用主に雇用される可能性が高まります。

CompTIA Project+ Certification Exam 認定 PK0-005 試験問題 (Q82-Q87):

質問 # 82

After new capabilities were deployed in a system, issues with preexisting capabilities were reported. Which of the following testing cycles should be used to prevent this issue?

- A. Unit testing
- B. Performance testing
- C. Stress testing
- D. User acceptance testing

正解: A

解説:

Unit testing is a testing technique that verifies the functionality and quality of individual units or components of software, such as modules, classes, functions, etc. Unit testing can help prevent issues with preexisting capabilities by detecting and fixing errors at an early stage of development, before they affect the integration and system testing. Unit testing can also ensure that new capabilities do not break or interfere with the existing ones, by checking the compatibility and dependencies of the units. Unit testing can be performed by developers using tools and frameworks that automate the process and generate reports. 質問 # 83

How does data discovery assist with data classification?'

- A. It helps to identify the data owner
- B. It provides assurance of data integrity
- C. It automatically classifies data by keywords
- D. It shows where specific data is stored

正解: D

解説:

Data discovery is the process of finding and analyzing data across an organization's data sources, such as databases, files, cloud services, and applications¹². Data discovery can assist with data classification, which is the process of assigning labels and categories to data based on its sensitivity, value, and risk³⁴. By showing where specific data is stored, data discovery can help to: Identify the location and scope of sensitive data, such as personal, financial, or health information, that may require special protection or compliance measures⁵⁶.

Evaluate the data quality, accuracy, and relevance for different purposes and users⁷⁸.

Optimize the data storage, access, and governance policies and practices⁹¹⁰.

質問 # 84

A project manager provided details regarding the completion of the following tasks:

Vendor selection took less time than planned.

Equipment procurement took less time than estimated.

Equipment installation went according to schedule.
Which of the following should the project manager update?

- A. Issue log
- B. Change log
- C. Requirements traceability matrix
- **D. Project Gantt**

正解: D

解説:

The Project Gantt chart is a scheduling tool used to track task progress and timelines. When tasks are completed ahead of schedule, updating the Gantt chart ensures accurate tracking. This aligns with CompTIA Project+ recommendations on project scheduling and monitoring.

質問 # 85

A project manager is assigned to a multinational project with team members from different continents. Which of the following is the MOST important aspect for the project manager to consider?

- A. Resource allocation
- B. Technological factors
- C. Communication security
- **D. Cultural differences**

正解: D

解説:

Cultural differences are the most important aspect for the project manager to consider when assigned to a multinational project with team members from different continents. Cultural differences refer to the variations in beliefs, values, norms, behaviors, customs, and communication styles among people from different countries or regions. Cultural differences can affect how team members interact, communicate, collaborate, negotiate, make decisions, solve problems, manage conflicts, and perform tasks. The project manager should be aware of and respect the cultural differences among team members and foster a positive and inclusive team culture that leverages diversity and promotes trust and cooperation.

質問 # 86

Which of the following should a project manager consult when deciding how to send updates regarding deliverables?

- A. Dashboard
- B. Status report
- C. Meeting minutes
- **D. Communication plan**

正解: D

解説:

The PM should consult the communication plan because it defines who receives updates, what information they need, when/how often they should receive it, and which channel/form should be used (email, meeting, dashboard, report, chat, etc.). Project+ emphasizes tailoring communications to stakeholder needs and using a planned approach to avoid confusion, missed expectations, or inconsistent messaging—especially around deliverables, acceptance, and progress.

A dashboard is a tool that may be used to publish updates, but it doesn't decide communication rules by itself.

A status report is one possible artifact (often produced on a cadence defined in the communication plan), but it's not the governing document for selecting channels and audiences. Meeting minutes document what happened in a meeting; they're useful for traceability, but they're not the primary guide for how deliverable updates should be distributed going forward.

So, when the question is specifically "how to send updates," the communication plan is the source of truth: it ensures consistent delivery, reduces noise, and aligns with stakeholder preferences and governance requirements.
