Reliable Test ISO-IEC-27001-Foundation Test & ISO-IEC-27001-Foundation 100% Correct Answers

Dumps4PDF assists people in better understanding, studying, and passing more difficult certification exams. We take pride in successfully servicing industry experts by always delivering safe and dependable exam preparation materials. Dumps4PDF ISO-IEC-27001-Foundation Exam Questions make it possible to appear in the ISO/IEC 27001 (2022) Foundation Exam exam confidently without any fear of failure. Dumps4PDF has extensive experience in compiling the ISO-IEC-27001-Foundation exam questions for the APMG-International exam.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

Identify the missing words in the following sentence.

The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. enforce standards for
- B. report on
- **C. continually improve**
- D. communicate the importance of

Answer: C

Explanation:

Clause 4.4 of ISO/IEC 27001:2022 states:

"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with the Plan-Do-Check-Act (PDCA) model.

Thus, the missing words are "continually improve."

NEW QUESTION # 23

Which item is required to be included in an information security policy?

- A. A framework enabling concerns with the information security policy to be addressed
- B. A plan for the continual improvement of the information security management system
- **C. A commitment to satisfy applicable requirements related to information security**
- D. A Statement of Applicability which defines the necessary controls to be implemented

Answer: C

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

- * "includes information security objectives (or provides a framework for setting them)"
- * "includes a commitment to satisfy applicable requirements related to information security"
- * "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself. Thus, the correct answer is A.

NEW QUESTION # 24

What is the definition of the term 'integrity' according to ISO/IEC 27000?

- **A. The property of accuracy and completeness**
- B. The property that information is NOT made available inappropriately
- C. The property of availability and confidentiality
- D. The property of being accessible and usable

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.35:

"Integrity is the property of accuracy and completeness."

This is one of the three core principles of information security (CIA triad):

- * Confidentiality: ensuring information is not made available to unauthorized persons (related to option B).
- * Integrity: ensuring data is accurate, complete, and unaltered except by authorized means.
- * Availability: ensuring information is accessible and usable when required (related to option A).

Option D incorrectly mixes availability and confidentiality. The precise ISO definition is accuracy and completeness, which matches option C.

Thus, the correct verified answer is C.

NEW QUESTION # 25

What is required to be reported by the Information security event reporting control?

- A. Information disclosure
- B. Asset disposal
- C. Unauthorized access
- **D. Observed or suspected events**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A, control 6.8 (Information security event reporting) specifies:

"Information security events should be reported through appropriate management channels as quickly as possible. The organization should require all employees and contractors to note and report any observed or suspected information security events." This wording confirms that the required reporting covers "observed or suspected events." Specific event types like information disclosure (A) or unauthorized access (B) are examples but not the broad requirement.

Asset disposal (C) is addressed separately under equipment lifecycle controls (Annex A.7.14).

Therefore, the verified correct answer is D: Observed or suspected events.

NEW QUESTION # 26

Which statement is a factor that will influence the implementation of the information security management system?

- **A. The ISMS will be separate from the organization's overall management structure**

- B. The ISMS will be scaled to the controls according to the needs of the organization
- C. The ISMS will be operated as an independent process within the organization
- D. The ISMS will encompass all controls specified within ISO/IEC 27001

Answer: B

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

NEW QUESTION # 27

.....

We can provide you with efficient online services during the whole day, no matter what kind of problems or consultants about our ISO-IEC-27001-Foundation quiz torrent; we will spare no effort to help you overcome them sooner or later. First of all, we have professional staff with dedication to check and update our ISO-IEC-27001-Foundation exam torrent materials on a daily basis, so that you can get the latest information from our ISO-IEC-27001-Foundation Exam Torrent at any time. Besides our after-sales service engineers will be always online to give remote guidance and assistance for you if necessary. If you make a payment for our ISO-IEC-27001-Foundation test prep, you will get our study materials in 5-10 minutes and enjoy the pleasure of your materials.
