NEW QUESTION # 36
You are building a WalkMe solution to help your users self-serve and prevent common support tickets from being opened repeatedly. You want to add guidance for the top three support tickets to a page on your website and make it stand out for the end

user. What is the best solution to allow for quick and easy access?

- A. Create a Survey to ask end users about their feedback.
- B. Create a large ShoutOut to appear in the middle of the page each time the user visits the page.
- C. Add it to your list of WalkMe content in the Menu.
- D. Create a Mini Menu of content from the top three support tickets and place it next to the support ticket form.

Answer: D

Explanation:

To address common support tickets and promote self-service, aMini Menuplaced next to the support ticket form is the best solution. A Mini Menu is a compact, context-sensitive menu that provides quick access to relevant content, such as Smart Walk-Thrus or Resources for the top three support issues. Positioning it near the form ensures it's highly visible and accessible when users are likely to need help, reducing ticket submissions by guiding users to solutions proactively.

The other options are less suitable:

* A Survey(A) collects feedback but doesn't provide guidance to prevent tickets.
* Adding to the WalkMe Menu(C) is less targeted, as users must navigate to find content.
* A large ShoutOut(D) is disruptive if shown repeatedly and less effective for ongoing self-service.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.11: Mini Menus): "Mini Menus are ideal for delivering context-specific content, such as guidance for common issues, directly on a page. Place them near relevant elements, like a support form, to promote self-service and reduce support tickets." The courseAdvancing Your Skills in Building WalkMe Solutionsstates:

"To address frequent support tickets, create a Mini Menu with targeted content and position it near the point of need, such as a ticket form, for quick user access and effective self-service." Option B, a Mini Menu next to the support ticket form, is the best solution.
