We provide up-to-date LEED Green Associate Exam (LEED-Green-Associate) exam questions and study materials in three different formats. We have developed three variations of authentic LEED-Green-Associate exam questions to cater to different learning preferences, ensuring that all candidates can effectively prepare for the LEED-Green-Associate practice test. Actual4Labs offers LEED-Green-Associate Practice Questions in PDF format, browser-based practice exams, and desktop practice test software. Each version of our updated LEED-Green-Associate Questions has its own unique benefits, enabling you to confidently prepare for your certification test.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.
Topic 2	<ul style="list-style-type: none">Integrative Strategies: This section of the exam measures the skills of project managers and focuses on the integrative process in LEED projects. It includes understanding the roles of various team members and standards that support LEED, such as ASHRAE and ENERGY STAR guidelines. This section highlights the importance of collaboration and systems thinking in achieving sustainable design.

Topic 3	<ul style="list-style-type: none"> Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.
Topic 4	<ul style="list-style-type: none"> Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.
Topic 5	<ul style="list-style-type: none"> Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
Topic 6	<ul style="list-style-type: none"> Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.
Topic 7	<ul style="list-style-type: none"> Water Efficiency: This section of the exam measures the skills of water conservation specialists and covers strategies for reducing water usage both indoors and outdoors. It includes the use of gray water and rainwater in irrigation and the implementation of low-flow fixtures.

USGBC LEED-Green-Associate Well Prep & Reliable LEED-Green-Associate Test Sample

Actual4Labs provides 24/7 customer support to answer any of your queries or concerns regarding the LEED Green Associate Exam (LEED-Green-Associate) certification exam. They have a team of highly skilled and experienced professionals who have a thorough knowledge of the LEED Green Associate Exam (LEED-Green-Associate) exam questions and format.

USGBC LEED Green Associate Exam Sample Questions (Q316-Q321):

NEW QUESTION # 316

What organization reviews and provides final LEED certification report to projects?

- A. Green Building Initiative (GBI)
- B. U.S. Green Building Council
- **C. Green Business Certification Inc.**
- D. ASHRAE

Answer: C

Explanation:

The Green Business Certification Inc. (GBCI) reviews and provides the final LEED certification report to projects. GBCI was established in 2008 as a separately incorporated entity with the support of the U.S. Green Building Council (USGBC). GBCI administers project certifications for LEED and other green business certification programs. References: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 317

Strategies for improving building occupants' comfort and control may consist of

- A. designing for proper ventilation, monitoring outdoor airflow and including appropriate acoustic design
- **B. installing operable windows, giving occupants lighting control and providing ergonomic furniture**
- C. ensuring adequate ventilation, monitoring carbon dioxide and prohibiting smoking
- D. specifying low-emitting materials, testing for radon and other on-site contaminants and installing entryway grates

Answer: B

Explanation:

Strategies for improving building occupants' comfort and control may consist of installing operable windows, giving occupants lighting control and providing ergonomic furniture. These strategies can enhance the indoor environmental quality (IEQ) of a building, which is the physical and psychological conditions of the indoor spaces that affect the health, comfort, and productivity of the occupants. Installing operable windows can allow occupants to adjust the natural ventilation, temperature, and fresh air intake of their spaces. Giving occupants lighting control can allow them to adjust the artificial lighting levels, color, and direction of their spaces. Providing ergonomic furniture can support the physical comfort, posture, and well-being of the occupants¹². Reference: LEED v4 Green Associate Candidate Handbook¹, LEED v4 BD+C Reference Guide²

NEW QUESTION # 318

What is the process that is performed on existing buildings to identify and recognize system improvements that make the building more suitable for current use?

- A. Fundamental Commissioning (Cx)
- B. Life-cycle assessment
- C. Energy modeling
- D. **Retrocommissioning**

Answer: D

NEW QUESTION # 319

Which strategy can be used during the building process and after occupation to reduce waste?

- A. Develop a Sustainable Purchasing Policy
- B. Use grey water for flushing of toilets
- C. **Implement a recycling program**
- D. Use certified lumber for framing

Answer: C

NEW QUESTION # 320

What is the unit of measure for water closets?

- A. **Gallons (Liters) per flush**
- B. Average usage per hour
- C. Usage per full time employee
- D. Gallons (Liters) per person

Answer: A

Explanation:

Explanation

Water closets, also known as toilets, are fixtures that use water to flush human waste into a sewer or septic system. The unit of measure for water closets is gallons (liters) per flush, which indicates the amount of water used for each flushing cycle. The water efficiency of waterclosets can vary depending on the design, technology, and regulation of the fixture. The LEED rating system encourages the use of water-efficient fixtures that reduce water consumption and wastewater generation¹².
