Adobe AD0-E117 Reliable Exam Camp - Reliable AD0-E117 Exam Camp

There is nothing more important than finding the best-quality AD0-E117 practice questions for your exam preparation that will appear in the AD0-E117 actual test. To help our candidate solve the difficulty of AD0-E117 real exam, we prepared the most reliable questions and answers for the exam preparation, which comes in three versions. Our aim is help our candidates realize their ability by practicing our AD0-E117 Exam Questions and pass exam easily.

Adobe AD0-E117 Certification Exam is designed to validate the skills and knowledge of professionals who work with Adobe Experience Manager (AEM). Adobe Experience Manager Architect Master certification exam is intended for experienced AEM architects who are responsible for designing and implementing AEM solutions for their organizations. AD0-E117 Exam Tests the candidate's ability to design AEM solutions that meet the requirements of their organization, as well as their ability to manage and maintain AEM systems.

Adobe Experience Manager Architect Master Sample Questions (Q77-Q82):

NEW QUESTION # 77
An organization is transitioning its digital platform to AEMaaCS. The lead architect is overseeing the transition and ensuring that the platform remains robust and offers a consistent user experience. The team has already performed general functionality tests. As the launch date approaches, the team is focusing on potential real-world challenges, such as the platform's behavior under high-user traffic and communicating with third- party services.
Which two types of testing should the architect prioritize next to ensure a seamless transition to AEMaaCS?
(Choose two.)

- A. Unit Testing
- B. Usability Testing

- C. Load Testing
- D. Integration Testing

Answer: C,D

NEW QUESTION # 78

A client requires the ability to create multiple microsites with the same set of components but with different visual variations. The client needs to make sure that an author of a specific microsite is following a specific microsite Style Guide. What approach would the architect take?

- A. Create a set of core components with the required functionalities
  Extend these components and create different versions of them for each one of the microsites Configure the static templates for each microsite to use the specific set of extended components based on the required design
- B. Create a set of core components with the required functionalities
  Create a set of CSS classes that correspond to each visual variation as well as the corresponding CSS code Configure the Clientlibs policies in the editable templates that render the required styles based on each microsite
- C. Create a set of core components with the required functionalities
  Create a set of CSS classes that correspond to each visual variation as well as the corresponding CSS code Configure the Style System policies in the editable templates that render the required styles based on each microsite
- D. Create a set of core components with the required functionalities
  Extend these components and create different versions of them for each one of the microsites Configure the authors' permissions to only be able to access the proper set of components based on which microsite they are authoring

Answer: A

NEW QUESTION # 79

A client with an existing AEM 6.5 AMS (Adobe Managed Services) implementation wants to start selling its products in Mainland China.
The client owns a state-issued ICP (Internet Content Provider) license.
The client does not accept high-latency calls for uncached content.
The client does not accept content being potentially blocked by a Chinese firewall.
The client wants to have an in-China hosting solution.
What option would the AEM architect recommend to cover the scenario above?

- A. Provision an on-premise AEM 6.5 near-China hosted environment that is accessed via an in-China CDN (Content Delivery Network).
- B. Reach out to AMS to set up an Adobe Experience Manager Managed Services for China infrastructure
- C. Use an in-China CDN (Content Delivery Network) that interfaces with the existing AMS AEM set-up
- D. Migrate the existing AMS AEM environment to AEMaaCS and create the environment with multiple Cloud Service Environment regions

Answer: B

NEW QUESTION # 80

A customer's photo gallery site uses query parameters to filter photo search results. The site experiences high AEM Publish server load when users filter photos on the site. The customer would like to identify the cause of this issue.
What should the Architect investigate first?

- A. Dispatcher load balancing configuration
- B. ignoreUrlParams configuration in dispatcher.any
- C. Volume of assets being loaded at a time
- D. Cache-Control Headers in dispatcher.any

Answer: D

Explanation:
"Cache-Control Headers in dispatcher.any control how long the dispatcher caches responses from the publish server. If these headers are not configured properly, the dispatcher may cache stale or dynamic content, resulting in high server load and poor

performance".

NEW QUESTION # 81
A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:
* The client currently has a dozen static templates that they want to move to editable templates.
* The existing pages use the parsys paragraph system for storing components.
* Each page based on one of the static templates has its own custom properties tab that is unique for that template type.
* The client wants template authors to be able to create the editable templates.
Which approach should an Architect use to meet these requirements?

- A. 1. Use a new page component for editable templates based on the core components page component
  2. Convert page properties to policies
- B. 1. Use the same page components for editable templates
  2. Use a new template type for each static template
- C. 1. Use the same page components for editable templates
  2. Create a new editable template based on each of the existing page components
- D. 1. Use a new page component for editable templates based on the core components page component
  2. Migrate page properties to respective components dialogues

Answer: D

Explanation:
Use a new page component for editable templates based on the core components page component and migrate page properties to respective components dialogues12. According to Adobe Experience Manager documentation1, static templates are not considered a best practice and editable templates should be used instead. AEM Modernization tools can help migrate from static to editable templates. Editable templates use core components as their base components2 and page properties can be migrated to component dialogues using content policies2.

NEW QUESTION # 82
......

In order to cater to meet different needs of candidates, three versions of AD0-E117 learning materials are available. AD0-E117 PDF version is printable, and if you prefer the hard one, you can choose this version for your practice. AD0-E117 Soft test engine can install in more than 200 personal computers, and it can also stimulate the real exam environment, and you can know what the real exam is like. AD0-E117 Online Test engine is convenient and easy to learn, you can learn anytime and anyplace. This version can record your process of training, and you can have a general review before next training.
