## Pass Guaranteed Quiz 2026 Network Appliance NS0-528: Unparalleled New Implementation Engineer - Data Protection Exam Test Objectives

With TestBraindump's help, you do not need to spend a lot of money to participate in related cram or spend a lot of time and effort to review the relevant knowledge, but can easily pass the exam. Simulation test software of Network Appliance NS0-528 Exam is developed by TestBraindump's research of previous real exams. TestBraindump's Network Appliance NS0-528 exam practice questions have a lot of similarities with the real exam practice questions.

### Network Appliance Implementation Engineer - Data Protection Exam Sample Questions (Q62-Q67):

#### NEW QUESTION # 62

An administrator performed a SnapMirror failover and failback of several individual volumes from production and DR. After failback to production, there are orphaned Snapshot copies, and the SnapMirror relationship from the DR to production is still in place from the prior failback procedure.

Which snapmirror command cleans up the relationships and Snapshot copies?

- A. quiesce
- B. break
- **C. release**
- D. resync

**Answer: C**

Explanation:

The snapmirror release command is used to remove SnapMirror relationships from the source cluster's perspective and delete orphaned Snapshot copies that were created for the SnapMirror relationship. This is the correct cleanup step after failback and

ensures no leftover replication metadata remains.

### NEW QUESTION # 63

You are asked to attach LTO-8 tape drives to your ONTAP cluster.  
Where will you find a list of supported tape drives to perform this task?

- A. Active IQ Digital Advisor
- B. Hardware Universe
