For candidates who buy NCP-EUC exam bootcamp online, they may have the concern about the money safety. We apply the international recognition third party for the payment, and it will protect the interests of you. Therefore you put your mind at rest if you buy NCP-EUC exam bootcamp from us. In addition, we have free demo for you to have a try, so that you can have a deeper understanding the complete version of the NCP-EUC Exam Dumps. If you have any other questions, just contact us, and we will do what we can do to help you.

Our company is professional brand established for compiling NCP-EUC exam materials for candidates, and we aim to help you to pass the examination as well as getting the related NCP-EUC certification in a more efficient and easier way. Owing to the superior quality and reasonable price of our NCP-EUC Exam Materials, our company has become a top-notch one in the international market. Our NCP-EUC exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in many respects.

NCP-EUC Learning Engine, Reliable NCP-EUC Exam Braindumps

Everyone has different learning habits, NCP-EUC exam simulation provide you with different system versions: PDF version, Software version and APP version. Based on your specific situation, you can choose the version that is most suitable for you, or use multiple versions at the same time. After all, each version of NCP-EUC Preparation questions have its own advantages. If you are very busy, you can only use some of the very fragmented time to use our NCP-EUC study materials. And each of our NCP-EUC exam questions can help you pass the exam for sure.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q111-Q116):

NEW QUESTION # 111
An administrator needs to manage the virtual desktop environment for a small QA group.
Which two requirements would prevent a non-persistent deployment? (Choose two.)

- A. users need to access web-based applications.

- B. users need to log on and log off frequently.
- C. users need to test application installation routines.
- D. users need to test various peripherals.

Answer: C,D

Explanation:
non-persistent VDI is a type of virtual desktop infrastructure (VDI) that does not save any changes made by the user on the virtual machine (VM) across sessions. Non-persistent VDI uses a master image to create and delete VMs as needed.
Therefore, if the administrator needs to manage a non-persistent deployment, they should avoid any requirements that involve modifying or installing applications on the VMs, as those changes would not be saved.

NEW QUESTION # 112
An administrator would like to apply a group of base settings to Citrix-based VDI users at each logon.
which user profile type would best fit the scenario?

- A. Mandatory Profiles
- B. Virtual disk-based Profiles
- C. Roaming Profiles
- D. Local Profiles

Answer: A

Explanation:
A mandatory profile is a type of roaming profile that is read-only and does not save any changes made by users during their sessions.
A mandatory profile can be applied to a group of users who share a common desktop environment and do not need to customize their settings or preferences.
A mandatory profile can ensure that a group of base settings are applied to Citrix-based VDI users at each logon, regardless of any changes they make during their sessions. A mandatory profile can also improve performance, security, and consistency of the VDI environment.
To use a mandatory profile with Citrix Virtual Apps and Desktops, you need to create a template profile on a reference machine, rename its NTUSER.DAT file to NTUSER.MAN, and copy it to a network share. Then you need to configure Profile Management policies or Active Directory settings to point to the network share location for your users2.

NEW QUESTION # 113
Refer the exhibit.

Which statement is true?

- A. Five instances are running Tuesday and Thursday from 00:00am till 24:00 pm
- B. Five instances are running on every Weekday fro, 00:00am till 24:00 pm
- C. Five instances are running Tuesday and Thursday from 09:00 am till 05:00 pm.
- D. Five instances are running on every Weekday from 09:00am till 05:00 pm

Answer: A

Explanation:
The schedule has two rows: one for Weekdays and one for Tuesday and Thursday.
Each row has a column for Instances, which indicates how many instances should be running during that time range.
Each row also has a column for Time Range, which indicates the start and end time for running the instances.
The time range is expressed in 24-hour format, where 00:00 means midnight and 24:00 means midnight of the next day.
According to the exhibit, the schedule Dev has the following settings:
On Weekdays (Monday to Friday), five instances are running from 09:00 am till 05:00 pm.
On Tuesday and Thursday, five instances are running from 00:00 am till 24:00 pm.

NEW QUESTION # 114

An administrator is attempting to enable Active-Active NIC load balancing on a cluster. The operation succeeds on the first node, but fails on the second.

What should the administrator confirm before retrying?

- A. Configure the top-of-rack switch to use Balance-SLB.
- B. Ensure that the top-of-rack switch ports have LACP enabled.
- C. Ensure that all physical NICs in the cluster are operating at the same speed
- D. Confirm that all nodes in the cluster have identical physical NICs installed.

Answer: C

Explanation:
When configuring Link Aggregation Groups (LAG) or Active-Active NIC bonding (such as balance-tcp with LACP) on Nutanix AHV, there is a strict requirement regarding link negotiation. All interfaces in a bond must run at the same speed.
If the second node has physical NICs that have negotiated different speeds (e.g., one link at 10 Gbps and another at 1 Gbps due to a cabling issue or switch misconfiguration), the bond creation command will fail for that specific node. While identical hardware (Option A) is preferred, it is the actual operating speed of the links that determines whether the OVS bond can successfully form.

NEW QUESTION # 115

An administrator needs to provide a standard desktop to a group of users that will replace their existing physical desktop. The administrator wants to minimize administrative overhead and application compatibility concerns.
Which desktop provisioning method best meets the requirements?

- A. Hosted Shared Desktop
- B. Non-Persistent VDI
- C. Persistent VDI
- D. Remote PC

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:
According to Nutanix and Citrix Desktop Delivery Models:
* Requirement Analysis: The goal is to replace a physical desktop while minimizing Application Compatibility concerns.
* Why Persistent VDI? Persistent VDI (often Full Clones) provides a 1:1 user-to-VM mapping where the user's data, profile, and installed applications persist across reboots, exactly mimicking a physical PC. This offers the highest application compatibility because apps that require local installation, hard- coded paths, or local licensing work without the complex layering or virtualization required in non- persistent setups.
* Comparison:
* Non-Persistent VDI (C): often requires "App Layering" or complex image management for incompatible apps, increasing overhead for difficult applications.
* Hosted Shared (B): (RDS) has the lowest app compatibility due to multi-user OS limitations.

NEW QUESTION # 116

......

It is easy to get bogged down by all the material you need to learn and lose sight of your goal.

2026 Nutanix NCP-EUC –Valid New Test Test

This is not only time-consuming and laborious, but also is likely to fail, We are strict with the quality and answers of NCP-EUC Exam Materials, we can guarantee you that what you receive are the best and most effective.
