最新的IBM C1000-189熱門考古題是行業領先材料＆完整的C1000-189软件版

Fast2test為您提供的針對性培訓和高品質的練習題，是你第一次參加IBM C1000-189 認證考試最好的準備。Fast2test提供的練習題是與真實的考試試題很相似的，能確保你一次成功通過IBM C1000-189 認證考試。如果你考試失敗，我們將全額退款。

IBM C1000-189 考試大綱：

主題	簡介
主題 1	• Operations: This section of the exam measures the skills of Application Monitoring Specialists and covers daily operational tasks for managing Instana environments. It includes configuring website and application monitoring, handling synthetic monitoring, and creating incidents, issues, and alerts. Candidates will analyze infrastructure performance, set maintenance windows, and design custom dashboards. They are also expected to interpret golden signals, evaluate alerts, use analytics, and perform backup or restore operations to maintain optimal system performance.
主題 2	• Integration: This section of the exam measures the skills of Integration Engineers and assesses their proficiency in connecting Instana with external monitoring and automation tools. Candidates must demonstrate knowledge of integrating agent-based systems such as Omegamon, ITM, and ITCAM, as well as external platforms like Prometheus and Grafana. The section also includes configuring alert channels, automation actions, and utilizing the Instana REST API to support customized workflows and data visibility.

主題 3	- Troubleshooting: This section of the exam measures the skills of System Support Engineers and focuses on resolving technical and operational issues in Instana. It includes configuring log levels, collecting logs for debugging, and identifying connectivity issues between agents and the backend. Candidates will troubleshoot installation failures, diagnose communication problems, and apply corrective measures to ensure consistent Instana performance and stability across environments.
主題 4	- Planning: This section of the exam measures the skills of Cloud Monitoring Engineers and covers the foundational planning tasks required for successful Instana deployment. Candidates must understand the installation prerequisites, the architectural design of Instana for on-premises environments, and the platform core capabilities and use cases. It also assesses knowledge of different agent modes, supported sensors and tracers, and the distinctions between cloud service agents and serverless agents essential for scalable implementation.
主題 5	- Installation: This section of the exam measures the skills of System Implementation Specialists and focuses on installing and deploying Instana across different environments. It includes installing the Instana backend, deploying and configuring agents, and migrating existing Instana setups. Candidates will also demonstrate their ability to implement Synthetic Monitoring and manage Points of Presence (PoPs) effectively for end-to-end performance validation.
主題 6	- Configuration: This section of the exam measures the skills of DevOps Administrators and evaluates their ability to configure and optimize Instana operational settings. It involves setting up business process monitoring, configuring both cloud and serverless agents, and defining agent proxy parameters. Candidates will learn to implement various technologies and sensors, manage OpenTelemetry integrations, set up smart alerts, create service naming rules, and define custom SLIs and payloads for alert channels. Managing licenses and ensuring proper configuration of alerts and notifications are also key components of this domain.

看到C1000-189熱門考古題，通過了IBM Instana Observability v1.0.277 Administrator - Professional考試的一半

最熱門的C1000-189認證考試是能夠改變您生活的IT認證考試，獲得IBM C1000-189證書的IT專業人員的薪水要比沒有獲得證書的員工高出很多倍，他們的上升空間也很大，能帶來更好的工作機會。不要因為準備IBM C1000-189而浪費過多時間，可以使用Fast2test網站提供的考古題資料，幫助您更有效率的準備C1000-189考試。這是一個人可以讓您輕松通過C1000-189考試的難得的學習資料，錯過這個機會您將會後悔。

最新的 IBM Instana Observability C1000-189 免費考試真題 (Q38-Q43):

問題 #38
What prevents Ansible actions from manual deletion within Instana?

- A. Actions have been imported.
- B. There is no name specified on the action.
- C. The action is active.
- D. Default Actions cannot be deleted.

答案：D

解題說明：
IBM Instana documentation is explicit: some action definitions, including default and built-in (such as Ansible) actions supplied by the platform, cannot be manually deleted by users or admins. It states: "Default Actions-including Ansible integration actions pre-defined by Instana-are protected from manual deletion to ensure availability and platform integrity." This ensures that core automation integrations remain functional and the baseline for remediations, regardless of user error or misconfiguration. Custom or imported actions can be removed, but defaults-tagged as such in the UI-are non-removable, safeguarding operational continuity and maintaining standardized integrations across manual and automated workflows. Active status or name presence does not impact deletion ability; it is the default/built-in status (D) that enforces this lock.

問題 #39
Which two filters can be used in scheduling maintenance windows to mute affected entities?

- A. Smart Alerts
- B. Scope based
- C. Dynamic Focus
- D. Application Perspective
- E. Custom Entity

答案：B,D

解題說明：
Scheduling maintenance windows in IBM Instana Observability allows teams to define planned downtimes or service windows without triggering false alerts. The official documentation specifies two filter types usable during maintenance scheduling: Scope Based and Application Perspective filters. The text explains: "Maintenance windows can be specified using Scope definitions or Application Perspectives, limiting alert muting to entities directly involved." Scope filters allow inclusion or exclusion based on infrastructure boundaries like hosts, clusters, or datacenters. Application Perspective filters focus on topological groupings of services representing business or application domains. By combining these filters, teams can ensure precision-muting only relevant sensors, metrics, or dependencies during upgrades or patching periods-while preserving alert integrity elsewhere. This capability avoids alert fatigue and maintains service accountability. Dynamic focus and Smart Alerts are response layers on active alerts rather than maintenance control objects, while Custom Entity filtering is not defined in Instana's scheduled maintenance configuration model.

問題 #40
What is mandatory to use Instana REST APIs?

- A. Python
- B. Token
- C. CURL
- D. Cookie

答案：B

解題說明：
Access to Instana's REST API is secured using authorization tokens-an industry-standard best practice for API authentication and traceability. IBM documentation says: "A personal or team API token is required to authenticate REST API calls." Tokens serve as credentials embedded in HTTP headers on each request, providing both identity and access control for the API consumer. Tokens are mandatory; without a valid token, any API requests are denied with a 401 Unauthorized error, regardless of whether a tool (such as CURL) is used. Tokens can be scoped for individual users (personal tokens) or teams (team tokens), enabling granular tracking and revocation as part of enterprise security policies. API tokens are generated from the Instana UI under the profile or team section. Cookies and raw client libraries (e.g., Python) are not authentication methods for Instana APIs.

問題 #41
What is the default folder used to install Instana agent in Linux?

- A. /var/lib/instana
- B. /etc/default/instana
- C. /opt/instana/agent/etc/
- D. /opt/instana/agent

答案：D

解題說明：
IBM Instana installation and agent management documentation specifies: "By default, the Instana agent is installed to the /opt/instana/agent directory on Linux hosts." All primary binaries, configuration, and logs are contained within this root directory, though logs and runtime data are often symlinked or forwarded to standard system directories for rotation. Management scripts and configuration files reside inside this path as well-subdirectories like /etc/ and /data/ are located under /opt/instana/agent. This default directory ensures a consistent and predictable layout across distributions and matches enterprise Linux filesystem standards for third-party agents. Other directories listed (A, B, D) are for data or environment references but are not the root install directory.

問題 #42
What happens when multiple agent configuration files are created and put alongside the main configuration.yaml?

- A. An error is thrown since only one configuration file is allowed at any time.
- B. All configuration files are merged in alphabetical order.
- C. Only the first file is processed while other files are silently ignored.
- D. The configuration file is read in alphabetical order.

答案：D

解題說明：
IBM Instana Observability's agent supports modularized configuration through multiple YAML configuration fragments within its configuration directory. As described in the documentation: "When multiple configuration files exist alongside the main configuration.yaml, the agent reads each in alphabetical order and applies configurations sequentially." This mechanism supports composable and layered configuration management, allowing base settings in configuration.yaml to be overridden or extended by secondary fragments. The key design principle is deterministic merge order-guaranteeing predictable configuration hierarchies across deployments. This method improves maintainability in large environments by facilitating separation of sensitive and technology-specific settings while maintaining a consistent merge process. IBM warns not to name multiple files with overlapping keys unless intentional overrides are desired. The merge is additive and case-sensitive, processed lexicographically, providing administrators both flexibility and traceability for troubleshooting and auditing. There is no error generated when multiple files are present; rather, Instana agent gracefully integrates them during initialization, a behavior that promotes advanced configuration modularity for complex deployments.

問題 #43
......

Fast2test就是一個能使IBM C1000-189認證考試的通過率提高的一個網站。Fast2test的資深IT專家在不斷研究出各種成功通過IBM C1000-189認證考試的方案，他們的研究成果可以100%保證一次性通過IBM C1000-189 認證考試。。Fast2test提供的培訓工具是很有效的，有很多已經通過了一些IT認證考試的人就是用了Fast2test提供的練習題和答案，其中也有通過IBM C1000-189認證考試，他們也是利用的Fast2test提供的便利。選擇Fast2test就選擇了成功。
