AB-730 Valid Exam Simulator - AB-730 Exam Bible

ValidTorrent has been devoted itself to provide all candidates who are preparing for IT certification exam with the best and the most trusted reference materials in years. With regards to the questions of IT certification test, ValidTorrent has a wealth of experience. ValidTorrent has helped numerous candidates and got their reliance and praise. So, don't doubt the quality of ValidTorrent Microsoft AB-730 Dumps. It is high quality dumps helping you 100% pass AB-730 certification test. ValidTorrent promises 100% FULL REFUND, if you fail the exam. With this guarantee, you don't need to hesitate whether to buy the dumps or not. Missing it is your losses.

Microsoft AI Business Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

You are creating a prompt in Microsoft 365 Copilot to get information about a proposal.

You need to ensure that the response is grounded in the proposal's information.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Add a specific goal that you want Copilot to accomplish.
- **B. Reference the proposal content in the prompt.**
- C. Add context about the intended audience.
- D. Instruct Copilot to rely on its training data to infer proposal details.

Answer: B

Explanation:

To create an effective prompt grounded in a specific proposal, use Microsoft 365 Copilot's "slash command" feature to directly reference the file.

Creating the Grounded Prompt

A successful grounded prompt follows the Goal, Context, Expectations, Source framework.

Reference the Source: Start your prompt or include at the end a reference to the specific proposal by typing "/" followed by the filename (e.g., /[Proposal_Name].docx).

Define the Goal: State exactly what information you need (e.g., "Summarize the key deliverables").

Provide Context: Explain why you need it (e.g., "for an upcoming client kickoff meeting").

Set Expectations: Specify the format, tone, and length (e.g., "in a bulleted list of 5 items").

Example Prompt

"Based on /[Project_Proposal_v2.docx], summarize the primary project goals and list the three highest-risk items. Use a professional tone and format the response as a short executive summary for my leadership team." Reference:

NEW QUESTION # 48

You ask Microsoft 365 Copilot to create a report based on information from the web.

You verify the response and discover that some information is fictional.

What is this an example of?

- A. overreliance
- B. deepfake
- **C. fabrication**
- D. bias
- E. prompt injection

Answer: C

Explanation:

In Microsoft 365 Copilot, when a generated report includes fictional or factually incorrect information that sounds plausible, it is primarily called a hallucination. While some technical discussions use terms like fabrication to describe the act of inventing details, "hallucination" is the industry-standard term for this phenomenon.

Key characteristics of these errors include:

Hallucination: Occurs when the AI generates content that is not grounded in the provided data or real-world facts, often appearing coherent but being entirely inaccurate.

*-> Fabricated Answers: The model may "fill in the blanks" with invented numbers, dates, or names when it lacks specific information from its sources.

Ungrounded Content: Microsoft specifically uses this term to describe information that does not align with the connected data sources, such as web info or internal documents.

Confabulation: An alternative metaphor sometimes used to describe the creative "gap-filling" process the AI performs when it lacks data.

Incorrect:

[Not A]

Deepfakes specifically refer to synthetic media-such as images, videos, or audio recordings- that have been manipulated to mimic a real person's likeness or voice. These are typically created deliberately to deceive or mislead.

[Not E]

Bias refers to the tendency of the AI to generate outputs that unintentionally reflect, reinforce, or amplify harmful stereotypes, societal inequalities, or prejudices present in its training data.

Because Copilot is a generative AI tool trained on vast amounts of internet text and user data, it can inadvertently produce content that is skewed toward specific viewpoints, cultures, or demographics.

NEW QUESTION # 49

Hotspot Question

Select the answer that correctly completes the sentence.

The screenshot shows a Microsoft 365 Copilot interface. At the top, it says "Answer Area" and "Microsoft". Below that, it says "You generate a report by using the Researcher agent in Microsoft 365 Copilot. You can use _____ to save and edit the response." A dropdown menu is open, showing four options: "an agent", "a conversation", "a notebook", and "a page". The option "a page" is highlighted in green.

Answer:

Explanation:

Answer Area

You generate a report by using the Researcher agent in Microsoft 365 Copilot. You can use _____ to save and edit the response.

The screenshot shows a Microsoft 365 Copilot interface. At the top, it says "Answer Area" and "Microsoft". Below that, it says "You generate a report by using the Researcher agent in Microsoft 365 Copilot. You can use _____ to save and edit the response." A dropdown menu is open, showing four options: "an agent", "a conversation", "a notebook", and "a page". The option "a page" is highlighted in green.

Explanation:

Box: a page

You generate a report by using the Researcher agent in Microsoft 365 Copilot. You can use _____ to save and edit the response.

To save and edit a report generated by the Researcher agent in Microsoft 365 Copilot, you should primarily use Microsoft 365 Pages (part of Loop) or Microsoft Word.

Key Tools for Saving and Editing

*-> Microsoft 365 Pages: This is the most integrated way to handle Researcher output. After the report is generated, you can select "Edit in Pages" directly below the response. This creates a collaborative page side-by-side with your chat, allowing you to refine the content with your team.

Microsoft Word: You can export the report directly to Word to apply professional formatting and perform detailed editing. This is often the recommended step after initial collaboration in Pages.

Microsoft PowerPoint: For presentations, you can use the PowerPoint Copilot feature to generate slides directly from your saved Word document or export the report as a presentation if that option is available in your interface.

New Export Formats: Depending on your current rollout version, you may also see options to export the report as a PDF, Infographic, or even an Audio Overview

NEW QUESTION # 50

What is the purpose of a recommendation system in AI?

- A. To forecast sales figures based on historical data
- **B. To suggest products, content, or services based on user preferences**
- C. To detect fraudulent transactions
- D. To optimize supply chain operations

Answer: B

Explanation:

Recommendation systems use algorithms to analyze past behaviors and preferences to suggest products, services, or content that users are likely to be interested in. Commonly used by e-commerce sites, streaming platforms, and digital content providers.

NEW QUESTION # 51

You need to access Microsoft 365 Copilot from a web browser. Which URL should you use?

- A. <https://copilotstudio.microsoft.com>
- B. <https://m365.cloud.microsoft>
- C. <https://myapps.microsoft.com>
- D. <https://myaccount.microsoft.com>

Answer: B

Explanation:

Microsoft 365 Copilot can be accessed via its dedicated web experience for enterprise users. The correct web entry point for Microsoft 365 Copilot is <https://m365.cloud.microsoft>, which provides authenticated access to Copilot features within the Microsoft 365 environment.

This URL routes users into the Microsoft 365 ecosystem where Copilot integrates with organizational data such as SharePoint, OneDrive, Teams, and Outlook. It ensures that users are authenticated through Microsoft Entra ID and that access controls are enforced according to tenant policies.

Option B refers to Copilot Studio, which is used to build and manage custom copilots and agents rather than access the Microsoft 365 Copilot chat experience. Option C (My Apps) is a general application launcher portal. Option D is an incorrect account management URL and does not provide Copilot access.

Therefore, to access Microsoft 365 Copilot from a web browser, the correct URL is <https://m365.cloud.microsoft>.

NEW QUESTION # 52

.....

You will also face your doubts and apprehensions related to the Microsoft AI Business Professional exam. Our Microsoft AB-730 practice test software is the most distinguished source for the Microsoft AB-730 Exam all over the world because it facilitates your practice in the practical form of the Microsoft AB-730 certification exam.
