Everyone's success is not easily obtained if without our CLO-002 study questions. Of course, they have worked hard, but having a competent assistant is also one of the important factors. And our CLO-002 Practice Engine is the right key to help you get the certification and lead a better life!

CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q430-Q435):

NEW QUESTION # 430

Which of the following would help an organization's IT department set their objectives and expectations for a cloud computing solution?

- A. Service Strategy
- B. Service Design
- C. Service Operation
- D. Service Transition

Answer: A

NEW QUESTION # 431

A company has hired a third party vendor to provide email and spam/anti-malware filtering services. The type of cloud service provided by the vendor is BEST described as which of the following?

- A. SaaS
- B. PaaS
- C. IaaS
- D. CaaS

Answer: A

NEW QUESTION # 432

An IT business analyst needs information to determine the key contributors and supporting business departments that will be involved in a large-scale cloud migration project. Which of the following is best used to gather this information?

- A. Technical gap analysis
- B. Benchmark metrics
- C. Feasibility study
- D. Stakeholder report

Answer: D

Explanation:

A stakeholder report identifies all the key contributors, departments, and individuals involved in a project, providing detailed information about their roles, responsibilities, and influence on the project's success. This is the best resource for understanding which business departments will be involved in the cloud migration project and what their contributions will be.

NEW QUESTION # 433

A company is adopting a public SaaS cloud based computing system to migrate a mission critical application. Which of the following capabilities will be MOST likely lost?

- A. Aversion of the software that will be accessed in the cloud.
- B. Centralized management of user access to the application.
- C. The ability to access the application from the internal company network.
- D. The ability to perform fine grained customizations to the software.

Answer: D

NEW QUESTION # 434

The cloud consumer compliance team requires the IT department to patch and update cloud resources properly. Which of the following cloud service delivery models will BEST suit this need?

- A. IaaS
- B. SaaS
- C. DBaaS

- Answer: A**

Infrastructure as a service (IaaS) is a cloud service delivery model that provides on-demand infrastructure resources to organizations via the cloud, such as compute, storage, networking, and virtualization⁴. IaaS is the most suitable cloud service delivery model for patching and updating cloud resources properly, as it gives the cloud consumer compliance team more control and flexibility over the operating system, middleware, virtual machines, and any apps or data⁵. IaaS also enables automation and orchestration of the provisioning process, as well as scalability and reliability of the infrastructure⁶.

IaaS vs PaaS vs SaaS vs DBaaS: Cloud Service Models Differences, The App Solutions PaaS vs IaaS vs SaaS: What's the difference?, Google Cloud CompTIA Cloud Essentials CLO-002 Certification Study Guide, Chapter 1: Cloud Computing Concepts, page 23
