2026 Latest Lead2PassExam AZ-800 PDF Dumps and AZ-800 Exam Engine Free Share: https://drive.google.com/open?id=11V9IQZUmryLcDMWE14gPBotGkwReuUzE

The Lead2PassExam AZ-800 PDF questions file, desktop practice test software, and web-based practice test software, all these three AZ-800 practice test questions formats are ready for instant download. Just download any Microsoft AZ-800 Exam Questions format and start this journey with confidence.

The Microsoft AZ-800 exam is intended for professionals who are responsible for managing and administering hybrid environments that include both on-premises and cloud infrastructures. AZ-800 exam tests the candidate's ability to implement and manage Windows Server workloads in Azure, integrate Azure services with Windows Server, and implement hybrid identity and security solutions.

Microsoft AZ-800 certification exam is designed for IT professionals who have expertise in administering Windows Server hybrid core infrastructure. AZ-800 Exam evaluates the candidate's ability to manage and operate Windows Server and Azure services, including Azure Arc, Azure Stack HCI, and Azure Stack Hub. Candidates who pass AZ-800 exam are recognized as skilled professionals who can effectively manage hybrid cloud environments and have a deep understanding of Windows Server technologies.

AZ-800 exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our AZ-800 latest question is absolutely good choices for you

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q82-Q87):

NEW QUESTION # 82
You have two on-premises servers named Server1 and Servet2 that run Windows Server.
You have an Azure Storage account named storage1 that contains a file share named share'. Server1 syncs with share1 by using Azure File Sync You need to configure Server2 to sync with share1.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - On Server2, install the Azure File Sync agent.
2 - Register Server2 with the Storage Sync Service.
3 - Add a server endpoint to the sync group.

NEW QUESTION # 83
Task 3
You need to create 3 user named Admin1 in contoso.com. Admin1 must be able to back up and restore files on SRV1. The solution must use principle of the least privilege.

Answer:

Explanation:
See the solution of this Task below.
Explanation:
TASK 3
Objective:
* Create a user named Admin1 in contoso.com.
* Admin1 must be able to back up and restore files on SRV1.
* Follow the principle of least privilege.
Step-by-Step Guide
Step 1: Create the User Account
* Log in to a Domain Controller (e.g., DC1) with appropriate admin rights.
* Open Active Directory Users and Computers (dsa.msc).
* In the contoso.com domain:
* Right-click the Users container or another OU where you want to create the account.
* Select New > User.
* Enter the following:
* First name: Admin1
* User logon name: Admin1
* Click Next and set a password (ensure it meets the domain's password policy).
* Configure password options (e.g., User must change password at next logon, if required).
* Click Finish.
# Step 2: Grant Backup and Restore Rights on SRV1
By default, Backup Operators have the ability to back up and restore files (without giving full admin rights).
* Log in to SRV1 (the target server).
* Open Computer Management (compmgmt.msc).
* In the left pane, expand:
* System Tools > Local Users and Groups > Groups.

* Find and double-click the Backup Operators group.
* Click Add.
* In the Select Users, Computers, Service Accounts, or Groups window:
* Type Admin1.
* Click Check Names to resolve the user.
* Click OK to add Admin1 to the group.
* Click OK again to close the Backup Operators group properties.
# Step 3: Verify Access
* Log in as Admin1 on SRV1 and test performing backup and restore operations using tools like Windows Server Backup.
* Since Backup Operators can back up and restore data but do not have full administrative privileges, this follows the least privilege principle.
# Additional Notes
* If you prefer using PowerShell, you can add the user to the group like this on SRV1:
Add-LocalGroupMember -Group "Backup Operators" -Member "contoso\Admin1"

NEW QUESTION # 84
You have an on-premises server that runs Windows Server and contains a file share named Share1.
You have an Azure subscription that contains an Azure Files share named azshare1 and an Azure File Sync instance named Synd.
Sync1 syncs Share1 with azshare1.
You need to delete Synd.
Which four resources should you delete in sequence? To answer, move the appropriate resources from the list of resources to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 85
You have a server named Server1 that runs Windows Server Server1 has a just-a-bunch-of-disks (JBOD) enclosure attached.
You plan to create a storage pool on Server1 and a virtual disk that will use a mirror layout.
You are considering whether to use a two-way or a three-way mirror layout.
What is the minimum number of disks required for each type of minor layout? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 86
Your network contains an Active Directory domain, a web app named App1, and a perimeter network. The perimeter network contains a server named Server1 that runs Windows Server.
You plan to provide external access to App1.
You need to implement the Web Application Proxy role service on Server1.
Which role should you add to Server1, and which role should you add to the network? To answer, drag the appropriate roles to the correct targets. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

NEW QUESTION # 87
