

Quiz 2026 Salesforce MuleSoft-Integration-Architect-I: High Hit-Rate Salesforce Certified MuleSoft Integration Architect I Dumps Reviews

2026 Latest Dumps Valid MuleSoft-Integration-Architect-I PDF Dumps and MuleSoft-Integration-Architect-I Exam Engine Free Share: <https://drive.google.com/open?id=1AuYVZ3rZxgV6jxQHt32W2gMNI-d9mJjU>

Dumps Valid field is leaping up day by day and more people are pursuing it as a career than ever. Due to these reasons, candidates find it difficult to land their dream job and often face difficulty in finding the right career opportunities. But to overcome this issue, the MuleSoft-Integration-Architect-I Exam is introduced by Salesforce that provides candidates with a sustainable platform to examine their true capabilities and surf through their desired opportunities.

Salesforce MuleSoft-Integration-Architect-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Designing Automated Tests for Mule Applications: This topic covers unit test suites, and scenarios for integration and performance testing.
Topic 2	<ul style="list-style-type: none">Applying DevOps Practices and Operating Integration Solutions: Its sub-topics are related to designing CICD pipelines with MuleSoft plugins, automating interactions with Anypoint Platform, designing logging configurations, and identifying Anypoint Monitoring features.
Topic 3	<ul style="list-style-type: none">Designing Integration Solutions to Meet Reliability Requirements: It includes selecting alternatives to traditional transactions, recognizing the purpose of various scopes and strategies, differentiating disaster recovery and high availability, and using local and XA transactions.
Topic 4	<ul style="list-style-type: none">Designing Integration Solutions to Meet Security Requirements: This topic emphasizes securing access to the Anypoint Platform and APIs, using Anypoint Security, counteracting security vulnerabilities, and understanding audit logging capabilities.
Topic 5	<ul style="list-style-type: none">Designing and Developing Mule Applications: It includes selecting application properties, using fundamental features, designing with core routers, understanding the Salesforce Connector, and leveraging core connectors.

Topic 6	<ul style="list-style-type: none"> • Designing for the Runtime Plane Technology Architecture: It includes analyzing Mule runtime clusters, designing solutions for CloudHub, choosing Mule runtime domains, leveraging Mule 4 class loader isolation, and understanding the reactive event processing model.
Topic 7	<ul style="list-style-type: none"> • Designing Integration Solutions to Meet Performance Requirements: This topic covers meeting performance and capacity goals, using streaming features, and processing large message sequences.
Topic 8	<ul style="list-style-type: none"> • Initiating Integration Solutions on Anypoint Platform: Summarizing MuleSoft Catalyst and Catalyst Knowledge Hub, differentiating between functional and non-functional requirements, selecting features for designing and managing APIs, and choosing deployment options are its sub-topics.
Topic 9	<ul style="list-style-type: none"> • Designing Architecture Using Integration Paradigms: This topic focuses on creating high-level integration architectures using various paradigms. It includes API-led connectivity, web APIs and HTTP, event-driven APIs, and message brokers, and designing Mule application using messaging patterns and technologies.

Study MuleSoft-Integration-Architect-I Material, MuleSoft-Integration-Architect-I Study Guide Pdf

About the oncoming MuleSoft-Integration-Architect-I exam, every exam candidates are wishing to utilize all intellectual and technical skills to solve the obstacles ahead of them to go as well as it possibly could. So the pending exam causes a panic among the exam candidates. The help of our MuleSoft-Integration-Architect-I Exam prepare is just in time. In the present posture, our MuleSoft-Integration-Architect-I study materials are your best choice. We provide you with excellent prepare materials for you to pass the exam and get the certification.

Salesforce Certified MuleSoft Integration Architect I Sample Questions (Q75-Q80):

NEW QUESTION # 75

A Mule application is deployed to a cluster of two(2) customer-hosted Mule runtimes. Currently the node name Alice is the primary node and node named bob is the secondary node. The mule application has a flow that polls a directory on a file system for new files.

The primary node Alice fails for an hour and then restarted.

After the Alice node completely restarts, from what node are the files polled, and what node is now the primary node for the cluster?

- A. Files are polled from Alice node
Alice is now the primary node
- B. Files are polled from Bob node
Alice is now the primary node
- **C. Files are polled from Bob node
Bob is now the primary node**
- D. Files are polled from Alice node
Bob is now the primary node

Answer: C

Explanation:

* Mule High Availability Clustering provides basic failover capability for Mule. * When the primary Mule Runtime becomes unavailable, for example, because of a fatal JVM or hardware failure or it's taken offline for maintenance, a backup Mule Runtime immediately becomes the primary node and resumes processing where the failed instance left off * After a system administrator recovers a failed Mule Runtime server and puts it back online, that server automatically becomes the backup node. In this case, Alice, once up, will become backup -----

----- Reference: <https://docs.mulesoft.com/mule-runtime/4.3/hadr-guide> So correct choice is : Files are polled from Bob node Bob is now the primary node

NEW QUESTION # 76

An organization is migrating all its Mule applications to Runtime Fabric (RTF). None of the Mule applications use Mule domain projects.

Currently, all the Mule applications have been manually deployed to a server group among several customer hosted Mule runtimes. Port conflicts between these Mule application deployments are currently managed by the DevOps team who carefully manage Mule application properties files.

When the Mule applications are migrated from the current customer-hosted server group to Runtime Fabric (RTF), fo the Mule applications need to be rewritten and what DevOps port configuration responsibilities change or stay the same?

- A. Yes, the Mule applications Must be rewrittenDevOps Must Still Manage port conflicts.
- **B. NO, The Mule applications do NOT need to be rewrittenDevOps MUST STILL manage port conflicts**
- C. NO, the Mule applications do NO need to be rewrittenDevOps NO LONGER needs to manage port conflicts between the Mule applications.
- D. Yes, the Mule applications Must be rewrittenDevOps No Longer needs to manage port conflicts between the Mule applications

Answer: B

Explanation:

* Anypoint Runtime Fabric is a container service that automates the deployment and orchestration of your Mule applications and gateways.

* Runtime Fabric runs on customer-managed infrastructure on AWS, Azure, virtual machines (VMs) or bare- metal servers.

* As none of the Mule applications use Mule domain projects. applications are not required to be rewritten.

Also when applications are deployed on RTF, by default ingress is allowed only on 8081.

* Hence port conflicts are not required to be managed by DevOps team

NEW QUESTION # 77

A travel company wants to publish a well-defined booking service API to be shared with its business partners. These business partners have agreed to ONLY consume SOAP services and they want to get the service contracts in an easily consumable way before they start any development. The travel company will publish the initial design documents to Anypoint Exchange, then share those documents with the business partners. When using an API-led approach, what is the first design document the travel company should deliver to its business partners?

- A. Create a SOAP API specification in Design Center
- B. Create a RAML API specification using any text editor
- C. Create an OAS API specification in Design Center
- **D. Create a WSDL specification using any XML editor**

Answer: D

Explanation:

SOAP API specifications are provided as WSDL. Design center doesn't provide the functionality to create WSDL file. Hence WSDL needs to be created using XML editor

NEW QUESTION # 78

An organization heeds to procure an enterprise software system to increase cross-selling opportunities and better rack prospect data.

Which category of enterprise software has these core capabilities, when used for its typical and intended purpose?

- A. Business-to-Business (A2B)
- B. Supply Chain Management (SCM)
- C. IT Service Management (ITSM)
- **D. Customer Relationship Management (CRM)**

Answer: D

Explanation:

Customer Relationship Management (CRM) systems are designed to manage a company's interactions with current and potential customers. They provide capabilities for tracking prospect data, managing customer interactions, and analyzing customer information

to improve cross-selling opportunities. By using a CRM system, organizations can consolidate customer information, enhance customer relationships, and leverage data analytics to drive sales and marketing efforts.

References:

- * What is CRM?
- * Benefits of CRM Systems

NEW QUESTION # 79

Refer to the exhibit.

An organization uses a 2-node Mule runtime cluster to host one stateless API implementation. The API is accessed over HTTPS through a load balancer that uses round-robin for load distribution.

Two additional nodes have been added to the cluster and the load balancer has been configured to recognize the new nodes with no other change to the load balancer.

What average performance change is guaranteed to happen, assuming all cluster nodes are fully operational?

- A. 50% reduction in the response time of the API
- B. 100% increase in the throughput of the API
- C. 50% reduction in the JVM heap memory consumed by each node
- D. 50% reduction in the number of requests being received by each node

Answer: D

NEW QUESTION # 80

.....

Owning DumpsValid is to have a key to pass MuleSoft-Integration-Architect-I exam certification. DumpsValid's MuleSoft-Integration-Architect-I exam certification training materials is the achievement that our IT elite team take advantage of their own knowledge and experience, and grope for rapid development and achievements of the IT industry. Its authority is undeniable. Before purchase DumpsValid's MuleSoft-Integration-Architect-I Braindumps, you can download MuleSoft-Integration-Architect-I free demo and answers on probation on DumpsValid.COM.
