ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q192-Q197):

NEW QUESTION # 192

As a Test Manager, which one of the following do you think is the MOST important reason for ensuring effective processes are in place for test monitoring and reporting?

SELECT ONE OPTION

- A. Reporting numbers of defects shows how effective the test team are.
- B. The test report determines if a system can be deployed to live.
- C. It allows for easier and more effective evaluation of exit criteria
- D. keeps stakeholders informed and prevents lots of meetings.

Answer: C

NEW QUESTION # 193

Your company specialises in offering travel insurance policies to the over 60 age bracket. It is starting a new project to modernise the design of its website, which is seen to be inferior to its competitors. The project will use a SCRUM software development methodology.

As senior test manager for your company, you have been asked to identify three test analysts to join the SCRUM development team. There are a number of testers currently not allocated to projects who would be available, all of them have been with the company for a number of years, although some have little or no experience in iterative development.

You must assess their current skillsets to determine whether any of them possess skills that would be of particular relevance for the new project. Which TWO of the following skills should you focus on in your assessment?

- A. Professional competence - technical expertise to implement automated tests and performing exploratory testing
- B. Methodological competence - the ability to analyse the test basis and deal with product risks
- C. Professional competence - having business domain expertise in travel insurance
- D. Professional competence - coaching and mentoring others to understand SCRUM theory and good practice
- E. Personal competence - a high level of self-management and discipline

Answer: A,E

Explanation:

In Agile environments, ISTQB emphasizes testers having technical expertise (e.g., test automation, exploratory testing) and personal skills like self-management and discipline. These qualities enable the tester to operate effectively in a collaborative, fast-paced Agile team.

NEW QUESTION # 194

What is a "depth-first" risk-based testing technique? [1]

- A. All risk items are tested at least once
- B. Lowest risk test cases are executed first
- C. Non-functional test cases are executed first
- D. Highest risk test cases are executed first

Answer: D

Explanation:

A depth-first risk-based testing technique is a method of prioritizing and executing test cases based on the risk level of the features or functions to be tested. In this technique, the test cases with the highest risk are executed first, followed by the test cases with lower risks. This ensures that the most critical and likely areas of failure are tested thoroughly and early in the testing process. NEW QUESTION # 195

Given the following figures for the testing on a project, and assuming the failure rate for initial tests remains constant and that all retests pass, what number of tests remain to be run? 3 credits

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

NEW QUESTION # 196

Refer to SCENARIO 2 It has been agreed that the following test planning documents will be produced;

- * A single overarching document outlining the general testing methodology for the whole programme of work
- * A subordinate test plan for each of the three projects

* A separate test plan for performance testing within each project

Which one of the following options BEST describes the type of test management document that will meet the programme requirements?

- **A. Option 3.**
- B. Option 1.
- C. Option 2.
- D. Option 4.

Answer: A

NEW QUESTION # 197

.....
