

Free PDF Quiz The Open Group - OGEA-101 Latest Authorized Test Dumps

BTW, DOWNLOAD part of Dumpkiller OGEA-101 dumps from Cloud Storage: <https://drive.google.com/open?id=1N9UhsYNWVT77mZS1xn-0dWbVUpjTHQix>

Dumpkiller is a reputable and highly regarded platform that provides comprehensive preparation resources for the TOGAF Enterprise Architecture Part 1 Exam (OGEA-101). For years, Dumpkiller has been offering real, valid, and updated OGEA-101 Exam Questions, resulting in numerous successful candidates who now work for renowned global brands.

If you fail OGEA-101 exam unluckily, don't worry about it, because we provide full refund for everyone who failed the exam. You can ask for a full refund once you show us your unqualified transcript to our staff. The whole process is time-saving and brief, which would help you pass the next OGEA-101 Exam successfully. Please contact us through email when you need us. Our purchasing process is designed by the most professional experts, that's the reason why we can secure your privacy while purchasing our OGEA-101 test guide.

Use OGEA-101 Exam Questions [2026]-Forget About Failure

Dear everyone, you can download the OGEA-101 free demo for a little try. If you are satisfied with the OGEA-101 exam torrent, you can make the order and get the latest OGEA-101 study material right now. Our OGEA-101 training material comes with 100% money back guarantee to ensure the reliable and convenient shopping experience. The accurate, reliable and updated The Open Group OGEA-101 study torrent are compiled, checked and verified by our senior experts, which can ensure you 100% pass.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

Consider the following statements:

1. Groups of countries, governments, or governmental organizations (such as militaries) working together to create common or shareable deliverables or infrastructures

2. Partnerships and alliances of businesses working together, such as a consortium or supply chain What are those examples of according to the TOGAF Standard?

- A. Architectures Scopes
- B. Enterprises
- C. Organizations
- D. Business Units

Answer: A

Explanation:

According to the TOGAF standard, the two statements provided refer to different scopes within which architecture can be developed:

Groups of countries, governments, or governmental organizations working together typically align with broader, often international, scopes of architecture that transcend individual enterprise boundaries.

Partnerships and alliances of businesses working together, such as a consortium or supply chain, refer to collaborative efforts that can define architecture at a scope involving multiple enterprises.

In both cases, the term "Architectures Scopes" is appropriate because it reflects the varying levels and contexts in which architectures can be defined, ranging from single business units to collaborative inter-organizational efforts.

NEW QUESTION # 57

Complete the sentence. The purpose of the Gap Analysis technique is to

- A. validate the architecture
- B. establish quality metrics for the architecture
- C. identify non-functional requirements for the architecture
- D. determine service levels for the architecture

Answer: A

Explanation:

Gap Analysis in TOGAF is a technique used to compare the baseline architecture (current state) with the target architecture (future desired state). The output is a set of gaps, representing what is missing or what must change to move from baseline to target. These gaps help validate that the target architecture is adequate:

by identifying what is not addressed, architects can ensure that all required functionality, constraints, and transformation paths are captured. In effect, Gap Analysis validates the architecture by exposing omissions, inconsistencies, or unmet requirements between what is and what should be. It is not primarily about defining service levels, non-functional requirements, or quality metrics (though it helps inform those). Rather, its main role is in validating and guiding closure of architectural gaps.

NEW QUESTION # 58

Complete the following sentence:

Presenting different _____ and _____ to stakeholders helps architects to extract hidden agendas principles and requirements that could impact the final Target Architecture

- A. Business Scenarios Business Models
- B. Architecture Views Architecture Viewpoints
- C. Alternatives Trade-offs
- D. Solutions Applications

Answer: B

Explanation:

According to the TOGAF Standard, an architecture view is a representation of a system from the perspective of a related set of concerns¹. An architecture viewpoint is a specification of the conventions for a particular kind of architecture view¹. Presenting different architecture views and architecture viewpoints to stakeholders helps architects to extract hidden agendas, principles, and requirements that could impact the final target architecture. This is because different stakeholders may have different concerns and interests in the system, and by showing them how the system addresses their concerns from different perspectives, the architects can elicit more feedback and validation from them². For example, a business stakeholder may be interested in the business architecture view, which focuses on the business processes, functions, and capabilities of the system³. A security stakeholder may be interested

in the enterprise security view, which addresses the security aspects of the system, such as confidentiality, integrity, and availability³. By presenting these views to the respective stakeholders, the architects can ensure that the system meets their expectations and needs, and also identify any potential issues or gaps that may affect the target architecture. NEW QUESTION # 59

Complete the following sentence. In the ADM documents which are under development and have not undergone any formal review and approval process are _____.

- A. In between phases
- B. Called "draft"
- C. Known as "Version 0.1"
- D. Invalid

Answer: B

Explanation:

In the ADM documents which are under development and have not undergone any formal review and approval process are called "draft". This indicates that they are subject to change and refinement as the architecture development progresses. Reference: The TOGAF Standard | The Open Group Website, Section 4.2.5 Architecture Deliverables.

NEW QUESTION # 60

Consider the following ADM phases objectives.

Objective

1-Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value

2-Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

3-Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

4-Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders Which phase does each objective match?

- A. 1E-2E-3F-4F
- B. 1F-2E-3F-4G
- C. 1G-2E-3F-4F
- D. 1E-2F-3E-4F

Answer: C

Explanation:

According to the TOGAF standard, the objectives of each ADM phase are as follows¹:

*Phase E: Opportunities and Solutions

oDetermine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value
oIdentify and group major work packages within the Architecture Roadmap
oIdentify and group major implementation projects to realize the Architecture Roadmap
oIdentify dependencies between increments and projects
oEstimate cost, benefit, and risk at a high level for each increment and project
oConduct initial prioritization and sequencing of the Architecture Roadmap and projects

*Phase F: Migration Planning

oGenerate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D
oConfirm the Transition Architectures with relevant stakeholders
oCreate the Implementation and Migration Plan, including Transition Architectures, work packages, projects, and other activities
oConfirm and agree the Architecture Roadmap and Implementation and Migration Plan with relevant stakeholders

*Phase G: Implementation Governance

oFinalize the Architecture Roadmap and the supporting Implementation and Migration Plan
oEnsure conformance with the Target Architecture by implementation projects
oPerform appropriate Architecture Governance functions for the solution and any implementation-driven architecture Change Requests
oEnsure that the architecture lifecycle is maintained
oEnsure that the Architecture Governance Framework is executed

***Phase H: Architecture Change Management**

oEnsure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
oManage risks and issues related to the Architecture Roadmap and Implementation and Migration Plan
oMonitor the implementation projects and Transition Architectures
oManage changes to the architecture baseline
oManage changes to the Architecture Capability
Therefore, the correct matching of the objectives and the phases is:

*1G: Determine whether an incremental approach is required, and if so identify Transition Architectures that will deliver continuous business value

*2E: Generate the initial complete version of the Architecture Roadmap, based upon the gap analysis and candidate Architecture Roadmap components from Phases B, C, and D

*3F: Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan

*4F: Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
