Covers 100% of All Objectives for the Latest C_SEC_2405 Composite Exams.

As is known to us, our company has promised that the C_SEC_2405 exam braindumps from our company will provide more than 99% pass guarantee for all people who try their best to prepare for the exam. If you are preparing for the exam by the guidance of the C_SEC_2405 study practice question from our company and take it into consideration seriously, you will absolutely pass the exam and get the related certification. So do not hesitate and hurry to buy our study materials.

SAP C_SEC_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
Topic 2	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 3	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 4	• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.

Topic 5	• Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.

We are confident that our SAP C_SEC_2405 training online materials and services are competitive. We are trying to offer the best high passing-rate SAP C_SEC_2405 Training Online materials with low price. Our C_SEC_2405 exam materials will help you pass exam one shot without any doubt.

SAP Certified Associate - Security Administrator Sample Questions (Q54-Q59):

NEW QUESTION # 54
What are some of the rules for SAP-developed roles in SAP S/4HANA Cloud Public Edition? Note: There are 3 correct answers to this question.

- A. Role maintenance reads applications from role menus.
- B. Manual role authorizations are supported in custom catalogs.
- C. Role maintenance reads applications from a catalog.
- D. Authorization defaults define role authorizations.
- E. Catalogs are assigned to role menus.

Answer: C,D,E

Explanation:
SAP-developed roles in SAP S/4HANA Cloud Public Edition follow specific rules to ensure standardized and secure access management. Role maintenance reads applications from a catalog, meaning that roles are built by incorporating apps and tiles from predefined business catalogs, which group related functionalities.
Authorization defaults define role authorizations, as SAP provides default authorization values for applications within these catalogs, ensuring consistent and secure permission assignments. Additionally, catalogs are assigned to role menus, allowing roles to include entire sets of applications and their associated authorizations, streamlining role configuration. Manual role authorizations in custom catalogs (option C) are not supported for SAP-developed roles, as these rely on predefined configurations. Role maintenance does not read applications from role menus (option B), as menus are an output of the catalog assignment process.
These rules ensure that SAP-developed roles are efficient, secure, and aligned with business processes, providing a robust framework for access control in SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 55
What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.
- B. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".
- C. Assign the authorization object to be checked to the chosen transaction code in the SAP
- D. Assign authorization object S_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.

Answer: D

NEW QUESTION # 56
Which of the following are SAP Fiori Launchpad functionalities? Note: There are 2correct answers to this question.

- A. SAP GUI
- B. User Actions Menu
- C. Web Dynpro
- D. Spaces

Answer: B,D

Explanation:
* Context:SAP Fiori Launchpad provides a unified and customizable user interface for accessing Fiori applications.
* Solution Descriptions:
* A. Spaces:Allow the structuring of content in a user-friendly manner.
* D. User Actions Menu:Enables user-specific actions such as changing passwords or managing settings.
SAP Security References:
* SAP Fiori Launchpad Configuration Guide
* SAP Help Portal for Fiori Launchpad Features

NEW QUESTION # 57
Which levels of security protection are provided by Secure Network Communication (SNC)? Note: There are 3correct answers to this question.

- A. Privacy
- B. Authentication
- C. Integrity
- D. Authorization
- E. Availability

Answer: A,B,C

Explanation:
* Context:Secure Network Communication (SNC) enhances security for communication between SAP systems by providing various protections.
* Solution Descriptions:
* Authentication:Confirms the identities of communicating parties.
* Integrity:Ensures data has not been altered during transmission.
* Privacy:Encrypts data to prevent unauthorized access.
SAP Security References:
* SAP SNC Configuration Guide
* SAP Help Portal for SNC Features

NEW QUESTION # 58
Which archiving objects are relevant for archiving change documents for user master records? Note: There are 2 correct answers to this question.

- A. US_AUTH
- B. US_USER
- C. US_PASS
- D. US_PROF

Answer: B,C

Explanation:
In SAP systems, archiving change documents for user master records involves specific archiving objects to manage historical data efficiently. The archiving object US_PASS is used to archive changes related to user passwords, such as password resets or updates, which are critical for tracking user account modifications.
Similarly, US_USER is used to archive changes to user master records, including details like user IDs, names, and group

assignments, ensuring a comprehensive record of user profile modifications. These objects allow administrators to store historical data securely while freeing up system resources. In contrast, US_AUTH is related to authorization assignments, not user master record changes, and US_PROF deals with profile assignments, which are separate from user master data. By using US_PASS and US_USER, SAP ensures that changes to sensitive user information are preserved for audit and compliance purposes, supporting security governance in large-scale SAP environments. This archiving process helps maintain system performance while retaining essential historical data for regulatory and forensic analysis.
