

Prepare Your VMware 2V0-17.25 Exam with Real VMware 2V0-17.25 100% Accuracy Easily

BONUS!!! Download part of TopExamCollection 2V0-17.25 dumps for free: <https://drive.google.com/open?id=1428xYdzbCULrIhpMATWSeSMeYh2npg7>

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our 2V0-17.25 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for VMware exams, thus inspiring them obtain the targeted 2V0-17.25 certificate successfully. There are many advantages of our 2V0-17.25 question torrent that we are happy to introduce you and you can pass the exam for sure.

Our professionals have gained an in-depth understanding of the fundamental elements that combine to produce world class 2V0-17.25 practice materials for all customers. So we can promise that our study materials will be the best study materials in the world. Our products have a high quality. If you decide to buy our 2V0-17.25 Exam Braindumps, we can make sure that you will have the opportunity to enjoy the 2V0-17.25 study guide from team of experts.

>> 2V0-17.25 100% Accuracy <<

Efficient VMware - 2V0-17.25 100% Accuracy

The high quality and high efficiency of our 2V0-17.25 exam materials has helped many people pass exams quickly. And we can proudly claim that if you study with our 2V0-17.25 study questions for 20 to 30 hours, then you can confidently pass the exam for sure. After our worthy customers get a 2V0-17.25 certificate, they now have more job opportunities. The current situation is very serious. Selecting 2V0-17.25 training guide is your best decision.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q44-Q49):

NEW QUESTION # 44

Which of the following best describes how DRS and HA complement each other in a VMware cluster?

- A. DRS continuously replicates VM data, while HA handles monitoring
- **B. HA restarts VMs on another host after a failure, while DRS balances workload**
- C. DRS ensures VM uptime, while HA balances CPU and memory usage
- D. HA is only used for manual migrations, while DRS is automatic

Answer: B

Explanation:

High Availability (HA) protects against host failures by restarting VMs on other hosts, while DRS balances CPU and memory

resources across hosts to optimize performance.

NEW QUESTION # 45

Which strategies or features might help secure a vSphere environment against unauthorized configuration changes and attacks?

- A. Using vSphere Configuration Encryption
- B. Enabling DRS for automated cluster balancing
- C. Configuring Lockdown Mode on ESXi hosts
- D. Restricting direct host access via DCUI and SSH

Answer: C,D

Explanation:

Lockdown Mode limits direct host access (A), and restricting the DCUI/SSH (D) reduces the attack surface. DRS (B) is for resource balancing, and there is no feature called "vSphere Configuration Encryption" (C). You can encrypt VMs or vSAN, but not the entire configuration in that manner.

NEW QUESTION # 46

An administrator successfully removed a host from a VMware vSphere cluster and decommissioned it in SDDC Manager. What must be done before the host can be recommissioned and added back to the SDDC Manager inventory?

- A. Log in to the host console and select "Reset System Configuration" from the ESXi DCUI.
- B. Reinstall ESXi on the host.
- C. Manually uninstall the NSX VIBs on the host.
- D. From the host console, use the /sbin/generate-certificates command to generate a new self-signed certificate.

Answer: A

Explanation:

Before the host can be recommissioned and added back to the SDDC Manager inventory, you must reset the system configuration. This can be done from the ESXi Direct Console User Interface (DCUI) by selecting the "Reset System Configuration" option. This will remove any previous configuration and allow the host to be re-added to the environment.

NEW QUESTION # 47

An administrator needs to scale an NSX Edge cluster by adding additional Edge nodes. Which three steps must be taken before scaling an Edge cluster from SDDC Manager? (Choose three.)

- A. Verify DNS records have been added for each new Edge node.
- B. Add an additional NSX VDS uplink for each Edge node being added.
- C. Assign two Tunnel Endpoint (TEP) addresses for each Edge node.
- D. Place the Edge cluster in maintenance mode prior to expanding.
- E. Assign a unique management IP for each Edge node.

Answer: A,C,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

When scaling an NSX Edge cluster in VMware Cloud Foundation using SDDC Manager, the following preparatory steps are explicitly required as per the official documentation:

Assign a unique management IP for each Edge node (A): Each new Edge node must have its own unique management IP address for proper identification and network communication.

Assign two Tunnel Endpoint (TEP) addresses for each Edge node (B): Two TEP addresses are needed for overlay network connectivity to ensure redundancy and optimal traffic flow.

Verify DNS records have been added for each new Edge node (D): Proper DNS records must exist for management and operational connectivity, as DNS resolution is critical for Edge node communication and cluster integration.

Adding uplinks or placing the Edge cluster in maintenance mode are not prerequisites for adding new Edge nodes, according to the preparation requirements detailed in VMware documentation.

NEW QUESTION # 48

Which option allows administrators to quickly revert to a consistent VM state prior to a major software installation or patching within the guest OS?

- A. Storage vMotion
- B. VM Encryption
- **C. VM Snapshots**
- D. vSphere Replication

Answer: C

Explanation:

VM Snapshots capture the VM's state (disk and memory) for easy rollback. Replication (A) copies VMs to a remote site, Storage vMotion (C) migrates the VM's disk to another datastore, and Encryption (D) secures data but isn't used for rollback.

NEW QUESTION # 49

.....

The TopExamCollection 2V0-17.25 exam practice test questions provide a way to assess your understanding of the material, identify areas for improvement, and build confidence and test-taking skills. The TopExamCollection 2V0-17.25 exam practice test questions are real and verified by VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam trainers. They work collectively and strive hard to ensure the top standard of VMware Cloud Foundation 9.0 Administrator (2V0-17.25) exam practice questions all the time.

Passing 2V0-17.25 Score: <https://www.topexamcollection.com/2V0-17.25-vce-collection.html>

Nearly 60% of our business comes from repeat business and personal recommendation so that we become an influential company in providing best 2V0-17.25 Prep4sure materials, VMware 2V0-17.25 100% Accuracy Don't hesitate, just choose our Real4dumps, pass your exam, get the IT certificate and have a good development in your IT career, When it comes to our 2V0-17.25 learning brandumps, you don't need to be afraid of that since we will provide free demo for you before you decide to purchase them.

Network and Transport Layers, Be Your Body's Boss, Nearly 60% of our business comes from repeat business and personal recommendation so that we become an influential company in providing best 2V0-17.25 Prep4sure materials.

Unparalleled 2V0-17.25 100% Accuracy – 100% Marvelous Passing VMware Cloud Foundation 9.0 Administrator Score

Don't hesitate, just choose our Real4dumps, pass your 2V0-17.25 Training Solutions exam, get the IT certificate and have a good development in your IT career, When it comes to our 2V0-17.25 learning brandumps, you don't need to be afraid of that since we will provide free demo for you before you decide to purchase them.

It means you don't need to download or install any software 2V0-17.25 or plugins to take the VMware Cloud Foundation 9.0 Administrator practice test, The system we design has strong compatibility.
