NEW QUESTION # 178

The finance director at Cloud Kicks asks the administrator for an exception report that shows all B2C accounts that are missing the credit card number. The credit card number is a classic encrypted field.

What action should the administrator take to meet this requirement?

- A. Create a summary report that includes a cross-filter to the Account object with a sub-filter for credit card number equal to null.
- B. Unmask the encrypted credit card number field to make it available and add a custom filter to a report where credit card number is blank.
- C. Build a custom checkbox called Has Credit Card' that Finance checks when a credit card is recorded and a tabular report filtered on the checkbox equal to false.
- D. Add 'View Encrypted Fields' to a permission set assigned to Finance and system administrators and a summary report filtered by credit card number.

Answer: A

Explanation:

A summary report with a cross-filter is a type of report that allows you to summarize data by grouping rows and columns and applying filters based on related objects and fields. A cross-filter is a filter that lets you include or exclude records in your report based on related objects and their fields. In this case, you can create a summary report that includes a cross-filter to the Account object with a sub-filter for credit card number equal to null. This will show you all B2C accounts that are missing the credit card number, regardless of whether it is encrypted or not.
