MC-202 PDF & Composite Test MC-202 Price

We believe that the best brands are those that go beyond expectations. They don't just do the job – they go deeper and become the fabric of our lives. Therefore, our company as the famous brand, even though we have been very successful we have never satisfied with the status quo, and always be willing to constantly update the contents of our MC-202 Exam Torrent in order to keeps latest information about MC-202 exam

Salesforce Certified Marketing Cloud Email Specialist Sample Questions (Q99-Q104):

NEW QUESTION # 99

The website team at North Trail Outfitter has noticed performance issues on the site when the marketing team sends promotional emails.

What should the marketer do to prevent this problem?

- A. Configure Send Throttling.
- B. Use Delayed Delivery
- C. Segment email sends by domain.

Answer: A

Explanation:

Send Throttling allows marketers to control the rate at which emails are sent, thereby preventing performance issues on the website caused by sudden spikes in traffic. By configuring send throttling, Northern Trail Outfitters can spread out the email send over a period of time, reducing the load on their website. For detailed information, refer to the Send Throttling documentation.

NEW QUESTION # 100

Northern Trail Outfitters (NTO) needs a quick listing of all emails sent from the past calendar year across all business units. It should include basic metrics for each send.

Which out-of-the-box report provides what NTO needs?

- A. Account Send Summary
- B. Email Sends by User
- C. Email Performance Over Time

Answer: A

Explanation:

Reference: Salesforce Marketing Cloud Documentation on Account Send Summary Report

NEW QUESTION # 101

An insurance company has launched a new campaign to target individuals between 64 and 65 that are not yet enrolled and are opted into email. All subscriber data is stored in one data extension.

How should the marketer use low-code to create this segment?

- A. Filter the .csv file before import.
- B. Write a query to create a filtered data extension.
- C. Create a data filter on the data extension.

Answer: C

Explanation:

Creating a data filter on the data extension is a low-code solution that allows marketers to segment their audience based on specific criteria. In this case, the marketer can easily filter subscribers aged 64 to 65 who are opted into email. Data filters are part of Salesforce Marketing Cloud's standard tools for segmentation and are explained in detail in the platform's documentation on creating and managing data filters.

NEW QUESTION # 102

A marketer has created a primary data extension that contains all active subscribers with fields containing key demographics and subscriber attributes. Each week, there are up to 10 teams that send to segments of their subscriber base.

What should they use to ensure they have fresh data for these sends?

- A. A verification step in the send automation
- B. An approval process for sending
- C. A nightly automation with a filter activity

Answer: C

Explanation:

To ensure fresh data for the sends, setting up a nightly automation that includes a filter activity is recommended. This automation can refresh the data extension by applying the necessary filters to pull the most up-to-date information from the primary data extension. This process ensures that each team has access to the latest subscriber data for their segmented sends. Reference: Salesforce Marketing Cloud Documentation on Automation Studio.

NEW QUESTION # 103

A marketer has built an automation using Automation Studio to send data from a data extension to the SFTP as a .csv file. The automation includes a data extract and completes successfully, but the file is still not showing up on the SFTP.

Which activity is missing?

- A. File Transfer
- B. Fire Event
- C. Import File

Answer: A

Explanation:

If the file is not showing up on the SFTP after a successful data extract, the missing activity is likely the File Transfer activity. This activity is responsible for moving the extracted .csv file to the appropriate directory on the SFTP server. Without this step, the file will not be transferred to the SFTP location.
