

DA0-002 Praxisprüfung, DA0-002 Buch

2026 Die neuesten ITZert DA0-002 PDF-Versionen Prüfungsfragen und DA0-002 Fragen und Antworten sind kostenlos verfügbar: https://drive.google.com/open?id=11eL78tYo6og2weRUc8Eju9hUE_QmRY4_

Wenn Sie die Fragen und Antworten zur CompTIA DA0-002 Zertifizierungsprüfung kaufen, können Sie nicht nur die CompTIA DA0-002 Zertifizierungsprüfung erfolgreich bestehen, sondern einen einjährigen kostenlosen Update-Service genießen. Falls Sie in der Prüfung durchfallen, zahlen wir Ihnen die gesamte Summe zurück. Sie können im Internet teilweise die Fragen und Antworten zur CompTIA DA0-002 Zertifizierungsprüfung kostenlos als Probe herunterladen, um die Zuverlässigkeit unserer Produkte zu prüfen.

ITZert hat schon einen guten Ruf in vielen Zertifizierungsbranchen erhalten, weil wir die Testfragen, die Lernhilfe und Dumps zur DA0-002 Zertifizierungsprüfung haben. Zur Zeit als der professionellste Anbieter im Internet bieten wir perfekten Kundenservice und einen einjährigen kostenlosen Update-Service. Wenn der Fragenkataloge zur CompTIA DA0-002 Zertifizierungsprüfung geändert werden, bieten wir den Kunden Schutz. Die Fragen zur DA0-002 Zertifizierungsprüfung werden von den IT-Experten sorgfältig bearbeitet. Mit den Prüfungsmaterialien zur DA0-002 Zertifizierungsprüfung von ITZert wird Ihre Zukunft sicher glänzend sein.

DA0-002 Buch, DA0-002 PDF Testsoftware

Die Schulungsunterlagen zur CompTIA DA0-002 Zertifizierungsprüfung sind preiswert, sie verfügen auch über hohe Genauigkeiten und große Reichweite. Nachdem Sie unsere Ausbildungsmaterialien zur CompTIA DA0-002 Zertifizierungsprüfung gekauft haben, werden wir Ihnen einjähriger Aktualisierung kostenlos anbieten. Hier versprechen wir Ihnen, dass wir alle Ihre bezahlten Summe zurückgeben werden, wenn es irgend ein Qualitätsproblem gibt oder Sie die CompTIA DA0-002 Zertifizierungsprüfung nicht bestehen, nachdem Sie unsere Schulungsunterlagen zur CompTIA DA0-002 Prüfung gekauft haben.

CompTIA Data+ Exam (2025) DA0-002 Prüfungsfragen mit Lösungen (Q113-Q118):

113. Frage

Which of the following pieces of information, if made public, results in a data privacy violation?

- A. Driver's license
- B. Age
- C. Employment status
- D. Gender

Antwort: A

Begründung:

This question falls under the Data Governance domain, which in DA0-002 includes understanding data privacy and compliance with regulations like GDPR. The question asks which piece of information, if made public, constitutes a privacy violation, meaning it must be personally identifiable information (PII).

* Gender (Option A): Gender is not typically considered PII on its own, as it's not uniquely identifiable.

* Driver's license (Option B): A driver's license number is PII because it uniquely identifies an individual and can be linked to other personal information, such as name and address. Making it public violates privacy regulations.

* Age (Option C): Age alone isn't PII, as it's not uniquely identifiable.

* Employment status (Option D): Employment status (e.g., employed, unemployed) isn't PII, as it doesn't uniquely identify an individual.

The DA0-002 Data Governance domain includes "identifying PII and data privacy concepts," and a driver's license is a clear example of PII that, if exposed, results in a privacy violation.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

114. Frage

A data analyst receives four files that need to be unified into a single spreadsheet for further analysis. All of the files have the same structure, number of columns, and field names, but each file contains different values.

Which of the following methods will help the analyst convert the files into a single spreadsheet?

- A. Parsing
- B. Clustering
- C. Merging
- D. Appending

Antwort: D

Begründung:

This question is part of the Data Acquisition and Preparation domain, which involves combining data from multiple sources. The files have the same structure but different values, meaning they need to be stacked vertically into one dataset.

* Merging (Option A): Merging typically involves joining datasets on a common key (e.g., a customer ID), which isn't indicated here since the files only differ in values, not keys.

* Appending (Option B): Appending stacks datasets vertically, combining rows from files with the same structure into a single dataset, which matches the scenario.

* Parsing (Option C): Parsing involves breaking down data (e.g., splitting text), not combining files.

* Clustering (Option D): Clustering is a machine learning technique for grouping similar data points, not for combining files.

The DA0-002 Data Acquisition and Preparation domain includes "executing data manipulation," such as appending datasets with identical structures.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 2.0 Data Acquisition and Preparation.

115. Frage

A data analyst is creating a report about cars sold within the last twelve months. The current data set only contains information from the last ten months. Which of the following is the most appropriate way to accomplish this task?

- A. Extract the records from the last two months of the previous year and append them to the data table.
- B. Parse the records from the last two months of the previous year and append them to the data table.
- C. Merge the records from the last two months of the previous year and append them to the data table.
- D. Join the records from the last two months of the previous year and append them to the data table.

Antwort: A

116. Frage

A company's analytics manager wants all reports to be delivered once every seven days. Which of the following is the best delivery method?

- A. Snapshot
- B. Recurring
- C. Custom
- D. Ad hoc

Antwort: B

Begründung:

This question pertains to the Visualization and Reporting domain, focusing on report delivery methods. The requirement for delivery every seven days indicates a scheduled, repeating process.

* Recurring (Option A): Recurring delivery schedules reports to be generated and delivered at regular intervals (e.g., weekly), which matches the requirement of every seven days.

* Ad hoc (Option B): Ad hoc reports are one-time, on-demand reports, not suitable for scheduled delivery.

* Custom (Option C): Custom isn't a standard delivery method; it might refer to tailored reports but doesn't imply scheduling.

* Snapshot (Option D): A snapshot captures data at a specific point, not suitable for recurring delivery.

The DA0-002 Visualization and Reporting domain includes "the appropriate visualization in the form of a report" with delivery methods, and recurring delivery is ideal for weekly reports.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 4.0 Visualization and Reporting.

117. Frage

A data analyst creates a report, and some of the fields are empty. Which of the following conditions should the analyst add to a query to provide a list of all the records with empty fields?

- A. WHERE [ColumnName] = NULL
- B. WHERE [ColumnName] IS NOT NULL
- C. WHERE [ColumnName] = 'NULL'
- D. WHERE [ColumnName] IS NULL

Antwort: D

Begründung:

This question falls under the Data Analysis domain, focusing on SQL queries to identify data issues. The task is to find records with empty fields, which in SQL means NULL values.

* WHERE [ColumnName] = NULL (Option A): In SQL, NULL cannot be compared using "="; this syntax is incorrect.

* WHERE [ColumnName] IS NULL (Option B): This is the correct SQL syntax to identify NULL values, which represent empty fields.

* WHERE [ColumnName] IS NOT NULL (Option C): This finds non-empty fields, the opposite of the requirement.

* WHERE [ColumnName] = 'NULL' (Option D): This checks for the string "NULL," not a true NULL value, which is incorrect.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods using SQL queries," such as identifying NULL values with IS NULL.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 3.0 Data Analysis.
