Pass Guaranteed Quiz The Best CV0-004 - CompTIA Cloud+ (2025) PDF Questions
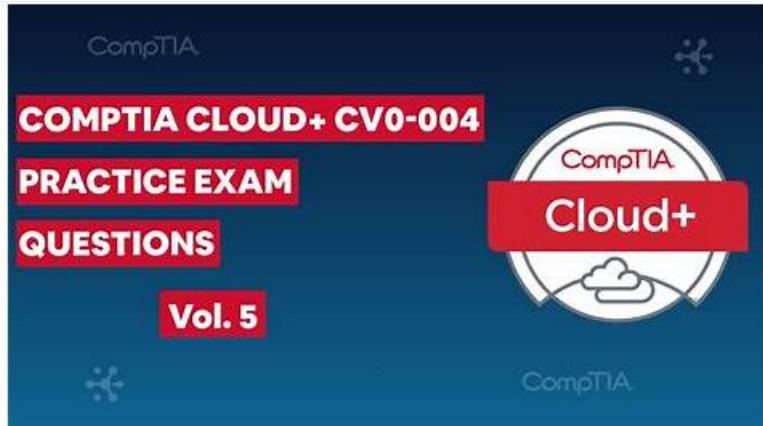

Our team of professionals and experts has prepared CV0-004 vce dumps by keeping the vigilant eyes on the current exam information and exam requirements. In case you failed exam with our CV0-004 study guide we will get you 100% money back guarantee and you can contact our support if you have any questions about our CV0-004 Real Dumps. We will be your support when you need us anytime.

The meaning of qualifying examinations is, in some ways, to prove the candidate's ability to obtain qualifications that show your ability in various fields of expertise. If you choose our CV0-004 learning guide materials, you can create more unlimited value in the limited study time, through qualifying examinations, this is our CV0-004 Real Questions and the common goal of every user, we are trustworthy helpers, so please don't miss such a good opportunity. The acquisition of CV0-004 qualification certificates can better meet the needs of users' career development.

Most CV0-004 Reliable Questions | CV0-004 Valid Exam Forum

Now there are many IT professionals in the world and the competition of IT industry is very fierce. So many IT professionals will choose to participate in the IT certification exam to improve their position in the IT industry. CV0-004 Exam is a very important CompTIA's certification exam. But if you want to get a CompTIA certification, you must pass the exam.

CompTIA Cloud+ (2025) Sample Questions (Q169-Q174):

NEW QUESTION # 169
A cloud engineer wants to implement a monitoring solution to detect cryptojacking and other cryptomining malware on cloud instances. Which of the following metrics would most likely be used to identify the activity?

- A. Disk I/O
- B. Average memory utilization
- C. Network packets
- D. Percent of CPU utilization

Answer: D

Explanation:
To detect cryptojacking and other cryptomining malware on cloud instances, monitoring the percent of CPU utilization is most effective. Cryptomining malware typically consumes a significant amount of CPU resources for mining operations, leading to unusually high CPU usage.
Monitoring and analyzing CPU utilization metrics can help identify instances of cryptojacking by highlighting abnormal levels of resource consumption.

NEW QUESTION # 170

A cloud networking engineer is troubleshooting the corporate office's network configuration. Employees in the IT and operations departments are unable to resolve IP addresses on all devices, and the IT department cannot establish a connection to other departments' subnets. The engineer identifies the following configuration currently in place to support the office network:

Each employee needs to connect to the network with a maximum of three hosts. Each subnet must be segregated, but the IT department must have the ability to communicate with all subnets. Which of the following meet the IP addressing and routing requirements? (Select two).

- A. Modifying the subnet mask to 255.255.255.128 for the IT and operations departments
- B. Configuring static routing to allow access from each subnet to 10.1.40.1
- C. Modifying the subnet mask to 255 255 254.0 for IT and operations departments
- D. Modifying the BYOD policy to reduce the volume of devices that are allowed to connect to the corporate network
- E. Configuring static routing to allow access from 10.1.30.1 to each subnet
- F. Combining the subnets and increasing the allocation of IP addresses available to support three hosts for each employee

Answer: A,E

Explanation:
To meet the requirements of allowing the IT department to communicate with all subnets while keeping each department segregated and ensuring a maximum of three hosts per employee, two actions are required. First, configuring static routing from the IT subnet (10.1.30.1) to each of the other subnets would establish the necessary connectivity. Second, modifying the subnet mask to 255.255.255.128 for the IT and operations departments would provide the needed number of host addresses while maintaining subnet segregation.
This solution is based on networking and subnetting principles, which are part of the foundational knowledge for cloud networking within the CompTIA Cloud+ framework.

NEW QUESTION # 171

Which of the following Al/ML technologies consumes text input to discern tone?

- A. Visual recognition
- B. Computer vision
- C. Text recognition
- D. Sentiment analysis

Answer: D

Explanation:
Sentiment analysis is an AI/ML technology that processes text to determine the tone. It helps in understanding the sentiments behind the words by analyzing the text input, which can be positive, negative, or neutral. NEW QUESTION # 172

Which of the following facilitates the continuous deployment of cloud applications without performing a clean install on each iteration?

- A. Container image
- B. Version management
- C. Bare-metal server
- D. Debian package

Answer: A

Explanation:
Container images package applications and their dependencies, enabling continuous deployment by quickly updating containers without full clean installs each time.

NEW QUESTION # 173

An IT manager needs to deploy a cloud solution that meets the following requirements:
. Users must use two authentication methods to access resources.
Each user must have 10GB of storage space by default.
Which of the following combinations should the manager use to provision these requirements?

- A. SSO and external storage
- B. OAuth 2.0 and ephemeral storage
- C. OIDC and persistent storage
- D. MFA and storage quotas

Answer: D

Explanation:
The combination that should be used to provision the requirements of two authentication methods and 10GB of storage space by default for each user is Multi-Factor Authentication (MFA) and storage quotas. MFA provides an additional layer of security beyond just a username and password, and storage quotas can be used to allocate a specific amount of storage space for each user.
