

Network Appliance NS0-901 PDF Questions - Increase Your Exam Passing Chances

The high pass rate of our NS0-901 exam guide is not only a reflection of the quality of our learning materials, but also shows the professionalism and authority of our expert team on NS0-901 practice engine. Therefore, we have the absolute confidence to provide you with a guarantee: as long as you use our NS0-901 Learning Materials to review, you can certainly pass the exam, and if you do not pass the NS0-901 exam, we will provide you with a full refund.

Our company boasts top-ranking expert team, professional personnel and specialized online customer service personnel. Our experts refer to the popular trend among the industry and the real exam papers and they research and produce the detailed information about the NS0-901 study materials. They constantly use their industry experiences to provide the precise logic verification. The NS0-901 Study Materials are compiled with the highest standard of technology accuracy and developed by the certified experts and the published authors only.

NS0-901 Trustworthy Exam Torrent | Latest NS0-901 Exam Duration

Users do not need to spend too much time on NS0-901 questions torrent, only need to use their time pieces for efficient learning, the cost is about 20 to 30 hours, users can easily master the test key and difficulties of questions and answers of NS0-901 Prep Guide, and in such a short time acquisition of accurate examination skills, better answer out of step, so as to realize high pass the qualification test, has obtained the corresponding qualification certificate.

Network Appliance NetApp Certified AI Expert Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37

An architect is designing a comprehensive AI platform for a large enterprise. The platform must support the entire data lifecycle, from ingest at the edge to a central data lake, and finally to a high-performance training cluster.

The requirements are:

- Edge Ingest: Data must be collected at remote sites and efficiently replicated to the core.

- Data Lake: A central, petabyte-scale repository for unstructured data, accessible via the S3 protocol.
 - Training Cluster: A high-performance compute cluster that requires low-latency, parallel file access to training datasets.
 - Data Traceability: All datasets used for training must be immutably versioned.
- Which combination of NetApp technologies and protocols should the architect choose to build this solution? (Select all that apply.)

- A. Use NetApp Snapshots on the training dataset volumes to create immutable, point-in-time versions for traceability.
- B. Use iSCSI as the primary protocol for the data lake to ensure maximum compatibility.
- C. Use NetApp ONTAP systems at the edge and NetApp SnapMirror to replicate data to the core data center.
- D. Use NetApp FlexCache to tier cold data from the data lake to the public cloud.
- E. Use NetApp StorageGRID to create the petabyte-scale, S3-accessible data lake at the core.
- F. Use a NetApp E-Series system with a parallel file system (like BeeGFS) to provide high-performance, parallel file access for the training cluster.

Answer: A,C,E,F

NEW QUESTION # 38

The firm decides to implement a disaster recovery (DR) site for the "Advisor Assistant" application in a secondary data center. The Recovery Point Objective (RPO) is 15 minutes, and the Recovery Time Objective (RTO) is 4 hours. The design must protect both the document data lake and the vector database.

The primary site contains:

- Data Lake: NetApp StorageGRID
- Vector DB: NetApp AFF A-Series

Which combination of technologies and processes provides a complete and robust DR solution? (Select all that apply.)

- A. Use the NetApp DataOps Toolkit to manually script the failover process.
- B. Use NetApp SnapMirror to create an asynchronous replication relationship for the AFF A-Series volume containing the vector database, with a schedule of 10 minutes.
- C. Rely on tape backups to be shipped to the DR site in the event of a disaster.
- D. Use BlueXP disaster recovery to orchestrate and automate the failover and failback workflows for the application and its data dependencies.
- E. Use NetApp FlexCache at the DR site to cache data from the primary site.
- F. Use StorageGRID's built-in replication rules to replicate object data from the primary site's grid to a StorageGRID instance at the DR site.

Answer: B,D,F

NEW QUESTION # 39

An organization recently suffered a ransomware attack that encrypted several volumes on their primary ONTAP storage system, including a critical volume containing curated training data. The security team needs to implement a solution that can proactively detect and block ransomware-like file I/O patterns and automatically create a secure Snapshot copy before any damage is done.

The current ONTAP configuration is as follows:

ONTAP_Version: 9.12.1

Security_Features: SnapLock (Compliance Mode) on archive volumes

Anti-Virus_Scan: Enabled (Vscan)

Ransomware_Detection: Not configured

Which ONTAP feature should be enabled to provide this proactive, automated protection?

- A. Enable Multi-Admin Verification (MAV) on all volumes.
- B. Use BlueXP backup and recovery to back up the volumes to the cloud more frequently.
- C. Enable Autonomous Ransomware Protection (ARP).
- D. Increase the frequency of scheduled Snapshots.

Answer: C

NEW QUESTION # 40

The data anonymization job, running in a Kubernetes pod, fails. The pod logs show a "Permission Denied" error when trying to

access the source volume on the on-premises ASA. An administrator checks the export policy rule for the volume.

The active rule is as follows:

Rule_Index: 1

Client_Match: 10.50.0.0/16

Protocols: nfs4

Read_Only_Access: sys

Read_Write_Access: -

Superuser_Access: none

The Kubernetes pod that failed has an IP address of '10.60.5.10'.

What is the cause of the "Permission Denied" error?

- A. The 'Superuser_Access' setting is too restrictive.
- **B. The pod's IP address ('10.60.5.10') is not within the allowed client match range ('10.50.0.0/16').**
- C. The export policy does not grant read-write access, which is required by the anonymization job.
- D. The export policy only allows access via the NFSv4 protocol.

Answer: B

NEW QUESTION # 41

An architect is designing an AI solution for a European hospital chain to analyze patient diagnostic scans. The project is subject to strict GDPR regulations, which mandate that patient data cannot leave the sovereign territory. The application also requires near-instantaneous results for physicians reviewing the scans in the hospital.

Which deployment model best satisfies these security and performance requirements?

- A. A multi-cloud strategy using different providers for training and inference to avoid vendor lock-in.
- **B. An on-premises private cloud for training combined with edge deployments in each hospital for inference.**
- C. A centralized public cloud deployment in North America for maximum scalability.
- D. A hybrid model using a public cloud for training and on-premises for inference.

Answer: B

NEW QUESTION # 42

.....

You can download the trial version free of charge on our product website so that you can not only see if our NS0-901 study materials are suitable for you, but also learn the details of our study materials and experience how to use them. Then you can know exactly the performance of our NS0-901 Preparation practice, including the quality, applicability and function of our products. Therefore, you will know clearly whether our NS0-901 learning braindumps are useful to you.

NS0-901 Trustworthy Exam Torrent: <https://www.actualtestpdf.com/NetworkAppliance/NS0-901-practice-exam-dumps.html>

On the other hand, using free trial downloading before purchasing, I can promise that you will have a good command of the function of our NS0-901 training prep, For your assistance, ActualtestPDF offers free real Network Appliance NS0-901 dumps updates if Network Appliance Certification Exams changes the NS0-901 examination content within 365 days of your purchase, This is more than a Network Appliance NS0-901 practice exam, this is a compilation of the actual questions and answers from the NetApp Certified AI Expert Exam test.

Unfortunately for programmers, there are more card games than NS0-901 craters on the moon, Integrate non-relational features, including native file streaming and geospatial data types.

On the other hand, using free trial downloading before purchasing, I can promise that you will have a good command of the function of our NS0-901 training prep.
