Remarkable 1Z0-771 Exam Materials: Oracle APEX Cloud Developer Professional Demonstrate the Most Helpful Learning Dumps - Prep4away

The 1Z0-771 exam study guide includes the latest 1Z0-771 PDF test questions and practice test software which can help you to pass the 1Z0-771 test smoothly. The test questions cover the practical questions in the test 1Z0-771 certification and these possible questions help you explore varied types of questions which may appear in the 1Z0-771 test and the approaches you should adapt to answer the questions. Every 1Z0-771 exam question is covered in our 1Z0-771 learning braindump. You will get the 1Z0-771 certification for sure with our 1Z0-771 training guide.

Oracle APEX Cloud Developer Professional Sample Questions (Q52-Q57):

NEW QUESTION # 52
Which is a valid method of logging messages to the execution log in APEX applications?

- A. apex_error.add_error ('SAL for ' || :ENAME || ' increased by 19.');
- B. apex_debug.info ('SAL for :ENAME ||' increased by 19.');

- C. apex_automation.log_info ('SAL for ' || :ENAME || ' increased by 19.');

Answer: C

Explanation:
Logging in APEX tracks runtime activity:
A . apex_automation.log_info: Correctly logs an informational message to the execution log for automation tasks (e.g., workflows).
The syntax || :ENAME || concatenates the item value (e.g., "JOHN") into "SAL for JOHN increased by 19." It's stored in APEX_AUTOMATION_LOG, viewable in Monitoring.
B . apex_debug.info: Logs to debug output, but the syntax is flawed (:ENAME || isn't concatenated properly; should be 'SAL for ' || :ENAME || ...). It's valid only when debugging is enabled (e.g., APEX_DEBUG.ENABLE).
C . apex_error.add_error: Adds an error to the error stack for user display, not a log message.
Technical Insight: log_info is non-intrusive, unlike apex_debug, which requires debug mode, or apex_error, which signals failure.
Use Case: Logging salary updates in a scheduled job without debug overhead.
Pitfall: Ensure :ENAME is in scope (e.g., page item).

NEW QUESTION # 53
How many instances of a Workflow can exist in the "In Development" state?

- A. 0
- B. Unlimited
- C. 1

Answer: C

Explanation:
In Oracle APEX Workflow, only one instance of a workflow can exist in the "In Development" state at a time. This ensures that developers work on a single draft version before publishing it. Multiple instances are allowed in other states (e.g., "Published"), but not during development.

NEW QUESTION # 54
Which two SQL format options does the APEX Assistant provide when using the "Create Data Model using AI" feature?

- A. Oracle SQL
- B. Oracle PL/SQL
- C. Quick SQL
- D. MySQL

Answer: A,C

Explanation:
The "Create Data Model using AI" feature in APEX Assistant leverages AI to generate data models based on natural language input.
The supported SQL format options are:
Quick SQL: A shorthand syntax for defining database objects, which APEX can convert into full DDL.
Oracle SQL: Standard SQL syntax compatible with Oracle Database for creating tables and other objects.
MySQL is not supported as it's specific to a different database system, and Oracle PL/SQL is a procedural language, not a format for defining data models in this context.

NEW QUESTION # 55
Which step is mandatory to make an existing Oracle APEX application Progressive Web App (PWA) enabled?

- A. Verify that Friendly URLs are turned on in the Application Definition.
- B. Enable RESTful Web Services in the application.
- C. Enable the PWA flag in the Application Definition.
- D. Add custom JavaScript to support offline functionality.

Answer: C

Explanation:
To enable an existing APEX application as a Progressive Web App (PWA), the mandatory step is:
Enable the PWA flag in the Application Definition: In the Application Definition attributes under "Progressive Web App," setting "Enable PWA" to "Yes" activates PWA features like installability, push notifications, and service worker generation. This is the foundational step, after which optional customizations (e.g., icons, manifest) can be added.
Friendly URLs: While recommended for modern apps, they're not required for PWA functionality.
Custom JavaScript: Optional for offline capabilities, but not mandatory for basic PWA enablement.
RESTful Web Services: Unrelated to PWA features.
This step transforms the app into a PWA, enhancing user experience on mobile and desktop devices with native-like behavior.

NEW QUESTION # 56
The Movies faceted search report is filtered only when the Apply button for a selected facet is clicked. What must be done in the Page Designer so that report filtering is automatically executed when any facet value is selected?

- A. Navigate to the faceted search region Attributes, and turn off the Show Facet Name attribute.
- B. Navigate to each facet and then in the Property Editor, turn on Client-Side Filtering.
- C. Navigate to the faceted search region Attributes, and disable the Batch Facet Changes attribute.

Answer: C

Explanation:
By default, faceted search can "batch" changes, requiring an "Apply" button click to filter the report. To enable automatic filtering:
Disable the Batch Facet Changes attribute: In Page Designer, under the Faceted Search region's Attributes, setting "Batch Facet Changes" to "No" ensures the report refreshes immediately when a facet value is selected, improving responsiveness. This triggers an AJAX call to update the report without a manual submit.
Show Facet Name: This controls facet label visibility, unrelated to filtering behavior.
Client-Side Filtering: This applies to Interactive Reports/Grids, not faceted search regions, and isn't the correct solution here.
This adjustment enhances the user experience by providing instant feedback.

NEW QUESTION # 57
......

Once you get the Oracle 1Z0-771 certificate, you can quickly quit your current job and then change a desirable job. The Oracle 1Z0-771 certificate can prove that you are a competent person. So it is easy for you to pass the interview and get the job. The assistance of our 1Z0-771 practice quiz will change your life a lot.
