With the AD0-E117 desktop practice test software and web-based practice test software you can get an idea about the types, structure, and format of real AD0-E117 exam questions.

The AD0-E117 exam is a challenging test that requires candidates to demonstrate their expertise in AEM. AD0-E117 exam consists of multiple-choice questions and performance-based scenarios. Candidates must demonstrate their ability to design and deploy AEM solutions that meet the needs of their clients. They must show that they can configure AEM's features, integrate it with other systems, and optimize its performance.

Obtaining the Adobe AD0-E117 certification demonstrates a candidate's expertise in AEM architecture and design, which can help them advance their career in the digital experience field. It is also a valuable credential for organizations looking to hire AEM experts, as it verifies that the candidate has the skills and knowledge necessary to design and implement effective AEM solutions. Overall, the Adobe AD0-E117 Exam is an essential certification for anyone looking to establish themselves as an expert in Adobe Experience Manager.

Adobe Experience Manager Architect Master Sample Questions (Q47-Q52):

NEW QUESTION # 47

Refer to the exhibit.

□ A customer with an existing AEM implementation wants to enrich product pages with technical data coming from their PIM system. The PIM system sits behind an API Management solution that publicly exposes the PIM API's as RESTful web services with basic

authentication as the security mechanism. Data consistency with the PIM and secure access to the APIs are key elements of the integration.

How should the Architect set up the integration between AEM and the PIM?

- A. Use a client-side integration with AJAX from the browser to the API Management
- B. Import the technical data into the AEM Author and replicate to Publishers
- **C. Integrate the AEM Publishers directly with the API Management solution**
- D. Convert the technical data to Content Fragments and expose using Content Services

Answer: C

Explanation:

Integrate the AEM Publishers directly with the API Management solution . According to Adobe Experience Manager documentation¹, a direct integration between AEM and PIM can enable marketers and creative professionals to manage eCommerce-related product data and photography within AEM. A direct integration can also ensure data consistency with the PIM and secure access to the APIs using basic authentication²³.

Option A is the only diagram that shows how AEM Publishers can directly communicate with the API Management solution.

NEW QUESTION # 48

A website hosted in AEM 6.5 is re-structured with new information architecture for site hierarchy including a new content root. The go-live release is planned to be divided into a few phases on a country basis. Those countries not involved will continue to be served with the existing content resources.

Which configuration would be implemented for the website to continue serving without impacting existing website journeys?

- A. Define a sling:internalRedirect for the new content resources and existing content resources
- B. Define a vanity URL to resolve the existing content resources
- **C. Define a sling:alias for the new content resources with the value of existing content resources**
- D. Define a sling:redirect to resolve the existing content resources

Answer: C

NEW QUESTION # 49

Refer to the exhibit.

A customer with an existing AEM implementation wants to enrich product pages with technical data coming from their PIM system. The PIM system sits behind an API Management solution that publicly exposes the PIM API's as RESTful web services with basic authentication as the security mechanism. Data consistency with the PIM and secure access to the APIs are key elements of the integration.

How should the Architect set up the integration between AEM and the PIM?

- A. Use a client-side integration with AJAX from the browser to the API Management
- B. Import the technical data into the AEM Author and replicate to Publishers
- **C. Integrate the AEM Publishers directly with the API Management solution**
- D. Convert the technical data to Content Fragments and expose using Content Services

Answer: C

Explanation:

Integrate the AEM Publishers directly with the API Management solution . According to Adobe Experience Manager documentation¹, a direct integration between AEM and PIM can enable marketers and creative professionals to manage eCommerce-related product data and photography within AEM. A direct integration can also ensure data consistency with the PIM and secure access to the APIs using basic authentication²³. Option A is the only diagram that shows how AEM Publishers can directly communicate with the API Management solution.

NEW QUESTION # 50

A new AEM Sites implementation includes a component that lists the 10 most recently published PDF documents in AEM Assets. The component works as expected during development and passes QA testing. The business starts to use it while entering content and uploading assets in preparation for go-live. A few days later, the component's PDF list is empty.
