Microsoft Secure Score in the Microsoft 365 Defender portal aggregates improvement actions across Microsoft security workloads, including Microsoft Defender for Cloud Apps (formerly Cloud App Security).

Microsoft states that "Defender for Cloud Apps automatically provides SSPM data in Microsoft Secure Score, for any supported and connected app." This means Secure Score can surface and recommend actions tied to Cloud App Security/Defender for Cloud Apps, validating statement 1 as Yes. Microsoft Learn Secure Score also includes peer comparison so organizations can benchmark their progress. The Microsoft documentation explicitly notes: "Compare your score to organizations like yours. There are two places to see how your score compares to organizations that are similar to yours." This capability appears on the Overview experience in the Defender portal, confirming statement 2 as Yes. Microsoft Learn Finally, Secure Score recognizes mitigations implemented outside Microsoft tooling. In the official guidance for improvement actions, Microsoft explains the status options "Resolved through third party and Resolved through alternate mitigation," adding: "You'll gain the points that the action is worth, so your score better reflects your overall security posture." Therefore, if you address an improvement action via a third-party product, Secure Score awards the associated points-making statement 3 Yes.
