### SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q16-Q21):

#### NEW QUESTION # 16

What does WalkMe Discovery help organizations achieve?

- A. Identifies underutilized tools and compliance risks
- B. Enhances employee satisfaction scores by 50%
- C. Translates all tools into multiple languages automatically
- D. Automates training development processes

**Answer: A**

Explanation:

WalkMe Discovery is a key component of the SAP Business Transformation Management (BTM) suite through SAP's partnership with WalkMe. It is designed to provide visibility into the digital application landscape and analyze software usage across the enterprise.

"WalkMe Discovery automatically discovers all web-based applications used across the organization, revealing underutilized tools, shadow IT, and potential compliance risks." Reference:

The tool allows transformation leaders to map actual system usage, understand license utilization, and identify areas of inefficiency or non-compliance, which directly supports SAP's Business Transformation Management (BTM<sup>2</sup>) framework goals for transparency and optimization.

"By identifying unused or redundant applications, WalkMe Discovery helps organizations reduce costs and mitigate compliance risks as part of their transformation initiatives." Option A (translation automation) and C (automated training development) are functions more aligned with WalkMe Digital Adoption Platform (DAP), not the Discovery module.

"While the WalkMe DAP provides in-app guidance and user training automation, Discovery focuses on discovering and analyzing app usage." Option D (enhancing satisfaction by 50%) is not a defined or measurable objective of the Discovery module; SAP does not claim specific numerical outcomes related to satisfaction.

Therefore, the correct answer - verified from SAP's official transformation documentation and WalkMe integration materials - is B: Identifies underutilized tools and compliance risks.

"With Enterprise Architecture Management, customers gain transparency into their application portfolios, dependencies, and

This module helps identify and mitigate technology-related risks, ensuring compliance with internal and external standards while maintaining operational resilience.

"Technology Risk and Compliance enables continuous monitoring of technology standards, risks, and compliance requirements to maintain stability during business transformation." Incorrect Options:

A (SAP Signavio Journey Modeler) belongs to the SAP Signavio suite, not LeanIX.

C (SAP Commerce Cloud) is part of SAP Customer Experience (CX) solutions, unrelated to LeanIX's transformation and architecture management focus.

- B. Business processes are directly controlled by SAP LeanIX applications.
- **C. The integration allows linking of business applications to business processes.**

This integration bridges operational and architectural perspectives, ensuring full alignment between business goals and IT capabilities.

"Through the SAP Signavio and SAP LeanIX integration, organizations can link business processes to supporting IT applications, creating a shared view that strengthens IT-business alignment." Reference:

This integration supports transformation governance by combining process intelligence (what the business does) with enterprise architecture insights (how IT supports it).

"SAP enables enterprises to visualize dependencies between processes and applications, ensuring coordinated decision-making and improved transformation outcomes." Incorrect Options:

A: Reporting is a secondary feature; integration focuses on alignment, not reporting alone.
