Use ISO-IEC-27001-Foundation Exam Questions [2026]-Best Preparation

Material

With the help of our ISO-IEC-27001-Foundation practice dumps, you will be able to feel the real exam scenario. It is better than ISO-IEC-27001-Foundation dumps questions. If you want to pass the APMG-International ISO-IEC-27001-Foundation exam in the first attempt, then don't forget to go through the ISO-IEC-27001-Foundation practice testprovided by the TrainingDumps. It will allow you to assess your skills and you will be able to get a clear idea of your preparation for the real APMG-International ISO-IEC-27001-Foundation Exam. It is the best way to proceed when you are trying to find the best solution to pass the ISO-IEC-27001-Foundation exam in the first attempt.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q16-Q21):

NEW QUESTION # 16
Which activity is an operational planning and control requirement?

- A. Review the consequences of unintended changes
- B. Document information security objectives
- C. Perform information security risk assessments at planned intervals
- D. Scheduling of second party audits

Answer: A

Explanation:
Clause 8.1 (Operational planning and control) requires organizations to:
"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).
Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

NEW QUESTION # 17
Which item is required to be defined when planning the organization's risk assessment process?

- A. How the effectiveness of the method will be measured
- B. The parts of the ISMS scope which are excluded from the risk assessment
- C. The criteria for acceptable levels of risk
- D. There are NO specific information requirements

Answer: C

Explanation:
Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.
Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.
Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.
Thus, the correct answer isC: The criteria for acceptable levels of risk.

NEW QUESTION # 18
Which statement about the conduct of audits is true?

- A. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- B. Third party audits are conducted by a customer of the organization
- C. During Stage 1 of a certification audit, evidence is collected by observing activities
- D. One of the focus areas for a surveillance audit is the output from internal audits and management reviews

Answer: D

Explanation:
Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC
17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is theresults of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.
Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.
Option B is incorrect - certificates are typically valid forthree yearswith annual surveillance. Option D is incorrect - Stage 1 is primarily adocumentation and readiness review, not evidence observation.
Therefore, the verified correct answer isC.

NEW QUESTION # 19
Which action must top management take to provide evidence of its commitment to the establishment, operation and improvement of the ISMS?

- A. Ensuring information security objectives are established
- B. Implementing the actions from internal audits
- C. Producing a risk assessment report
- D. Communicating feedback from interested parties to the organization

Answer: A

Explanation:
Clause 5.1 (Leadership and Commitment) requires top management to demonstrate leadership by:
* "ensuring the information security policy and the information security objectives are established and are compatible with the strategic direction of the organization;"
* "ensuring the integration of the ISMS requirements into the organization's processes;"
* "ensuring that the resources needed for the ISMS are available;"
Among the options, the one explicitly mandated isensuring that information security objectives are established. Risk assessments (C) and implementing audit actions (D) are responsibilities of management but not the direct leadership evidence required inClause 5.1. Communicating interested party feedback (A) is relevant but not specifically cited as leadership evidence. Thus, the verified answer isB.

NEW QUESTION # 20
Identify the missing words in the following sentence.
The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. report on
- B. continually improve
- C. communicate the importance of
- D. enforce standards for

Answer: B

Explanation:
Clause 4.4 of ISO/IEC 27001:2022 states:
"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with thePlan-Do-Check-Act (PDCA)model.
Thus, the missing words are"continually improve."

NEW QUESTION # 21

......

Obtaining an IT certification shows you are an ambitious individual who is always looking to improve your skill set. Most companies think highly of this character. Our ISO-IEC-27001-Foundation exam original questions will help you clear exam certainly in a short time. You don't need to worry about how difficulty the exams are.
